

JN0-336 Exam Tutorials, JN0-336 Fresh Dumps

2026 Latest DumpsKing JN0-336 PDF Dumps and JN0-336 Exam Engine Free Share: <https://drive.google.com/open?id=15Sccj0LIITtSAeiQsMS2Qrzjn3IuDBR>

After years of unremitting efforts, our JN0-336 exam materials and services have received recognition and praises by the vast number of customers. An increasing number of candidates choose our JN0-336 study braindumps as their exam plan utility. There are a lot of advantages about our JN0-336 training guide. Not only our JN0-336 learning questions are always the latest and valid, but also the prices of the different versions are quite favourable.

Choosing our JN0-336 exam quiz will be a wise decision that you make, because this decision may have a great impact in your future development. Having the JN0-336 certificate may be something you have always dreamed of, because it can prove that you have certain strength. Our JN0-336 Exam Questions can provide you with services with pretty quality and help you obtain a certificate. The quality of our JN0-336 learning materials can withstand the test of practice.

JN0-336 Fresh Dumps & JN0-336 Free Practice

We have a team of experts curating the real JN0-336 questions and answers for the end users. We are always working on updating the latest JN0-336 questions and providing the correct JN0-336 answers to all of our users. We provide free updates for one year from the date of purchase. You can benefit from the updates JN0-336 Preparation material, and you will be able to pass the JN0-336 exam in the first attempt.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which two statements are correct about the fab interface in a chassis cluster? (Choose two.)

- A. Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization.
- B. In an active/active configuration, inter-chassis transit traffic is sent over the fab interface.
- C. Heartbeat signals sent on the fab interface monitor the health of the control plane link.
- D. The fab interface enables configuration synchronization.

Answer: A,B

Explanation:

The fab interface is a fabric link that connects the two nodes in a chassis cluster. A chassis cluster is a high-availability feature that groups two identical SRX Series devices into a cluster that acts as a single device.

The fab interface has two functions:

Real-time objects (RTOs) are exchanged on the fab interface to maintain session synchronization: RTOs are data structures that store information about active sessions, such as source and destination IP addresses, ports, protocols, and security policies. RTOs are exchanged between the nodes on the fab interface to ensure that both nodes have the same session information and can take over the traffic in case of a failover.

In an active/active configuration, inter-chassis transit traffic is sent over the fab interface: In an active/active configuration, both nodes in a cluster can process traffic for different redundancy groups (RGs). RGs are collections of interfaces or services that fail over together from one node to another. If traffic needs to transit from one RG to another RG that is active on a different node, it is sent over the fab interface.

NEW QUESTION # 14

Which two devices would you use for DDoS protection with Policy Enforcer? (Choose two.)

- A. MX
- B. vQFX
- C. vMX
- D. QFX

Answer: A,C

Explanation:

The MX and vMX devices can be used for DDoS protection with Policy Enforcer. Policy Enforcer is a Juniper Networks solution that provides real-time protection from DDoS attacks. It can be used to detect and block malicious traffic, and also provides granular control over user access and policy enforcement.

The MX and vMX devices are well-suited for use with Policy Enforcer due to their high-performance hardware and advanced security features.

NEW QUESTION # 15

Which two sources are used by Juniper Identity Management Service (JIMS) for collecting username and device IP addresses? (Choose two.)

- A. Microsoft Exchange Server event logs
- B. DNS
- C. OpenLDAP service ports
- D. Active Directory domain controller event logs

Answer: B,D

Explanation:

Juniper Identity Management Service (JIMS) collects username and device IP addresses from both DNS and Active Directory domain controller event logs. DNS is used to resolve hostnames to IP addresses, while Active Directory domain controller event logs are used to get information about user accounts, such as when they last logged in.

NEW QUESTION # 16

Exhibit

Referring to the SRX Series flow module diagram shown in the exhibit, where is application security processed?

- A. Forwarding Lookup
- B. Services ALGs
- C. Screens

- D. Security Policy

Answer: B

NEW QUESTION # 17

Which two statements are correct about the cSRX? (Choose two.)

- A. The cSRX supports BGP, OSPF, and IS-IS routing services.
- **B. The cSRX has three default zones: trust, untrust, and management**
- C. The cSRX only supports Layer 2 "bump-in-the-wire" deployments.
- **D. The cSRX supports firewall, NAT, IPS, and UTM services.**

Answer: B,D

Explanation:

The two statements that are correct about the cSRX are that it supports firewall, NAT, IPS, and UTM services, and that it has three default zones: trust, untrust, and management. The cSRX is a software-defined security solution that provides comprehensive network security capabilities and is designed for virtualized environments. It supports firewall, NAT, IPS, and UTM services to protect against threats, as well as BGP, OSPF, and IS-IS routing services for routing functionality. Additionally, the cSRX has three default zones: trust, untrust, and management. The trust zone is used to define traffic that is allowed to enter the network, the untrust zone is used to define traffic that should be blocked from entering the network, and the management zone is used to manage the device itself. The cSRX does not support Layer 2 "bump-in-the-wire" deployments.

NEW QUESTION # 18

.....

With the popularization of wireless network, those who are about to take part in the JN0-336 exam guide to use APP on the mobile devices as their learning tool, because as long as entering into an online environment, they can instantly open the learning material from their appliances. Our JN0-336 study materials provide such version for you. The online test engine is a kind of online learning, you can enjoy the advantages of APP version of our JN0-336 Exam Guide freely. Moreover, you actually only need to download the APP online for the first time and then you can have free access to our JN0-336 exam questions in the offline condition if you don't clear cache.
