Our NetSec-Analyst learning materials prepared by our company have now been selected as the secret weapons of customers who wish to pass the exam and obtain relevant certification. If you are agonizing about how to pass the exam and to get the NetSec-Analyst certificate, now you can try our learning materials. Our reputation is earned by high-quality of our learning materials. Once you choose our training materials, you chose hope. Our learning materials are based on the customer's point of view and fully consider the needs of our customers. If you follow the steps of our NetSec-Analyst Learning Materials, you can easily and happily learn and ultimately succeed in the ocean of learning.

Palo Alto Networks NetSec-Analyst Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Object Configuration Creation and Application: This section of the exam measures the skills of Network Security Analysts and covers the creation, configuration, and application of objects used across security environments. It focuses on building and applying various security profiles, decryption profiles, custom objects, external dynamic lists, and log forwarding profiles. Candidates are expected to understand how data security, IoT security, DoS protection, and SD-WAN profiles integrate into firewall operations. The objective of this domain is to ensure analysts can configure the foundational elements required to protect and optimize network security using Strata Cloud Manager.
Topic 2	<ul style="list-style-type: none"> • Management and Operations: This section of the exam measures the skills of Security Operations Professionals and covers the use of centralized management tools to maintain and monitor firewall environments. It focuses on Strata Cloud Manager, folders, snippets, automations, variables, and logging services. Candidates are also tested on using Command Center, Activity Insights, Policy Optimizer, Log Viewer, and incident-handling tools to analyze security data and improve the organization overall security posture. The goal is to validate competence in managing day-to-day firewall operations and responding to alerts effectively.
Topic 3	<ul style="list-style-type: none"> • Troubleshooting: This section of the exam measures the skills of Technical Support Analysts and covers the identification and resolution of configuration and operational issues. It includes troubleshooting misconfigurations, runtime errors, commit and push issues, device health concerns, and resource usage problems. This domain ensures candidates can analyze failures across management systems and on-device functions, enabling them to maintain a stable and reliable security infrastructure.
Topic 4	<ul style="list-style-type: none"> • Policy Creation and Application: This section of the exam measures the abilities of Firewall Administrators and focuses on creating and applying different types of policies essential to secure and manage traffic. The domain includes security policies incorporating App-ID, User-ID, and Content-ID, as well as NAT, decryption, application override, and policy-based forwarding policies. It also covers SD-WAN routing and SLA policies that influence how traffic flows across distributed environments. The section ensures professionals can design and implement policy structures that support secure, efficient network operations.

Exam NetSec-Analyst Quizzes & NetSec-Analyst Frequent Update

A few crops of practice materials are emerging in the market these days, with undecided quality to judge from customers' perspective. If you choose the wrong NetSec-Analyst practice material, it will be a grave mistake. Their behavior has not been strictly ethical and irresponsible to you, which we will never do. We know making progress and getting the certificate of NetSec-Analyst Training Materials will be a matter of course with the most professional experts in command of the newest and the most accurate knowledge in it. That's why our Palo Alto Networks Network Security Analyst exam prep has taken up a large part of market.

Palo Alto Networks Network Security Analyst Sample Questions (Q18-Q23):

NEW QUESTION # 18

Match each rule type with its example

	Answer Area
Create a policy with source zones A and B. The rule will apply all traffic within zone A and all traffic within zone B, but not to traffic between zones A and B.	 <div>Universal</div>
Create a policy with source zones A and B and destination zone A and B. The rule should apply to all traffic within zone A, all traffic within zone B, all traffic from zone A to zone B, and all traffic from zone B to zone A.	<div>Intrazone</div>
Create a policy with source zones A and B and destination zone A and B. The rule would apply to traffic from zone A to zone B and from zone B to zone A, but not traffic within zones A or B.	<div>Interzone</div>

Answer:

Explanation:

Create a policy with source zones A and B. The rule will apply to all traffic within zone A and all traffic within zone B, and all traffic between zones A and B.	
Create a policy with source zones A and B and destination zone C. The rule should apply to all traffic within zone A, all traffic within zone B, all traffic from zone A to zone B, and all traffic from zone B to zone A.	
Create a policy with source zones A and B and destination zone C. The rule would apply to traffic from zone A to zone B, from zone B to zone A, but not traffic within zones A or B.	

Create a policy with source zones A and B and destination zone C. The rule would apply to traffic from zone A to zone B, from zone B to zone A, but not traffic within zones A or B.	Universal
Create a policy with source zones A and B. The rule will apply to all traffic within zone A and all traffic within zone B, but not to traffic between zones A and B.	Intrazone
Create a policy with source zones A and B and destination zone C. The rule should apply to all traffic within zone A, all traffic within zone B, all traffic from zone A to zone B, and all traffic from zone B to zone A.	Interzone

NEW QUESTION # 19

How would a Security policy need to be written to allow outbound traffic using Secure Shell (SSH) to destination ports tcp/22 and tcp/4422?

- A. The admin creates a Security policy allowing application "ssh" and service "application-default".
- B. The admin creates a custom service object named "tcp-4422" with port tcp/4422. The admin then creates a Security policy allowing application "ssh", service "tcp-4422", and service "application-default".
- C. The admin creates a custom service object named "tcp-4422" with port tcp/4422. The admin then creates a Security policy allowing application "ssh" and service "tcp-4422".
- D. The admin creates a custom service object named "tcp-4422" with port tcp/4422. The admin also creates a custom service object named "tcp-22" with port tcp/22. The admin then creates a Security policy allowing application "ssh", service "tcp-4422", and service "tcp-22".

Answer: D

NEW QUESTION # 20

Which User-ID mapping method should be used for an environment with clients that do not authenticate to Windows Active Directory?

- A. Windows session monitoring via a domain controller
- B. passive server monitoring using a PAN-OS integrated User-ID agent
- C. Captive Portal
- D. passive server monitoring using the Windows-based agent

Answer: C

Explanation:

<https://docs.paloaltonetworks.com/pan-os/9-0/pan-os-admin/user-id/map-ip-addresses-to-users/map-ip-addresses-to-username-using-captive-portal.html>

NEW QUESTION # 21

An administrator wants to prevent access to media content websites that are risky. Which two URL categories should be combined in a custom URL category to accomplish this goal? (Choose two)

- A. known-risk
- B. streaming-media
- C. high-risk
- D. recreation-and-hobbies

Answer: B,D

NEW QUESTION # 22

Which two types of profiles are needed to create an authentication sequence? (Choose two.)

- A. Authentication profile
- B. Interface Management profile
- C. Security profile
- D. Server profile

Answer: A,D

Explanation:

In the FW you define an Auth sequence which specifies the Auth Profile. If you click add on an Auth Profile and define one named TACACS for example, the Auth Profile calls in the TACACS+ Server Profile.

NEW QUESTION # 23
