## LEED-Green-Associate日本語認定 & LEED-Green-Associate資格難易度

我々社のチームは顧客のすべてのために、改革政策に伴って最新版の信頼できるUSGBCのLEED-Green-Associateをリリースされて喜んでいます。我々社はLEED-Green-Associate問題集のクオリティをずっと信じられますから、試験に失敗するとの全額返金を承諾します。また、受験生の皆様は一発的に試験に合格できると信じます。もし運が良くないとき、失敗したら、お金を返してあなたの経済損失を減らします。

## USGBC LEED Green Associate Exam 認定 LEED-Green-Associate 試験問題 (Q263-Q268):

### 質問 # 263

What do team members enhance by collaboration during the integrative process?

- A. Life-cycle costs
- B. Project duration
- **C. Efficiency and effectiveness of systems**
- D. Construction costs

正解: C

解説:

Explanation

The integrative process involves collaboration among all project team members, from initial planning through design and construction, to enhance the efficiency and effectiveness of systems. This process allows for better coordination among disciplines, leading to more efficient use of resources, improved environmental performance, reduced project costs, and enhanced occupant satisfaction.

References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

### 質問 # 264

In order to maintain the LEED Green Associate credential, you must earn which of the following continuing education credits?

- A. 30 hours every two years with six hours being LEED specific
- **B. 15 hours every two years with three hours being LEED specific**
- C. 15 hours per year with six hours being LEED specific
- D. 30 hours per year with three hours being LEED specific

正解: B

**質問 # 265**

Which of the following is a tradable commodity representing proof that a unit of electricity was generated from a renewable source?

- A. Certificate for Innovative Renewables
- **B. Renewable Energy Certificate**
- C. Tradable Energy Credit (TEC)
- D. Renewable Wind Certificate

**正解: B**

解説:

A Renewable Energy Certificate (REC) is a tradable commodity that represents proof that one unit of electricity was generated from a renewable energy source. RECs are used to track and trade renewable energy in the open market, providing an economic incentive for renewable energy generation. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

**質問 # 266**

Strategies for improving building occupants' comfort and control may consist of

- A. ensuring adequate ventilation, monitoring carbon dioxide and prohibiting smoking
- B. designing for proper ventilation, monitoring outdoor airflow and including appropriate acoustic design
- C. specifying low-emitting materials, testing for radon and other on-site contaminants and installing entryway grates
- **D. installing operable windows, giving occupants lighting control and providing ergonomic furniture**

**正解: D**

解説:

Explanation

Strategies for improving building occupants' comfort and control may consist of installing operable windows, giving occupants lighting control and providing ergonomic furniture. These strategies can enhance the indoor environmental quality (IEQ) of a building, which is the physical and psychological conditions of the indoor spaces that affect the health, comfort, and productivity of the occupants. Installing operable windows can allow occupants to adjust the natural ventilation, temperature, and fresh air intake of their spaces. Giving occupants lighting control can allow them to adjust the artificial lighting levels, color, and direction of their spaces. Providing ergonomic furniture can support the physical comfort, posture, and well-being of the occupants<sup>12</sup>. References: LEED v4 Green Associate Candidate Handbook<sup>1</sup>, LEED v4 BD+C Reference Guide<sup>2</sup>

**質問 # 267**

Good site design benefits a project in which of the following ways?

- **A. Makes occupants comfortable by providing green spaces**
- B. Supports access to diverse land uses, sustainable food and services
- C. Protects endangered species and maximizes development of previously undeveloped areas
- D. Provides access to public transportation and employment opportunities

**正解: A**

解説:

Good site design benefits a project in which of the following ways: makes occupants comfortable by providing green spaces. Green spaces are areas of vegetation that improve the quality of life for building occupants and visitors by providing natural views, fresh air, shade, noise reduction, and recreational opportunities. They also reduce heat island effect, improve stormwater management, and sequester carbon dioxide. The LEED Green Associate Candidate Handbook states that one of the intents of the Sustainable Sites category is to "enhance occupant comfort by providing green spaces" [1, p. 13].
