## EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q260-Q265):

### NEW QUESTION # 260

Human resource planning for security professionals in your organization is a:

- A. Simple and easy task because the threats are getting easier to find and correct.
- B. Training requirement that is on-going and always changing.

- C. Not needed because automation and anti-virus software has eliminated the threats.
- D. Training requirement that is met through once every year user training.

**Answer: B**

Explanation:

Dynamic Nature of Cybersecurity

\* Threat landscapes constantly evolve, requiring security professionals to undergo continuous training to stay updated on emerging risks, technologies, and best practices.

\* Annual training is insufficient for addressing real-time threats and vulnerabilities.

Comparison of Options

- \* A. Simple and easy task: Incorrect, as cybersecurity threats are complex and evolving.
- \* B. Once every year user training: User training alone does not cover the dynamic nature of cybersecurity threats.
- \* D. Not needed due to automation: Incorrect, as human expertise remains critical despite automation tools.

EC-Council References

\* EC-Council highlights the need for continuous professional development and training as part of workforce development strategies for CISOs and their teams.

#### **NEW QUESTION # 261**

Which of the following is the PRIMARY purpose of International Organization for Standardization (ISO) 27001?

- A. Use within an organization to ensure compliance with laws and regulations
- B. Use within an organization to formulate security requirements and objectives
- C. To enable organizations that adopt it to obtain certifications
- D. **Implementation of business-enabling information security**

**Answer: D**

#### **NEW QUESTION # 262**

Risk is defined as:

- A. Asset loss times likelihood of event
- B. Threat times vulnerability divided by control
- C. Advisory plus capability plus vulnerability
- D. Quantitative plus qualitative impact

**Answer: A**

Explanation:

Definition of Risk:

\* Risk is calculated by multiplying the asset value or potential loss by the likelihood of a threat event occurring.

Mathematical Basis:

\* This formula underpins quantitative risk assessments and guides mitigation priorities.

Supporting Reference:

\* CCISO training outlines this calculation as standard practice in risk analysis methodologies.

#### **NEW QUESTION # 263**

Which of the following most commonly falls within the scope of an information security governance steering committee?

- A. **Vetting information security policies**
- B. Interviewing candidates for information security specialist positions
- C. Developing content for security awareness programs
- D. Approving access to critical financial systems

**Answer: A**

## NEW QUESTION # 264

As the new CISO at the company you are reviewing the audit reporting process and notice that it includes only detailed technical diagrams.

What else should be in the reporting process?

- A. Business charter
- B. Penetration test agreement
- C. Executive summary
- D. Names and phone numbers of those who conducted the audit

**Answer: C**
