問題 #157

A company uses Power Apps with Microsoft Dataverse.

The company enables auditing on the Dataverse database. The company tenant reaches the maximum storage capacity.

You need to delete some auditing data.

Which three deletion options should you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. by column
- B. by table
- C. by record
- D. older than a specified date
- E. between two specified dates

答案： C,D,E

解題說明：

A: Deleting by table allows you to select specific tables in the Dataverse database for which you want to delete the auditing data.

This can be done by going to the Power Apps portal, navigating to the Data tab, and selecting the table for which you want to delete the auditing data. You can then select the specific auditing data you want to delete and click the "Delete" button. This is useful if you want to only delete auditing data for specific tables and not for the entire database.

Reference:<https://docs.microsoft.com/en-us/power-platform/admin/data/data-management-auditing#delete-audit>- C; Deleting

between two specified dates allows you to select a range of dates within which the auditing data will be deleted. This can be done by going to the Power Apps portal, navigating to the Data tab, and selecting the "Audit" option. From there, you can select the "Delete" button, and select the "Between two dates" option.

Then you can specify the start and end date for which you want to delete the auditing data. This is useful if you want to delete auditing data for a specific time period and not for the entire database.

Reference:<https://docs.microsoft.com/en-us/power-platform/admin/data/data-management-auditing#delete-audit>- E: Deleting older

than a specified date allows you to select a specific date, and any data older than that date will be deleted. This can be done by going to the Power Apps portal, navigating to the Data tab, and selecting the "Audit" option. From there, you can select the "Delete" button, and select the "Older than a specified date" option. Then you can specify the date for which you want to delete the auditing data. This is useful if you want to delete auditing data that is older than a certain date and not for the entire database.

Reference:<https://docs.microsoft.com/en-us/power-platform/admin/data/data-management-auditing#delete-audit>- It's always good to have a backup of Data before deletion and also check the retention period of the data you want to delete.

問題 #158

A customer tracks events by using a custom entity.

The custom entity includes a custom field for the venue of the events. The customer must be able to display the events by venue in a calendar.

You need to ensure that all events display by venue in the calendar.

To which component should you add a control?

- A. view
- B. Field
- C. Form

問題 #159

You have a model-driven app. You create five Microsoft Excel templates for analyzing customer data. Four of the templates must be available to all users. The remaining template must be available only to you. You configure the appropriate security roles for users. You need to determine how to upload the Excel templates. Which method should you use? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

答案:

解題說明:

Explanation:

Table Description automatically generated with medium confidence

Box 1: In the Settings menu, select Document Templates

Templates uploaded from the Settings page are available to all users. You don't need to take any further action. Administrators can use the Settings page to upload the Excel template. A template uploaded in Settings is available to all users. For admins: Upload the Excel template

- * Go to Settings > Templates > Document Templates.
- * Click Upload Template.
- * Drag the Excel file into the dialog box or browse to find and upload the file.
- * Upload Template dialog box.
- * Click Upload.

Box 2: In the view for the email records, select Excel templates

Note: For non-admins or admins wanting to create a personal template: Upload the Excel template Open a page with a list of records, for example, the list of Sales Opportunities. Go to Sales > Opportunities > My Open Opportunities.

- * On the menu bar, click Excel Templates > Create Excel Template.
- * Click Excel Template > Upload.
- * Click Upload to add the Excel template.
- * Drag the file into the dialog box or browse to find and upload the file.
- * Click Upload.
