In order to gain the certification quickly, people have bought a lot of study materials, but they also find that these materials don't suit for them and also cannot help them. If you also don't find the suitable Plat-Arch-203 test guide, we are willing to recommend that you should use our study materials. Because our products will help you solve the problem, it will never let you down if you decide to purchase and practice our Plat-Arch-203 latest question.

Salesforce Plat-Arch-203 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Security and Compliance	25%	- Security Best Practices 1. Given a scenario, recommend security controls to protect identity and access solutions 2. Describe how to audit and monitor identity-related activities 3. Describe the security capabilities of the Salesforce Platform related to identity and access management
		- Access Management Best Practices 1. Describe the risks that Two-Factor Authentication mechanisms aim to mitigate 2. Given a scenario, identify the risks and mitigation strategies that session security and Two-Factor Authentication enable (High Assurance Sessions, 2FA, etc.) 3. Given a scenario, determine the most appropriate Two-Factor Authentication mechanism for an identity solution
Topic 2: Access Management	30%	- Community (Partner and Customer) 1. Describe the capabilities and limitations of identity verification for external users 2. Describe the role of community licenses in identity and access management 3. Given a scenario, recommend the appropriate authentication mechanism for community users 4. Given a scenario, determine the appropriate method for provisioning external users (self-registration, just-in-time, etc.)
		- Salesforce Identity 1. Describe the role(s) Identity Connect plays in an Identity Management solution 2. Given a scenario, recommend the most appropriate Salesforce license type(s) to support the identity requirements

Topic 3: Identity and Single Sign-On 30%	- Accepting Third-Party Identity in Salesforce 1. Describe the components of a Delegated Authentication solution 2. Given a scenario, recommend the appropriate authentication mechanism when Salesforce needs to accept Third-Party Identity (Enterprise Directory, Social, Community, etc.) 3. Given a scenario, recommend the appropriate method of SAML initiation to fulfill the requirements (SP-init, IdP-init) 4. Describe the components of an identity management solution where Salesforce is accepting identity from a third party 5. Describe the risks of implementing delegated authentication - Salesforce as an Identity Provider 1. Describe the various implementation concepts of OAuth (scopes, secrets, tokens, refresh tokens, token expiration, token revocation, etc.) 2. Given a scenario, recommend the Salesforce technologies that should be used to provide identity to the third-party system (Canvas, Connected Apps, App Launcher, etc.) 3. Describe the role(s) Connected Apps play when Salesforce needs to provide identity to a third-party system 4. Given a scenario, determine the most appropriate flow type to recommend when implementing an OAuth solution where Salesforce is providing identity to a third party (User-Agent, Web Server, JWT, etc.)
	- Identity Management Concepts 1. Describe common authentication patterns and understand the differences between each one 2. Given a scenario, troubleshoot common points of failure that may be encountered in a single sign-on (SSO) solution (SAML, OAuth, etc.) 3. Describe the building blocks that are part of an identity solution (authentication, authorization, and accountability) and how you enable those building blocks using Salesforce features 4. Given a scenario, recommend the appropriate method for provisioning users in Salesforce 5. Describe how trust is established between two systems
	- Identity Integration Concepts 1. Given a scenario, recommend the appropriate integration approach for identity solutions 2. Describe the role of My Domain in identity and access management 3. Given a scenario, recommend the appropriate federation strategy 4. Describe how to integrate Salesforce with external identity providers and directories

Salesforce Certified Platform Identity and Access Management Architect Sample Questions (Q191-Q196):

NEW QUESTION # 191

Universal Containers (UC) employees have Salesforce access from restricted IP ranges only, to protect against unauthorised access. UC wants to roll out the Salesforce1 mobile app and make it accessible from any location. Which two options should an Architect recommend? Choose 2 answers

- A. Relax the IP restriction with a second factor in the Connect App settings for Salesforce1 mobile app.

- B. Remove existing restrictions on IP ranges for all types of user access.
- C. Use Login Flow to bypass IP range restriction for the mobile app.
- D. Relax the IP restrictions in the Connect App settings for the Salesforce1 mobile app.

Answer: A,D

NEW QUESTION # 192

A manufacturer wants to provide registration for an Internet of Things (IoT) device with limited display input or capabilities. Which Salesforce OAuth authorization flow should be used?

- A. OAuth 2.0 Asset Token Flow
- B. OAuth 2.0 User-Agent Flow
- C. OAuth 2.0 Device Flow
- D. OAuth 2.0 JWT Bearer Flow

Answer: C

NEW QUESTION # 193

The CIO of Universal Containers (UC) wants to start taking advantage of the refresh token capability for the UC applications that utilize OAuth 2.0. UC has listed an architect to analyze all of the applications that use OAuth flows to see where refresh tokens can be applied. Which two OAuth flows should the architect consider in their evaluation? Choose 2 answers

- A. Username-password
- B. Web server
- C. JWT bearer token
- D. User-Agent

Answer: B,D

NEW QUESTION # 194

Universal Containers (UC) is successfully using Delegated Authentication for their Salesforce users. The service supporting Delegated Authentication is written in Java. UC has a new CIO that is requiring all company Web services be RESTful and written in .NET. Which two considerations should the UC Architect provide to the new CIO? Choose 2 answers

- A. Delegated Authentication will continue to work with REST services.
- B. Delegated Authentication will continue to work with a .NET service.
- C. Delegated Authentication will not work with REST services.
- D. Delegated Authentication will not work with a .NET service.

Answer: B,C

NEW QUESTION # 195

Universal Containers (UC) has built a custom time tracking app for its employees. UC wants to leverage Salesforce Identity to control access to the custom app.

At a minimum, which Salesforce license is required to support this requirement?

- A. Identity Connect
- B. Identity Verification
- C. Identity Only
- D. External Identity

Answer: C

NEW QUESTION # 196
