XK0-006 Test Simulator - Test XK0-006 Prep

Through years of marketing, our XK0-006 latest certification guide has won the support of many customers. The most obvious data is that our products are gradually increasing each year, and it is a great effort to achieve such a huge success thanks to our product development. First of all, we have done a very good job in studying the updating of materials. In addition, the quality of our XK0-006 real XK0-006 study guide materials is strictly controlled by teachers. So, believe that we are the right choice, if you have any questions about our XK0-006 study materials, you can consult us.

CompTIA Linux+ Certification Exam Sample Questions (Q65-Q70):

NEW QUESTION # 65

An administrator receives the following output while attempting to unmount a filesystem:

umount /data1: target is busy.

Which of the following commands should the administrator run next to determine why the filesystem is busy?

- A. `du -sh /data1`
- **B. `lsdf | grep /data1`**
- C. `top -d /data1`
- D. `ps -f /data1`

Answer: B

Explanation:

The `lsdf` command lists open files and the processes using them. Running `lsdf | grep /data1` will show which processes are keeping the /data1 filesystem busy, preventing it from being unmounted.

NEW QUESTION # 66

A systems administrator is creating a backup copy of the /home/directory. Which of the following commands allows the administrator to archive and compress the directory at the same time?

- **A. `tar -cJf/backups/home.tar.xz /home/`**
- B. `cpio -o /backups/home.tar.xz /home/`
- C. `rsync -z /backups/home.tar.xz /home/`
- D. `dd of=/backups/home.tar.xz if=/home/`

Answer: A

Explanation:

The `tar -cJf` command creates (-c) an archive, compresses it with XZ (-J), and writes it to a file (-f). This allows archiving and compression of the /home/ directory in one step.

NEW QUESTION # 67

Which of the following utilities supports the automation of security compliance and vulnerability management?

- A. AIDE
- **B. OpenSCAP**
- C. SELinux
- D. Nmap

Answer: B

Explanation:

OpenSCAP is a framework that automates security compliance checking and vulnerability management by using standardized security content (SCAP). It helps administrators enforce policies and detect vulnerabilities.

NEW QUESTION # 68

A Linux administrator needs to analyze a compromised disk for traces of malware. To complete the analysis, the administrator wants to make an exact, block-level copy of the disk. Which of the following commands accomplishes this task?

- A. `cp -rp /dev/sdc/* /tmp/image`
- B. `cpio -i /dev/sdc -ov /tmp/image`
- C. `tar cvzf/tmp/image /dev/sdc`
- **D. `dd if=/dev/sdc of=/tmp/image bs=8192`**

Answer: D

Explanation:

The `dd` command performs a low-level, block-by-block copy of a device. Using `if=/dev/sdc` (input file) and `of=/tmp/image` (output file) with a block size (bs) ensures an exact replica of the disk, suitable for forensic analysis.

NEW QUESTION # 69

A systems administrator needs to write a script that counts the number of times "FAIL" appears in a log file. If "FAIL" appears zero times, then the administrator would like to print the message "SUCCESS." Given the following:

```
if [ $(grep -c FAIL /var/file.log) ____ 0 ]
then
    echo SUCCESS
else
    echo FAIL
fi
```

Which of the following should be used before the zero to complete the script?

- A. -ne
- B. -lt
- C. -eq
- D. -gt

Answer: C

Explanation:

The test should check if the count of "FAIL" equals zero. The operator -eq is used for numeric equality in shell conditionals, so [\$(grep -c FAIL /var/file.log) -eq 0] correctly evaluates whether the count is zero.

NEW QUESTION # 70

.....

These formats are made for customers by Test4Engine so that they can prepare easily and can crack the CompTIA Linux+ Certification Exam (XK0-006) certification exam on the very first try. If the customers can't pass the CompTIA Linux+ Certification Exam (XK0-006) exam on the first try despite all their efforts they can claim a full refund from Test4Engine (terms and conditions apply).
