Reliable Salesforce Data-Architect Exam Materials, Authorized Data-Architect Exam Dumps

With the help of performance reports of Salesforce Certified Data Architect (Data-Architect) Desktop practice exam software, you can gauge and improve your growth. You can also alter the duration and Salesforce Certified Data Architect (Data-Architect) questions numbers in your practice tests. Questions of this Salesforce Certified Data Architect (Data-Architect) mock test closely resemble the format of the actual test. As a result, it gives you a feeling of taking the actual test.

Salesforce Certified Data Architect Sample Questions (Q177-Q182):

NEW QUESTION # 177

A custom pricing engine for a Salesforce customer has to be decided by factors with the following hierarchy:

State in which the customer is located

City in which the customer is located if available

Zip code In which the customer is located if available

Changes to this information should have minimum code changes

What should a data architect recommend to maintain this information for the custom pricing engine that is to be built in Salesforce?

- A. Maintain require pricing criteria in custom metadata types.
- B. Create a custom object to maintain the pricing criteria.
- C. Assign the pricing criteria within customer pricing engine.
- D. Configure the pricing criteria in price books.

Answer: A

NEW QUESTION # 178

Universal Containers (UC) manages Vehicle and Service History in Salesforce. Vehicle (Vehicle__c) and Service History (ServiceHistory__c) are both custom objects related through a lookup relationship.

Every week a batch synchronization process updates the Vehicle and Service History records in Salesforce. UC has two hours of migration window every week and is facing locking issues as part of the data migration process.

What should a data architect recommend to avoid locking issues without affecting performance of data migration?

- A. Change the lookup configuration to "Clear the value of this field" when lookup record is deleted.
- **B. Use Bulk API serial mode for data migration**
- C. Use Bulk API parallel mode for data migration
- D. Insert the order in another custom object and use Batch Apex to move the records to Service_Order__c object.

Answer: B

Explanation:

According to the official Salesforce guide¹, using Bulk API serial mode for data migration can help avoid locking issues by processing batches in a single thread. This mode ensures that batches are processed in the order they are received and that only one batch is processed at a time. This reduces the risk of lock contention and deadlocks, especially when updating parent and child records in a lookup relationship. Option B is the correct answer because it suggests using Bulk API serial mode for data migration. Option A is incorrect because using Bulk API parallel mode for data migration can cause locking issues by processing batches in multiple threads. This mode does not guarantee the order of batch processing and can result in concurrent updates to the same records, which can lead to lock contention and deadlocks. Option C is incorrect because inserting the order in another custom object and using Batch Apex to move the records to Service_Order__c object adds unnecessary complexity and overhead to the data migration process. Option D is incorrect because changing the lookup configuration to "Clear the value of this field" when lookup record is deleted does not address the locking issues caused by data migration, but rather by record deletion.

NEW QUESTION # 179

Developers at Universal Containers need to build a report for the business which displays Accounts opened in the past year grouped by industry. This report will also include information from contacts, opportunities, and orders. There are several million Accounts in the system. Which two options should be recommended to make this report perform well and satisfy the business need?

- **A. Use an indexed data field with bounded data filters.**
- B. Use unbounded date ranges to filter the report.
- C. Use triggers to populate denormalized related fields on the Account.
- **D. Use Formula fields to surface information I related entities on the report.**

Answer: A,D

Explanation:

Using an indexed data field with bounded data filters can improve the report performance by making the query more selective and reducing the number of records to scan. Using formula fields to surface information from related entities on the report can also enhance the report performance by avoiding joins and complex calculations

NEW QUESTION # 180

Universal Containers (UC) has a Salesforce org with multiple automated processes defined for group membership processing. UC also has multiple admins on staff that perform manual adjustments to the role hierarchy. The automated tasks and manual tasks overlap daily, and UC is experiencing "lock errors" consistently.

What should a data architect recommend to mitigate these errors?

- A. Remove SOQL statements from Apex Loops.
- **B. Enable granular locking.**
- C. Ask Salesforce support for additional CPU power.
- D. Enable sharing recalculations.

Answer: B

Explanation:

Enabling granular locking (option A) is the best recommendation to mitigate these errors, as it allows finer control over how records are locked during automated or manual processes, and reduces the chances of lock contention or deadlock. Removing SOQL

statements from Apex Loops (option B) is a good practice for improving performance and avoiding governor limits, but it does not directly address the lock errors issue. Enabling sharing recalculations (option C) is also not relevant for this issue, as it is used to update sharing rules and recalculate access for records. Asking Salesforce support for additional CPU power (option D) is also not a viable solution, as it does not solve the root cause of the lock errors.

NEW QUESTION # 181

Northern Trail Outfitters (NTO) has multiple Salesforce orgs based on regions. Users need read-only access to customers across all Salesforce orgs.

Which feature in Salesforce can be used to provide access to customer records across all NTO orgs?

- A. Federated Search
- B. Salesforce 2 Salesforce
- C. Salesforce Connect
- D. External APIs

Answer: C

Explanation:

Salesforce Connect is a feature that allows users to access data from external sources and multiple Salesforce orgs, using either clicks or code. Salesforce Connect can provide read-only access to customer records across all NTO orgs, without replicating or storing the data in Salesforce.

NEW QUESTION # 182

.....

Nowadays, using electronic materials to prepare for the exam has become more and more popular, so now, you really should not be restricted to paper materials any more, our electronic Data-Architect exam torrent will surprise you with their effectiveness and usefulness, and the pass rate of Data-Architect Practice Test is high as 98% to 100%. I can assure you that you will pass the exam as well as getting the related certification under the guidance of our training materials Data-Architect as easy as pie.

Reliable Data-Architect Exam Materials: <https://www.testbraindump.com/Data-Architect-exam-prep.html>

As the leader in this career, we always adhere to the principle of "mutual development and benefit", and we believe our Data-Architect practice materials can give you a timely and effective helping hand whenever you need in the process of learning. Salesforce Study Data-Architect Demo Last but not least, our worldwide service after-sale staffs will provide the most considerable and comfortable feeling for you in twenty-four hours a day, as well as seven days a week incessantly, The person who pass the Data-Architect exam can not only obtain a decent job with a higher salary, but also enjoy a good reputation in this industry.

After the sending process has completed, the line can be closed, To help you pass the Data-Architect exam is our goal, As the leader in this career, we always adhere to the principle of "mutual development and benefit", and we believe our Data-Architect practice materials can give you a timely and effective helping hand whenever you need in the process of learning.

Types of TestBraindumpSalesforce Data-Architect Exam Questions

Last but not least, our worldwide service after-sale staffs will provide Data-Architect the most considerable and comfortable feeling for you in twenty-four hours a day, as well as seven days a week incessantly.

The person who pass the Data-Architect exam can not only obtain a decent job with a higher salary, but also enjoy a good reputation in this industry, Make sure that you are buying our bundle Data-Architect braindumps pack so you can check out all the products that will help you come up with a better solution.

You can free download part of Data-Architect simulation test questions and answers of Data-Architect exam dumps and print it, using it when your eyes are tired.
