Whether you are a sales manager, account planner, or retail execution specialist, the Salesforce Consumer Goods Cloud Accredited Professional Exam can help you take your career to the next level.

## Salesforce Consumer Goods Cloud Accredited Professional Sample Questions (Q119-Q124):

### NEW QUESTION # 119

A Consultant must migrate Communications Cloud Data from one customized Salesforce Org to another Salesforce Org. What are two key considerations before migration and preparing the target instance to receive or import Communications Cloud data?

- A. All required data points and fields from the source org are captured in the target org.
- B. Run data validation in parallel to the ongoing migration.
- C. Requires matching metadata to be established in the new target org.
- D. Test migration data in a production environment.

**Answer: A,C**

Explanation:

Before migrating Communications Cloud data to a new org, Salesforce documentation stresses two critical readiness steps:

A . Ensuring all required fields and data points exist in the target org Communications Cloud relies on a complex data model (EPC, Order Mgmt, Pricing, Attributes, EPC Projects, Fulfillment records). The target org must have all necessary fields and object configurations before importing data.

D . Metadata must match before migration

Migration cannot succeed unless product specs, attributes, price lists, technical product models, decomposition mappings, and orchestration metadata exist in the target org.

Metadata alignment is the #1 prerequisite for moving Communications Cloud data.

Incorrect options:

B: Running validation during migration is risky and not recommended.

C: Testing in production is strictly prohibited.

### NEW QUESTION # 120

A developer has modified the EPC price amount of one mobile device using the Product Designer from Communications Cloud. After the price has been changed, the developer wants to check the previous EPC price amount to track pricing metrics and get some forecast metrics.

How can the developer check the previous price amount on the mobile device?

- A. Using Price List Entry History checking the changes done after having enabled Track Field History on Price List Entry object
- B. Creating a new custom field on Price List Entry and populating it with a trigger that was created before changing the price
- C. Using the versioning feature and comparing the prices for the versioned product after having enabled the feature
- D. Using EPC project feature checking the changes done for the defaulted project after having enabled the feature

**Answer: A**

Explanation:

To track pricing changes, Salesforce recommends enabling Field History Tracking on Price List Entry, which logs:

Old price

New price

User

Time of change

This is the simplest way to review previous pricing.

Why others are wrong:

A requires custom triggers-not recommended.

C EPC Project history tracks metadata changes, not price list values.

D Versioning is for product specifications, not PLE prices.

#### NEW QUESTION # 121

Which field is required for setting up Retail Store KPIs?

- A. Promotions
- B. KPI Type
- C. Effective to
- **D. Retail Store Group**

**Answer: D**

#### NEW QUESTION # 122

Which step is required to link an Action Plan to a Visit record?

- A. Activate the Visit to generate Action Plan Tasks.
- B. Create an Action Plan based on the template where the template owners are the Sales Reps.
- C. Activate the Action Plan.
- **D. Create an Action Plan Template by specifying Visit' as the target object and publish it.**

**Answer: D**

Explanation:

To link an Action Plan to a Visit record, the first step is to create an Action Plan Template by specifying Visit' as the target object and publish it. An Action Plan Template is a template that defines the tasks and steps for an action plan. An action plan is a set of tasks that need to be completed for a specific purpose or goal. A visit is an object that represents a scheduled or unscheduled interaction between a field rep and a retail store. By specifying Visit as the target object, the Action Plan Template can be linked to any visit record that matches the criteria defined in the template. By publishing the template, the Action Plan Template becomes available for use. Verified Reference: [Salesforce Consumer Goods Cloud Implementation Guide], page 25.

#### NEW QUESTION # 123

A Field Sales Manager is trying to determine which stores have a decline in Retail Execution KPIs and therefore need attention. Which Tableau CRM for Consumer Goods Cloud dashboard can provide the required data?

- **A. Store Performance Dashboard**
- B. Lost Visit Store Performance Dashboard
- C. Team Performance Dashboard
- D. Product Performance Dashboard

**Answer: A**

Explanation:

The Tableau CRM for Consumer Goods Cloud dashboard that can provide the required data for a Field Sales Manager to determine which stores have a decline in Retail Execution KPIs and therefore need attention is the Store Performance Dashboard. The Store Performance Dashboard shows the performance and compliance of the retail stores in relation to their KPIs and promotions. The dashboard allows users to filter and analyze the data by various dimensions, such as store group, store location, product category, or visit date. The dashboard also displays metrics such as store compliance score, store revenue, store visits, and promotion compliance score. By using this dashboard, a Field Sales Manager can identify which stores are underperforming or non-compliant and take appropriate actions to improve their performance.
