

# 3V0-24.25 Test Questions Pdf & 2026 Realistic VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Certification Sample Questions Pass Guaranteed Quiz

CALIFORNIA STANDARDS TEST GRADE

**Released Test Questions** **Math** **5**

---

**1** What is 6050.287 rounded to the nearest ten?  
 A 6050  
 B 6100  
 C 6050.29  
 D 6050.3

---

**2** The total land area for the United States is 3,537,438 square miles. What is this value rounded to the nearest thousand square miles?  
 A 3,500,000  
 B 3,537,000  
 C 3,538,000  
 D 3,540,000

---

**3** What is 40% of 250?  
 A 50  
 B 100  
 C 150  
 D 200

---

**4** What is  $\frac{3}{8}$  written as a percent?  
 A 26.7%  
 B 30%  
 C 37.5%  
 D 50%

---

**5** What is the decimal 0.7 written as a fraction?  
 A  $\frac{1}{7}$   
 B  $\frac{3}{4}$   
 C  $\frac{3}{7}$   
 D  $\frac{7}{10}$

---

**6** A company donated 200 books to a local library. If 70 of them are fiction, what percent of the donated books are fiction?  
 A 35%  
 B 40%  
 C 60%  
 D 65%

---

**7** In a parking lot, 1 out of every 8 cars is blue. What percent of the cars in this lot are blue?  
 A 1.25%  
 B 7%  
 C 9%  
 D 12.5%

DOWNLOAD the newest DumpsQuestion 3V0-24.25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1l2EOojXSfGDggYSZUZc4pUaQGAoE4RIS>

With 3V0-24.25 test answers, you are not like the students who use other materials. As long as the syllabus has changed, they need to repurchase new learning materials. This not only wastes a lot of money, but also wastes a lot of time. Our industry experts are constantly adding new content to 3V0-24.25 test dumps based on constantly changing syllabus and industry development breakthroughs. All the language used in 3V0-24.25 Study Materials is very simple and easy to understand. With 3V0-24.25 test answers, you don't have to worry about that you don't understand the content of professional books. You also don't need to spend expensive tuition to go to tutoring class. 3V0-24.25 test dumps can help you solve all the problems in your study.

DumpsQuestion Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) questions are regularly updated to ensure it remains aligned with the VMware 3V0-24.25 latest exam content. With access to the updated dumps, you can be confident that you always get 3V0-24.25 updated questions that are necessary to succeed in your 3V0-24.25 Exam and achieve VMware certification. Furthermore, DumpsQuestion offers 1 year's worth of free 3V0-24.25 exam questions updates. This valuable inclusion ensures that 3V0-24.25 candidates have access to the latest 3V0-24.25 exam dumps, even after their initial purchase.

## 3V0-24.25 Certification Sample Questions, 3V0-24.25 Test Book

In traditional views, the 3V0-24.25 practice materials need you to spare a large amount of time on them to accumulate the useful knowledge may appearing in the real 3V0-24.25 exam. However, our 3V0-24.25 learning questions are not doing that way. According to data from former exam candidates, the passing rate of our 3V0-24.25 learning material has up to 98 to 100 percent. There are adequate content to help you pass the exam with least time and money.

### VMware 3V0-24.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Plan and Design the VMware Solution: Covers evaluating the impact of load balancer sizing, namespace network options, and vSphere namespace architecture. It includes planning processes for enabling Supervisor clusters and implementing service mesh.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Install, Configure, Administrate the VMware Solution: Includes creating and managing Supervisor clusters, namespaces, zones, workloads, and add-on services. Also covers provisioning, scaling, updating VKS clusters, autoscalers, storage strategies, workload deployments, backup</li><li>restore, and editing YAML configurations.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Troubleshoot and optimize the VMware Solution: Focuses on diagnosing and resolving provisioning, connectivity, namespace, VM class, storage, networking, container, registry, and CA errors. It also includes recovering failed upgrades and optimizing cluster performance using monitoring and scaling tools.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>VMware Products and Solutions: Focuses on configuring vSphere Supervisor capabilities, networking, storage, identity, and access for Kubernetes clusters. It also covers managing Kubernetes releases, CNIs, NSX networking objects, TLS certificates, and securing VKS clusters.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>IT Architectures, Technologies, Standards: This section covers the differentiation between VMs and containers, helping determine the appropriate compute model. It also includes understanding Kubernetes architecture, networking, storage, service mesh, Helm, and reference architectures for VKS deployments.</li></ul>

### VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q17-Q22):

#### NEW QUESTION # 17

A Cloud Administrator needs to prepare a VKS environment for a "Private Cloud" deployment where all Kubernetes nodes must pull their system images (e.g., kube-proxy, coredns, antrea) from a central Harbor Registry instead of the internet.

Review the configuration snippet for the TkgServiceConfiguration (the global TKG configuration object):

```
apiVersion: run.tanzu.vmware.com/v1alpha1
```

```
kind: TkgServiceConfiguration
```

```
metadata:
```

```
name: tkg-service-configuration
```

```
spec:
```

```
defaultCNI: antrea
```

```
...
```

```
trust:
```

```
additionalTrustedCAs:
```

```
- name: harbor-ca-cert
```

```
data: LS0tLS1... (Base64)
```

```
imageRepository:
```

```
host: harbor.corp.local
```

```
caCertificate: LS0tLS1... (Base64)
```

What is the effect of configuring the imageRepository field in this spec? (Select all that apply.)

- A. It overrides the default upstream VMware registry location for all newly created TKG clusters.
- B. It instructs the Supervisor to rewrite the image manifests for system components (like CoreDNS) to point to harbor.corp.local instead of projects.registry.vmware.com

- C. It configures the TKG worker nodes to trust the CA certificate of the Harbor registry.
- D. It automatically copies/replicates the images from VMware Public Registry to harbor.corp.local.
- E. It forces all user workloads (Pods) to use this registry by default.

Answer: A,B,C

### NEW QUESTION # 18

The administrator has completed a proof of concept for using Harbor as a container registry part of the Supervisor services and you are tasked for cleaning up the environment, starting with the uninstall of the Harbor Supervisor service.

Drag and drop the four tasks into the correct order from Configuration Options on the left and place them into the Configuration Sequence on the right. (Choose four)

Answer:

Explanation:

- 1 - Deactivate the service.
- 2 - Confirm uninstallation.
- 3 - Delete the service.
- 4 - Confirm deletion.

### NEW QUESTION # 19

The vSphere Admin creates a vSphere Namespace harbor-project and grants the DevOps Engineer edit permissions. The DevOps Engineer deploys the Harbor service in this namespace with the command: `kubectl apply -f harbor-svc.yml`. The Harbor service deploys successfully, but the database data harbor database 0 pods does not come into a Running state.

Click the two locations where the administrator should verify the Access Modes for this pod's PersistentVolumeClaim (PVC). (Choose two.)

Answer:

Explanation:

Explanation:

Storage

Resources

When a stateful pod (like Harbor's database) is stuck Pending/ContainerCreating or repeatedly failing to attach /mount storage, one of the first checks is whether the PVC's Access Modes match what the workload and backing storage support (for example, ReadWriteOnce vs ReadWriteMany). In Kubernetes, the PVC and PV explicitly show Access Modes (for example Access Modes: RWO) when you inspect them.

In the vSphere Namespace UI, the Storage tab is where namespace storage is managed and reviewed (including storage policy assignments that back storage classes/PVCs), making it the natural place to validate the storage configuration being consumed by the Harbor database PVC. VMware's VCF documentation directs administrators to navigate to a namespace and use the Storage tab for storage-related settings.

The Resource tab is the Kubernetes-object oriented view for the namespace, where you can locate the PVC object associated with the failing pod and inspect its properties/YAML (including the requested storage class and access mode intent). Namespace permissions explicitly include the ability to view Kubernetes resources within the namespace, which aligns with checking PVC details there.

#### NEW QUESTION # 20

A VKS Administrator wants to Uninstall a Supervisor Service (e.g., a test instance of MinIO) to free up resources.

What is the impact of uninstalling a service on the Persistent Data associated with it (e.g., the MinIO buckets)?

- A. The Uninstall operation deletes the dedicated vSphere Namespace created for that service instance, which permanently deletes all Pods, Secrets, and Persistent Volumes (Data) contained within it.
- B. The data is archived to the Content Library.
- C. The data remains on the datastore as orphaned VMDKs.
- D. By default, the uninstall workflow deletes the Service Instance and its compute resources (Pods), but the Persistent Volume Claims (PVCs) and the underlying data are typically Retained (unless the specific service operator logic or a "Force Delete" option effectively purges them, but standard K8s practice for stateful sets often leaves PVCs to prevent accidental data loss). Self-Correction: In the vSphere Client workflow for Supervisor Services, "Remove" typically deletes the SupervisorService CR.

The behavior depends on the Operator managing it. However, vSphere often warns that data might be lost or asks. A key exam point is understanding that Uninstall removes the active logic. But usually, for Supervisor Services specifically, it cleans up the namespace created for the service instance.

- E. The service is paused, but data is kept.

Answer: A

#### NEW QUESTION # 21

A Security Architect is designing a vSphere with Tanzu environment using NSX Networking. The requirement is to implement NSX VPCs (Virtual Private Clouds) to provide hard multi-tenancy and self-service networking for development teams.

Context:

The "Finance" team needs a dedicated network space where they can create their own subnets, ACLs, and load balancers without impacting the "HR" team.

Which configuration steps are required to enable this NSX VPC capability for the Finance team? (Select all that apply.)

- A. The developers use kubectl to create NetworkPolicy resources, which NSX automatically converts into VPC segments.
- B. The Finance team's Namespace must be configured to use a specific Tier-0 Gateway that supports VPCs.
- C. Create an NSX Project in NSX Manager and associate it with the Finance team's vSphere Namespace.
- D. The administrator must pre-create logical switches in vCenter and assign them to the Namespace.
- E. The Supervisor Cluster must be configured with NSX Networking (not VDS).

Answer: C,E

## NEW QUESTION # 22

.....

All-in-One Exam Guide Practice To your 3V0-24.25 Exam. To meet this objective DumpsQuestion is offering valid, updated, and real 3V0-24.25 exam practice test questions in their formats.. Download 3V0-24.25 study guide pdf, pass Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service exam with full refund guarantee! Success VMware exam with 3V0-24.25 Exam Questions which has high pass rate. Use free 3V0-24.25 certification questions to gain a good test result.
