The web-based D-PSC-DS-01 practice exam is similar to the desktop-based software. You can take the web-based D-PSC-DS-01 practice exam on any browser without needing to install separate software. In addition, all operating systems also support this web-based EMC D-PSC-DS-01 Practice Exam. Both Dell PowerScale Design v2 Exam practice exams track your performance and help to overcome mistakes. Furthermore, you can customize your Dell PowerScale Design v2 Exam practice exams according to your needs.

You are lucky to be here with our D-PSC-DS-01 training materials for we are the exact vendor who devote ourselves to produce the best D-PSC-DS-01 exam questions and helping our customers successfully get their dreaming certification of D-PSC-DS-01 Real Exam. We own the first-class team of professional experts and customers' servers concentrating on the improvement of our D-PSC-DS-01 study guide. So your success is guaranteed.

>> EMC D-PSC-DS-01 Valid Exam Dumps <<

Providing You Fantastic D-PSC-DS-01 Valid Exam Dumps with 100% Passing Guarantee

Prep4SureReview allow its valuable customer to download a free demo of Dell PowerScale Design v2 Exam D-PSC-DS-01 pdf questions and practice tests before purchasing. In the case of EMC D-PSC-DS-01 exam content changes, Prep4SureReview provides free 365 days updates after the purchase of EMC D-PSC-DS-01 exam dumps. Prep4SureReview' main goal is to provide you best EMC D-PSC-DS-01 Exam Preparation material. So this authentic and accurate Dell PowerScale Design v2 Exam D-PSC-DS-01 practice exam material will help you to get success in Dell PowerScale Design v2 Exam exam certification with excellent results.

EMC Dell PowerScale Design v2 Exam Sample Questions (Q237-Q242):

NEW QUESTION # 237

When qualifying a CIFS + Hadoop analytics opportunity, what should be done to understand the customer environment?

- A. Immediately propose a 2 PB configuration and submit for budget approval
- B. Create a cluster configuration with HDFS, NFS, and CIFS preselected
- C. Send a sizing spreadsheet to Marketing and request white paper review
- **D. Interview stakeholders on data access, location, and usage**

Answer: D

NEW QUESTION # 238

A telecommunications company has a substantial amount of data

a. This data is being created by network elements within their environment. The company wants to change the way the network elements Call Detail Records (CDR) are stored and analyzed.

The existing infrastructure consolidates all of the CDRs into a table structure, and then ingests them into a large database. Once ingested, a query engine accesses the database and performs analysis on these files. The system is functional; however, since the amount of CDRs generated will increase exponentially over the next year, the company is open to alternatives for storing and analyzing these records.

In evaluating alternatives, the key requirements are to reduce cost, the amount of storage, and the amount of time to analyze the data. The customer would like to use Hadoop to analyze the CDRs. After you have conducted an assessment of the workflow, you have recommended an Isilon Cluster to work within the Hadoop environment.

What would be the best recommendation to the customer for the workflow of Hadoop with Isilon?

- A. Copy the CDRs from the source to an Isilon cluster with NFS, then use Hadoop to analyze the information directly over HDFS
- B. Copy the CDRs from the source to an Isilon cluster with NFS, then ingest the information into Hadoop for analysis
- **C. Write the CDRs directly to an Isilon cluster with an NFS mount, then use Hadoop to analyze the information directly over HDFS**
- D. Write the CDRs directly to an Isilon cluster with an NFS mount, then ingest the information into Hadoop with NFS then analyze

Answer: C

NEW QUESTION # 239

A customer has a large, multi-tier Isilon Gen 6 cluster storing home directories and critical file share data.

Which OneFS feature should be used to segregate home directory from critical file shares, enabling data archive across a single namespace?

- **A. SmartPools**
- B. Aspera
- C. SyncIQ
- D. SmartConnect

Answer: A

NEW QUESTION # 240

A large retail customer is using their PowerScale Gen6 cluster to store receipts. The resulting workflow data consists of only small files.

What configuration change is recommended for this environment to reduce CPU overhead?

- **A. Set the requested protection level as mirrored protection.**
- B. Increase the L2 cache on every node in the cluster.
- C. Set the requested protection level higher than the default.
- D. Decrease the L3 cache on every node in the cluster.

Answer: A

NEW QUESTION # 241

A large manufacturing company is an existing Isilon customer with a cluster consisting of four NL400 nodes with 4TB drives. The cluster is using N+2:1 protection level and the file system shows that it is 60% utilized. Home directories and file shares comprise 75% of the existing content and the remainder is inactive deep archive. The company has 1,000 employees using Windows and Mac clients participating in a single Active Directory (AD) forest.

During a meeting with the CIO and Director of IT you discuss the company's recent acquisition - an engineering firm that specializes in Computer Aided Design (CAD). The engineering firm has 400 UNIX workstations that produce technical drawings which are currently stored on another vendor's SAN solution. The all UNIX environment uses NIS for authentication and name resolution. They do not currently use DNS or LDAP. The engineering company has an old storage system that has been experiencing problems and the CIO would like you to migrate the data onto the Isilon cluster. The CIO would like to eliminate all tape and recover the data onto disk.

The CIO is concerned about security of the company's intellectual property, especially with the rapid adoption of mobile devices and external cloud content sharing services such as DropBox, Egnyte, and SugarSync. They would like to implement an alternative that provides external file sharing and mobile device synchronization while maintaining security control over the company's data.

The Director of IT reports that users are storing non-work related content on the Isilon cluster. They would like to limit the amount of capacity that each user can consume in their home directory and want to ensure you provide the capability to easily visualize which users are over their allotment. The company's Windows users currently leverage Windows Shadow Copy to recover files that have been accidentally deleted. The IT department wants to ensure that Mac and incoming UNIX clients have the same functionality. The Director of IT also mentions that users are reporting slow response times when browsing their home directories and shared folders. They are concerned that Isilon cannot scale to support their combined requirements.

The customer provides the following environment summary from the engineering firm's recently departed IT staff:

- 20 TB of Home Directory data

- 100 TB of active CAD projects

- 400 TB of archived data stored on tape at an offsite warehouse

The CIO approaches you with a new requirement. They would like to reuse the tape library that was previously used for archiving to now be used to back up some of their data.

What do you recommend to the Director of IT as the best architecture to achieve this goal?

- A. Connect the Tape Library via Fibre Channel to the Isilon cluster and use a third party backup software to initiate an NDMP backup to an accelerator.
- B. Use a third party backup software and have the Isilon cluster convert the data to LTF5 so it can be stored to the tape library.
- C. Implement a Backup Accelerator and use the internal backup software within the Isilon cluster to move data to the tape library.
- D. Use a Backup Accelerator with SyncIQ to push the data to the tape library via the Fibre Channel ports on the accelerator.

Answer: A

NEW QUESTION # 242

.....

We are committed to help you pass the exam just one time, so that your energy and time on practicing D-PSC-DS-01 exam braindumps will be paid off. D-PSC-DS-01 learning materials are high-quality, and they will help you pass the exam. Moreover, D-PSC-DS-01 exam braindumps contain both questions and answers, and it's convenient for you to check answers after training. We offer you free update for one year for D-PSC-DS-01 Training Materials, and the update version will be sent to you automatically. We have online and offline service for D-PSC-DS-01 exam materials, if you have any questions, don't hesitate to consult us.

D-PSC-DS-01 Test Voucher: <https://www.prep4surereview.com/D-PSC-DS-01-latest-braindumps.html>

The 98%-99% pass rate has helped many candidates passed the actual test and got the D-PSC-DS-01 certification successfully. We are sure that using D-PSC-DS-01 Exam Questions preparation material will support you in passing the D-PSC-DS-01 exam with confidence. In addition, D-PSC-DS-01 Online soft test engine have testing history and performance review, you can have a general review of what you have learned before start practicing. Once you have made up your minds to change, come to purchase our D-PSC-DS-01 training practice.

The WebLogic Administration Console, For some D-PSC-DS-01 ambigrams, I prefer my sketches to be very precise, but for others, rough sketches will suffice. The 98%-99% pass rate has helped many candidates passed the actual test and got the D-PSC-DS-01 Certification successfully.
