CertNexus CFR-410 exam is recognized globally as a benchmark for measuring the proficiency of cybersecurity professionals in incident response and handling. CyberSec First Responder certification is vendor-neutral, which means it is not tied to any specific technology or product. This allows professionals to demonstrate their expertise in incident response and handling regardless of the technology or product they use. By obtaining the CFR-410 Certification, cybersecurity professionals can enhance their career prospects, increase their earning potential, and gain recognition in the cybersecurity industry as experts in incident response and handling.

## CertNexus CyberSec First Responder Sample Questions (Q14-Q19):

### NEW QUESTION # 14

During recovery from an incident, which three options should a company focus on? (Choose three.)

- A. Providing details of the breach to media
- **B. Restoring system and network connectivity**
- C. Determining the financial impact of the breach
- D. Identifying the responsible parties
- **E. Evaluating the success of the current incident response plan**
- **F. Ensuring proper notifications have been made**

**Answer: B,E,F**

Explanation:

Evaluating the success of the current incident response plan: After the incident, it's important to assess the effectiveness of the response to improve future incident handling.

Ensuring proper notifications have been made: It is crucial to notify the appropriate stakeholders, regulatory bodies, and possibly affected parties to comply with legal requirements and maintain transparency.

Restoring system and network connectivity: The primary goal during recovery is to restore operations by bringing systems and network connectivity back online as quickly as possible.

### NEW QUESTION # 15

An automatic vulnerability scan has been performed. Which is the next step of the vulnerability assessment process?

- A. Documenting exceptions
- **B. Generating reports**
- C. Hardening the infrastructure
- D. Assessing identified exposures

**Answer: B**

### NEW QUESTION # 16

Which of the following attacks involves sending a large amount of spoofed User Datagram Protocol (UDP) traffic to a router's broadcast address within a network?

- A. Land attack
- B. Fraggle attack
- **C. Smurf attack**
- D. Teardrop attack

**Answer: C**

### NEW QUESTION # 17

Which three tools are used for integrity verification of files? (Choose three.)

- **A. sha256sum**
- **B. md5sum**
- C. pgp32
- **D. md5deep**
