Do you feel Archer Archer-Expert exam preparation is tough? Real4test desktop and web-based online Archer Archer-Expert practice test software will give you a clear idea about the final Archer-Expert Test Pattern. Practicing with the Archer Archer-Expert practice test, you can evaluate your Archer Archer-Expert exam preparation.

In order to meet the different demands of the different customers, these experts from our company have designed three different versions of the Archer-Expert reference guide. All customers have the right to choose the most suitable version according to their need after buying our study materials. The PDF version of the Archer-Expert exam prep has many special functions, including download the demo for free, support the printable format and so on. We can make sure that the PDF version of the Archer-Expert Test Questions will be very convenient for all people. Of course, if you choose our study materials, you will have the chance to experience our PDF version.

## 2026 Pass-Sure Archer-Expert: Archer Certified Administrator-Expert Braindump Pdf

We know students run on low budgets so we made every possible effort to reduce the pre-purchase doubts. You can easily avail of our product at an affordable price. We are aware that the syllabus of Archer-Expert exam is extremely dynamic and changes with

incoming updates, so we also offer you updates for free after purchase for 1 year. We assure you in every possible way that our Archer Archer-Expert Exam Preparation material is the most reliable there is.

## Archer Certified Administrator-Expert Sample Questions (Q70-Q75):

### NEW QUESTION # 70

Which of the following is true about the report content in a Scheduled Report Distribution?

- **A. Content in the attached report depends on the access rights of the administrator who built the Scheduled Report Distribution.**
- B. Content in the attached report depends on the access rights of the user who created the report.
- C. Content in the attached report varies based on access rights granted to the recipient.
- D. Content in the attached report will be updated in the recipient's inbox with real-time data.

**Answer: A**

Explanation:

Scheduled Report Distributions behave differently than standard "On-Demand" reports. According to the Archer Administration II curriculum, when a report is scheduled for distribution (e.g., emailed as a PDF or Excel file), the Archer platform must "impersonate" a user to run the query and generate the file.

The platform uses the security context of the user who configured the Scheduled Report Distribution (typically an administrator). This means that all recipients of the email will see the exact same data—the data that the administrator is authorized to see. This is a critical security consideration: if an administrator has

"System Administrator" rights and schedules a report for a group of low-privilege users, those users may see sensitive data in the attachment that they would not be able to see if they logged into Archer directly. Option B is incorrect because the system does not run a separate query for every individual recipient's unique permissions at the time of the email burst.

### NEW QUESTION # 71

Which statement best describes the advantages of using SSO in Archer?

- **A. All these answers are correct**
- B. Reduced Password Fatigue and Help Desk Costs
- C. Improved Security
- D. Increased Productivity

**Answer: A**

Explanation:

According to the Archer Administration and Security documentation, Single Sign-On (SSO) integration provides a multi-faceted advantage for both the end-user and the system administrator. Reduced Password Fatigue occurs because users no longer need to remember unique credentials for Archer, which directly leads to a decrease in Help Desk Costs associated with password reset requests. Increased Productivity is achieved through seamless access; users can move from their workstation or corporate portal directly into Archer without the interruption of a manual login prompt.

+1

Furthermore, Improved Security is a primary driver for SSO. By leveraging centralized authentication providers (like Active Directory via SAML 2.0 or Windows Integrated Authentication), Archer administrators ensure that corporate password policies (complexity, rotation, and MFA) are strictly enforced. When an employee leaves the organization and their account is disabled in the central directory, their access to Archer is revoked instantaneously. This eliminates the risk of "orphan accounts" existing within the Archer user database. Therefore, because SSO addresses administrative overhead, user experience, and enterprise-grade security protocols simultaneously, "All these answers are correct" is the verified professional standard.

### NEW QUESTION # 72

Advanced Workflow Actions by E-Mail will allow users to do which of the following?

- A. Complete simple drop-down menus for data entry before selecting the workflow action to move a record to the next stage of a workflow.
- **B. Complete simple actions using buttons in the email body to move a record through a workflow and append the text typed in the email body to the Workflow Action History field.**
- C. Add a workflow comment then use action buttons in the email body to move a record through a workflow.

- D. Complete simple actions using buttons in the email body to move a record through a workflow.

**Answer: B**

Explanation:

Actions by E-mail (ABE) is a feature designed to allow executives and busy stakeholders to progress a workflow without logging into the Archer UI. According to the Advanced Workflow Beyond the Basics course, ABE notifications include specific "action buttons" (e.g., Approve, Reject, Needs More Info).

When a user clicks a button, a new email is generated with a unique encoded string. If the user types a message in that reply email, the Archer Mail Processing Service parses the response. It not only moves the record to the next node based on the button clicked but also captures any text the user typed and appends it to the Workflow Action History (or a designated "Comments") field. This ensures that the rationale for the decision is audited within the record. Option A is incomplete because it ignores the comment-capturing capability, and Option C is incorrect because ABE does not support complex UI elements like drop-down menus within the email client.

### NEW QUESTION # 73

When importing data through the Data Import Wizard, if you choose the Import Type as "Update Existing Records", which of the following is true?

- A. Matching records will be updated and unmatched records will be discarded.
- B. A number of the matching records will be updated.
- C. Matching records will be discarded and unmatched records will be added as new records.
- D. Matching records will be updated and unmatched records will be added as new records.

**Answer: A**

### NEW QUESTION # 74

Failed user login, Access Role Created and Deleted, and password change by user events are viewed in:

- A. Locked Accounts Report
- B. Access Control Rights by Role Report
- C. Security Events Report

**Answer: C**

Explanation:

The Security Events Report is the primary auditing tool for tracking administrative and sensitive user actions within the Archer platform. According to the Archer Administration II curriculum, this report captures a broad spectrum of "event-based" security data that standard access reports do not cover.

Specifically, it logs every failed login attempt, which is critical for identifying potential brute-force attacks.

It also tracks metadata changes to the security infrastructure, such as when an Access Role is created or deleted, providing an audit trail of who modified the system's permissions. Furthermore, it records password changes initiated by users. While the "Locked Accounts Report" (Option B) only shows users currently barred from the system, the Security Events Report provides the historical context of why those events occurred. It is an essential resource for compliance officers and system auditors to ensure that the integrity of the Archer environment's security configuration remains intact.

### NEW QUESTION # 75
