

C-BCBTP-2502 PDF Testsoftware, C-BCBTP-2502 Kostenlos Downloden

2026 Die neuesten ZertFragen C-BCBTP-2502 PDF-Versionen Prüfungsfragen und C-BCBTP-2502 Fragen und Antworten sind kostenlos verfügbar: https://drive.google.com/open?id=1GSNqkQ7H07sKxYuxBsZ_bdefml2G8MMV

Wahrscheinlich haben viele Leute Sie über die Schwierigkeiten der SAP C-BCBTP-2502 informiert. Aber wir ZertFragen möchten Ihnen mitteilen, wie einfach die SAP C-BCBTP-2502 Prüfung zu bestehen. Die SAP C-BCBTP-2502 Prüfungssoftware von unserem fähigen IT-Team können Sie bestimmt befriedigen. Sie brauchen nur die kostenlose Demo der SAP C-BCBTP-2502 probieren. Dann werden Sie unbesorgt kaufen. Wir hoffen, dass wir bei Ihrem Fortschritt im Bereich der IT helfen können!

Um Ihre Zertifizierungsprüfungen reibungslos erfolgreich zu meistern, brauchen Sie nur unsere Prüfungsfragen und Antworten zu SAP C-BCBTP-2502 (SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite) auswendigzulernen. Viel Erfolg!

C-BCBTP-2502 Pass Dumps & PassGuide C-BCBTP-2502 Prüfung & C-BCBTP-2502 Guide

Mit den Schulungsunterlagen zur SAP C-BCBTP-2502 Zertifizierungsprüfung von ZertFragen würden Sie eine glänzende Zukunft haben und Erfolg erzielen. Sie werden Sie nicht nur zum Erfolg führen, sondern auch Ihre Fähigkeiten in der IT-Branche effizient entfalten. Sie umfassen zahlreiche Wissensgebiete und können Ihre Kenntnisse verbessern. Wenn Sie noch warten oder zögern, denn Sie wissen nicht, wie man die SAP C-BCBTP-2502 Zertifizierungsprüfung bestehen kann, keine Sorge. Die Schulungsunterlagen zur SAP C-BCBTP-2502 Zertifizierungsprüfung von ZertFragen wird alle Ihren Probleme lösen.

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite C-BCBTP-2502 Prüfungsfragen mit Lösungen (Q17-Q22):

17. Frage

How does SAP LeanIX support IT landscape management when integrated with SAP BTP?

- A. By preventing real-time integration with business processes.
- B. By enforcing manual IT infrastructure tracking.
- C. By restricting governance of IT landscapes.
- **D. By providing enterprise architecture visualization and analysis.**

Antwort: D

Begründung:

As organizations adopt SAP BTP to build and extend their applications, their IT landscapes can become increasingly complex. SAP LeanIX (now a core part of SAP's enterprise architecture strategy) supports management by providing comprehensive visualization

and analysis of the enterprise architecture. When integrated with SAP BTP, LeanIX allows IT leaders to see exactly how different BTP services, cloud applications, and on-premise systems are interconnected. This "map" of the IT landscape is essential for identifying redundant applications, managing technical debt, and ensuring that the IT strategy aligns with business goals. The positioning of LeanIX alongside BTP is crucial for "Transformation Management." During a move to SAP S/4HANA or a transition to the cloud, LeanIX helps organizations plan their roadmap by showing the impact of changes on the existing architecture. It provides data-driven insights into which applications are critical, which are obsolete, and where there are gaps in security or compliance. By providing this transparency, LeanIX empowers architects to make informed decisions about where to deploy new BTP services. This prevents the "sprawl" of unmanaged cloud services and ensures that the evolution of the SAP Business Suite is organized, cost-effective, and fully aligned with the broader digital transformation objectives of the company.

18. Frage

What is a competitive advantage of SAP BTP for businesses?

- A. Limits businesses to SAP ERP-only solutions.
- **B. Provides a unified platform for AI, analytics, and automation.**
- C. Prevents integration with multi-cloud environments.
- D. Eliminates the need for AI-driven automation.

Antwort: B

Begründung:

The primary competitive advantage of SAP BTP lies in its unified nature, bringing together AI, analytics, integration, and automation into a single cohesive platform. Many organizations struggle with "point solutions"-using one vendor for AI, another for database management, and a third for integration. This fragmentation creates technical debt and data silos. SAP BTP solves this by providing a consistent set of tools and a shared data model, which allows for faster innovation and a lower total cost of ownership. By having these capabilities on a single platform, businesses can create "end-to-end" intelligent scenarios. For example, a company can use Integration Suite to pull data from a third-party CRM, SAP HANA Cloud to process that data in real-time, SAP AI Core to predict customer behavior, and SAP Build Process Automation to trigger a marketing campaign based on those predictions. This level of cross-functional orchestration is difficult to achieve with fragmented systems. Positioning SAP BTP as the "technological foundation" allows businesses to focus on business outcomes rather than managing infrastructure, giving them a significant edge in agility and speed-to-market compared to competitors using traditional, siloed architectures.

19. Frage

How does SAP Business AI enhance SAP BTP's capabilities?

- A. By eliminating machine learning capabilities.
- B. By restricting AI usage to SAP ERP modules.
- C. By replacing all existing business processes with AI-only solutions.
- **D. By enabling AI-driven automation and decision-making.**

Antwort: D

Begründung:

SAP Business AI is the strategic layer that infuses intelligence directly into the business applications running on SAP BTP. It enhances the platform's capabilities by enabling AI-driven automation and intelligent decision-making across the entire enterprise value chain. Unlike generic AI, SAP Business AI is trained on industry-specific data and business semantics, ensuring that the insights it provides are relevant to specific corporate functions like finance, supply chain, and HR. By leveraging services within BTP-such as SAP AI Core and SAP AI Launchpad-Business AI allows organizations to move from manual, reactive processes to proactive, automated ones. For example, it can automate the matching of incoming payments to invoices or predict potential supply chain disruptions before they occur. This positioning is critical for the SAP Business Suite because it doesn't just add a "feature"; it transforms the fundamental nature of the software from a "system of record" to a "system of intelligence." This allows human workers to focus on higher-value strategic tasks while the AI handles high-volume, repetitive data processing and provides data-backed recommendations, thereby significantly increasing organizational agility and competitive advantage.

20. Frage

How does SAP BTP support predictive analytics in business decision-making?

Note: There are 3 correct answers to this question.

- A. By leveraging AI and machine learning models.
- B. By restricting analytics to financial data.
- C. By automating data visualization.
- D. By requiring only manual data input.
- E. By using SAP Data Intelligence for real-time insights.

Antwort: A,C,E

Begründung:

SAP BTP provides a comprehensive ecosystem for predictive analytics, moving business decision-making from a reactive to a proactive state. This is achieved through three primary mechanisms. First, by leveraging AI and machine learning models (Option A), BTP services like SAP AI Core allow developers to train models on historical business data to predict future trends, such as customer churn or equipment failure.

Second, the platform automates data visualization (Option B) through SAP Analytics Cloud. This ensures that complex predictive insights are presented in an intuitive, dashboard-driven format that business leaders can easily interpret and act upon, rather than sifting through raw spreadsheets.

Third, the platform utilizes SAP Data Intelligence for real-time insights (Option D). This component orchestrates data from across diverse sources-both SAP and non-SAP-ensuring that the predictive models are fed with the most current and relevant information. By integrating these three pillars-intelligence (AI

/ML), visualization (Analytics), and orchestration (Data Intelligence)-SAP BTP transforms the SAP Business Suite into a forward-looking enterprise system. This allows organizations to anticipate market shifts, optimize their supply chains, and personalize customer interactions with a level of precision that was previously impossible, ultimately driving better business outcomes and long-term sustainability.

21. Frage

What is the primary function of SAP BTP's SAP Fiori tools?

- A. To deploy third-party CRM solutions.
- B. To replace SAP S/4HANA transactional screens.
- C. To develop backend APIs for database integration.
- D. To build user-friendly applications with a consistent UI/UX experience.

Antwort: D

Begründung:

User adoption is often the biggest hurdle in enterprise software deployment. The primary function of SAP Fiori tools on BTP is to solve this by enabling the creation of user-friendly applications with a consistent UI/UX experience. SAP Fiori is the design language for all modern SAP applications, moving away from complex, menu-heavy traditional screens toward a role-based, intuitive interface that works seamlessly across desktops, tablets, and smartphones.

On SAP BTP, Fiori tools (integrated within SAP Business Application Studio) provide templates and floorplans that help developers quickly build applications that look and behave exactly like standard SAP S

/4HANA apps. This consistency is vital for the SAP Business Suite because it reduces training time and minimizes user error. When an employee moves from an HR task in SuccessFactors to a finance task in S

/4HANA, the interface remains familiar. By positioning Fiori as the "face" of the platform, SAP ensures that the complex technical capabilities of BTP-such as AI insights or real-time data-are delivered to the end- user in a simple, actionable, and modern way, ultimately increasing productivity and employee satisfaction.
