Because these Certified Information Privacy Technologist (CIPT) CIPT exam dumps are designed by experts after in-depth research about the certification exam content. The Certified Information Privacy Technologist (CIPT) exam product is made of 100% real IAPP CIPT Exam Questions verified by IAPP professionals. The Certified Information Privacy Technologist (CIPT) CIPT Valid Dumps of ValidExam are exceptionally curated and approved by experts. We have hired professionals who after in-depth research add the most important and real test questions in three formats of our CIPT exam practice material.

The CIPT certification is ideal for professionals who work in the areas of information technology, data security, compliance, and risk management. It is also suitable for privacy professionals who are seeking to expand their knowledge and skills in the field of privacy technology. Certified Information Privacy Technologist (CIPT) certification is open to individuals from all industries and sectors, including government, healthcare, finance, and education.

Introduction to CIPT Exam

International Association of Privacy Professionals (IAPP) who is the creator of CIPT claims it to be a unique designation, the only one of its kind. As a response to increasing demand for secure data privacy protection in 2014 IAPP was introduced. In all stages and throughout lifecycles these security protocols are a must. Thus, the need for authoritative and certified practitioners is growing. The professionals/ candidates feel highly confident after bagging global certifications as they are able to validate their skills and abilities.

CIPT Exam is a certification exam that is conducted by IAPP to validate Candidate knowledge and identify technology experts that know how to build data privacy architecture from its foundation in the IT industry.

After passing this exam, candidates get a certificate from IAPP that helps them to demonstrate their proficiency in data privacy to their clients and employers.

IAPP CIPT Certification is a valuable credential for individuals who want to demonstrate their expertise in privacy technology. Certified Information Privacy Technologist (CIPT) certification covers a range of privacy technologies and legal and regulatory aspects of privacy. It is suitable for individuals who work in IT, data security, or privacy roles in organizations that handle personal data, as well as privacy professionals who want to enhance their technical knowledge and skills. Certified Information Privacy Technologist (CIPT) certification exam is available in multiple languages and can be taken online or in-person.

IAPP CIPT Latest Test Braindumps, Latest CIPT Learning Materials

On the one thing, our company has employed a lot of leading experts in the field to compile the CIPT exam torrents, so you can definitely feel rest assured about the high quality of our CIPT question torrents. On the other thing, the pass rate among our customers who prepared the exam under the guidance of our CIPT Study Materials has reached as high as 98% to 100%. What's

more, you will have more opportunities to get promotion as well as a pay raise in the near future after using our CIPT question torrents since you are sure to get the CIPT certification.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q186-Q191):

NEW QUESTION # 186

Which of the following is a vulnerability of a sensitive biometrics authentication system?

- A. Slow recognition speeds.
- B. False positives.
- C. Theft of finely individualized personal data.
- D. False negatives.

Answer: C

Explanation:

Sensitive biometrics authentication systems have several potential vulnerabilities. Here's why the theft of finely individualized personal data is a significant concern:

* Data Sensitivity: Biometrics data, such as fingerprints or retinal scans, are highly sensitive and unique to individuals. If this data is stolen, it cannot be changed like a password.

* Security Risks: A breach involving biometric data can have long-lasting implications because the stolen data can be used for identity theft and other malicious activities.

* False Positives/Negatives: While false positives (A) and false negatives (B) are operational issues, they are not as critical as the theft of the data itself. Slow recognition speeds (C) are performance-related concerns but do not pose the same level of risk as data theft.

* Regulatory Compliance: Many data protection regulations require stringent measures to protect sensitive biometric data, underscoring the importance of safeguarding this information.

Reference: The IAPP Information Privacy Technologist documentation stresses the importance of protecting sensitive biometric data to prevent identity theft and ensure compliance with privacy regulations.

NEW QUESTION # 187

Which of the following entities would most likely be exempt from complying with the General Data Protection Regulation (GDPR)?

- A. A Chinese company that has opened a satellite office in a European Union (EU) member state to service European customers.
- B. A North American company servicing customers in South Africa that uses a cloud storage system made by a European company.
- C. A South American company that regularly collects European customers personal data.
- D. A company that stores all customer data in Australia and is headquartered in a European Union (EU) member state.

Answer: D

NEW QUESTION # 188

SCENARIO

WebTracker Limited is a cloud-based online marketing service located in London. Last year, WebTracker migrated its IT infrastructure to the cloud provider Amazon, which provides SQL Databases and Artificial Intelligence services to WebTracker. The roles and responsibilities between the two companies have been formalized in a standard contract, which includes allocating the role of data controller to WebTracker.

The CEO of WebTracker, Mr. Bond, would like to assess the effectiveness of Amazon's privacy controls, and he recently decided to hire you as an independent auditor. The scope of the engagement is limited only to the marketing services provided by WebTracker, you will not be evaluating any internal data processing activity, such as HR or Payroll.

This ad-hoc audit was triggered due to a future partnership between WebTracker and SmartHome - a partnership that will not require any data sharing. SmartHome is based in the USA, and most recently has dedicated substantial resources to developing smart refrigerators that can suggest the recommended daily calorie intake based on DNA information. This and other personal data is collected by WebTracker.

To get an idea of the scope of work involved, you have decided to start reviewing the company's documentation and interviewing key staff to understand potential privacy risks.

The results of this initial work include the following notes:

- * There are several typos in the current privacy notice of WebTracker, and you were not able to find the privacy notice for SmartHome.
- * You were unable to identify all the sub-processors working for SmartHome. No subcontractor is indicated in the cloud agreement with AmaZure, which is responsible for the support and maintenance of the cloud infrastructure.
- * There are data flows representing personal data being collected from the internal employees of WebTracker, including an interface from the HR system.
- * Part of the DNA data collected by WebTracker was from employees, as this was a prototype approved by the CEO of WebTracker.
- * All the WebTracker and SmartHome customers are based in USA and Canada.

Based on the initial assessment and review of the available data flows, which of the following would be the most important privacy risk you should investigate first?

- A. Review the list of subcontractors employed by AmaZure and ensure these are included in the formal agreement with WebTracker.
- B. Verify that WebTracker's HR and Payroll systems implement the current privacy notice (after the typos are fixed).
- C. Confirm whether the data transfer from London to the USA has been fully approved by AmaZure and the appropriate institutions in the USA and the European Union.
- **D. Evaluate and review the basis for processing employees' personal data in the context of the prototype created by WebTracker and approved by the CEO.**

Answer: D

Explanation:

The most significant privacy risk identified in the scenario relates to the processing of employees' personal data, specifically DNA information, as part of a prototype approved by the CEO. This activity requires a careful assessment of the legal basis for processing such sensitive data, compliance with data protection principles, and ensuring adequate safeguards are in place. Given the sensitivity of DNA data and the potential impact on employees' privacy, this should be the first priority in the audit.

IAPP Certification Textbooks, Section on Data Protection Impact Assessments (DPIAs) and Sensitive Data Processing.

NEW QUESTION # 189

SCENARIO

Please use the following to answer the next question:

Chuck, a compliance auditor for a consulting firm focusing on healthcare clients, was required to travel to the client's office to perform an onsite review of the client's operations. He rented a car from Finley Motors upon arrival at the airport as so he could commute to and from the client's office. The car rental agreement was electronically signed by Chuck and included his name, address, driver's license, make/model of the car, billing rate, and additional details describing the rental transaction. On the second night, Chuck was caught by a red light camera not stopping at an intersection on his way to dinner. Chuck returned the car back to the car rental agency at the end week without mentioning the infraction and Finley Motors emailed a copy of the final receipt to the address on file.

Local law enforcement later reviewed the red light camera footage. As Finley Motors is the registered owner of the car, a notice was sent to them indicating the infraction and fine incurred. This notice included the license plate number, occurrence date and time, a photograph of the driver, and a web portal link to a video clip of the violation for further review. Finley Motors, however, was not responsible for the violation as they were not driving the car at the time and transferred the incident to AMP Payment Resources for further review. AMP Payment Resources identified Chuck as the driver based on the rental agreement he signed when picking up the car and then contacted Chuck directly through a written letter regarding the infraction to collect the fine.

After reviewing the incident through the AMP Payment Resources' web portal, Chuck paid the fine using his personal credit card. Two weeks later, Finley Motors sent Chuck an email promotion offering 10% off a future rental.

What should Finley Motors have done to incorporate the transparency principle of Privacy by Design (PbD)?

- A. Documented that Finley Motors has a legitimate interest to share Chuck's information.
- **B. Provided notice of data sharing practices within the electronically signed rental agreement.**
- C. Obtained verbal consent from Chuck and recorded it within internal systems.
- D. Signed a data sharing agreement with AMP Payment Resources.

Answer: B

NEW QUESTION # 190

SCENARIO

Please use the following to answer the next question:

Chuck, a compliance auditor for a consulting firm focusing on healthcare clients, was required to travel to the client's office to perform an onsite review of the client's operations. He rented a car from Finley Motors upon arrival at the airport as so he could commute to and from the client's office. The car rental agreement was electronically signed by Chuck and included his name, address, driver's license, make/model of the car, billing rate, and additional details describing the rental transaction. On the second night, Chuck was caught by a red light camera not stopping at an intersection on his way to dinner. Chuck returned the car back to the car rental agency at the end week without mentioning the infraction and Finley Motors emailed a copy of the final receipt to the address on file.

Local law enforcement later reviewed the red light camera footage. As Finley Motors is the registered owner of the car, a notice was sent to them indicating the infraction and fine incurred. This notice included the license plate number, occurrence date and time, a photograph of the driver, and a web portal link to a video clip of the violation for further review. Finley Motors, however, was not responsible for the violation as they were not driving the car at the time and transferred the incident to AMP Payment Resources for further review. AMP Payment Resources identified Chuck as the driver based on the rental agreement he signed when picking up the car and then contacted Chuck directly through a written letter regarding the infraction to collect the fine.

After reviewing the incident through the AMP Payment Resources' web portal, Chuck paid the fine using his personal credit card. Two weeks later, Finley Motors sent Chuck an email promotion offering 10% off a future rental.

How can Finley Motors reduce the risk associated with transferring Chuck's personal information to AMP Payment Resources?

- A. By transferring all information to separate datafiles and requiring AMP Payment Resources to combine the datasets during processing of the violation notice.
- B. By requesting AMP Payment Resources delete unnecessary datasets and only utilize what is necessary to process the violation notice.
- **C. By providing only the minimum necessary data to process the violation notice and masking all other information prior to transfer.**
- D. By obfuscating the minimum necessary data to process the violation notice and require AMP Payment Resources to secure store the personal information.

Answer: C

Explanation:

To reduce the risk associated with transferring Chuck's personal information, Finley Motors should adhere to the principle of data minimization, which involves sharing only the data necessary for the specific purpose. In this case, they should provide AMP Payment Resources with only the essential details required to process the violation notice, such as Chuck's name, contact information, and details of the infraction, while masking any other non-essential information. This approach minimizes the exposure of personal data and aligns with best practices outlined by the IAPP for protecting personal information.

NEW QUESTION # 191

.....

The results prove that ValidExam's CIPT dumps work the best. And this is the reason that our CIPT exam questions are gaining wide popularity among the ambitious professionals who want to enhance their workability and career prospects. Our experts have developed them into a specific number of CIPT questions and answers encompassing all the important portions of the exam. They have keenly studied the previous CIPT Exam Papers and consulted the sources that contain the updated and latest information on the exam contents. The end result of these strenuous efforts is set of CIPT dumps that are in every respect enlightening and relevant to your to actual needs.
