SPLK-1004 Useful Dumps, Reliable SPLK-1004 Exam Cost

Selecting shortcut and using technique are to get better success. If you want to get security that you can pass Splunk SPLK-1004 certification exam at the first attempt, PrepAwayPDF Splunk SPLK-1004 exam dumps is your unique and best choice. It is the dumps that you can't help praising it. There are no better dumps at the moment. The dumps can let you better accurate understanding questions point of SPLK-1004 Exam so that you can learn purposefully the relevant knowledge. In addition, if you have no time to prepare for your exam, you just remember the questions and the answers in the dumps. The dumps contain all questions that can appear in the real exam, so only in this way, can you pass your exam with no ease.

Splunk Core Certified Advanced Power User Sample Questions (Q96-Q101):

NEW QUESTION # 96
Which syntax is used when referencing multiple CSS files in a view?

- A. <dashboard stylesheet=custom.css stylesheet=userapps.css>
- B. <dashboard stylesheet="custom.css, userapps.css">
- C. <dashboard style="custom.css, userapps.css">
- D. <dashboard stylesheet="custom.css | userapps.css">

Answer: A

Explanation:
When referencing multiple CSS files in a Splunk dashboard, the correct syntax is <dashboard stylesheet="custom.css" stylesheet="userapps.css">. This ensures that both stylesheets are loaded.

NEW QUESTION # 97
Which of the following fields are provided by the fieldsummary command? (select all that apply)

- A. stdev
- B. mean
- C. count
- D. dc

Answer: C,D

Explanation:
The fieldsummary command in Splunk generates statistical summaries of fields in the search results, including the count of events that contain the field (count) and the distinct count of field values (dc). These summaries provide insights into the prevalence and distribution of fields within the dataset, which can be valuable for understanding the data's structure and content. Standard deviation (stdev) and mean (mean) are not directly provided by fieldsummary but can be calculated using other commands like stats for fields that contain numerical data.

NEW QUESTION # 98
A report named "Linux logins" populates a summary index with the search string sourcetype=linux_secure | sitop src_ip user. Which of the following correctly searches against the summary index for this data?

- A. index=summary sourcetype="linux_secure" | stats count by src_ip user
- B. index=summary sourcetype="linux_secure" | top src_ip user
- C. index=summary search_name="Linux logins" | top src_ip user
- D. index=summary search_name="Linux logins" | stats count by src_ip user

Answer: D

Explanation:
The correct way to search against the summary index for this data is:
index=summary search_name="Linux logins" | stats count by src_ip user
Here's why this works:
* Summary Index: Summary indexes store pre-aggregated data generated by scheduled reports or saved searches. To query this data, you must specify theindex=summaryand filter by thesearch_namefield, which identifies the specific report that populated the

summary index.
* Aggregation: The original search usedsitop, which is designed for summary indexing. When querying the summary index, you should usestatsto aggregate the pre-aggregated data further.
Example:
index=summary search_name="Linux logins"
| stats count by src_ip user

NEW QUESTION # 99
Which of the following could be used to build a contextual drilldown?

- A. <set>and<offset>elements withdependsandrejectsattributes.
- B. <set>and<reset>elements with arejectsattribute.
- C. <set>and<unset>elements with adepend?attribute.
- D. $earliest$and$latest$tokens set by a global time range picker.

Answer: C

Explanation:
Comprehensive and Detailed Step by Step Explanation:
To build acontextual drilldownin Splunk dashboards, you can use<set>and<unset>elements with adepend?attribute. These elements allow you to dynamically update tokens based on user interactions, enabling context- sensitive behavior in your dashboard.
Here's why this works:
* Contextual Drilldown: A contextual drilldown allows users to click on a visualization (e.g., a chart or table) and navigate to another view or filter data based on the clicked value.
* Dynamic Tokens: The<set>element sets a token to a specific value when a condition is met, while< unset>clears the token when the condition is no longer valid. Thedepend?attribute ensures that the behavior is conditional and context-aware.
Example:
<drilldown>
<set token="selected_product">$click.value$</set>
<unset token="selected_product" depend="?"></unset>
</drilldown>
In this example:
* When a user clicks on a value, theselected_producttoken is set to the clicked value ($click.value$).
* If the condition specified independ?is no longer true, the token is cleared using<unset>.
Other options explained:
* Option B: Incorrect because$earliest$and$latest$tokens are related to time range pickers, not contextual drilldowns.
* Option C: Incorrect because<reset>is not a valid element in Splunk XML, andrejectsis unrelated to drilldown behavior.
* Option D: Incorrect because<offset>is not used for building drilldowns, anddepends/rejectsdo not apply in this context.
References:
Splunk Documentation on Drilldowns:https://docs.splunk.com/Documentation/Splunk/latest/Viz/DrilldownIntro

NEW QUESTION # 100
How can the erex and rex commands be used in conjunction to extract fields?

- A. The regex generated by the rex command can be edited and used with the erex command in a subsequent search.
- B. The regex generated by the erex command can be edited and used with the erex command in a subsequent search.
- C. The erex and rex commands cannot be used in conjunction under any circumstances.
- D. The regex Generated by the erex command can be edited and used with the regex command in a subsequent search.

Answer: D

Explanation:
The erex command in Splunk is used to generate regular expressions based on example data, and these generated regular expressions can then be edited and utilized with the rex command in subsequent searches (Option A). The erex command is helpful for users who may not be familiar with regular expression syntax, as it provides a starting point that can be refined and customized with rex for more precise field extraction.

NEW QUESTION # 101
.....

The PrepAwayPDF acknowledges that Splunk aspirants are continuously juggling a couple of responsibilities, so SPLK-1004 questions are ideal for short practise. Candidates can access those questions everywhere and at any time, the usage of any clever device, which allows them to examine at their very own tempo. The SPLK-1004 Questions are portable and you can also print them.
