1Z0-083 New Braindumps Free - Realistic Oracle Database Administration II 100% Pass Quiz

The majority of people encounter the issue of finding extraordinary Oracle 1Z0-083 exam dumps that can help them prepare for the actual Oracle 1Z0-083 Exam. They strive to locate authentic and up-to-date Oracle 1Z0-083 practice questions for the Oracle Database Administration II exam, which is a tough ask.

Oracle Database Administration II Exam covers a wide range of topics related to Oracle database administration, including database backup and recovery, database security, database performance tuning, and managing Oracle Grid Infrastructure. Candidates are expected to have a deep understanding of the Oracle database architecture, as well as hands-on experience in managing and maintaining Oracle databases. 1Z0-083 Exam consists of 85 multiple-choice questions and must be completed within 2.5 hours.

Understanding functional and technical aspects of Oracle Database Administration II Exam Number: 1Z0-083

The following will be discussed in the ORACLE 1Z0-083 exam dumps:

- Configure and using an RMAN recovery catalog
- Employ the best Oracle Database recovery technology for your failure situation
- Configuring and using RMAN - Oracle Database: Backup and Recovery Workshop
- Configure your Database to support Flashback
- Detect and repair database and database block corruption
- Restore and Recovery Concepts - Oracle Database: Backup and Recovery Workshop
- Diagnosing Database Issues

- Describe and use Recovery technology for Crash, Complete, and Point-in-time recovery
- Duplicate Databases
- Duplicating a Database - Oracle Database: Backup and Recovery Workshop
- Perform flashback operations
- Using Flashback Technologies - Oracle Database: Backup and Recovery Workshop

To prepare for the Oracle 1Z1-083 exam, candidates need to have a thorough understanding of Oracle database administration concepts and practical experience in managing Oracle databases. They can use a variety of resources such as Oracle documentation, online training courses, and practice exams to supplement their knowledge and skills.

Oracle Database Administration II Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which two are true about reclaiming space used by Flashback logs in Oracle Database 19c and later releases? (Choose two.)

- **A. Space is always reclaimed proactively before space pressure occurs.**
- B. Space is only reclaimed when there is space pressure in the Fast Recovery Area. (FRA)
- **C. Space is always reclaimed automatically when the retention period for Flashback logs is lowered.**
- D. Space might be reclaimed automatically when the retention period for Flashback logs is lowered.
- E. Space might be reclaimed proactively before space pressure occurs.

Answer: A,C

Explanation:

The COMPATIBLE initialization parameter must be set to 19.0.0 or higher.

Oracle Database monitors flashback logs in the fast recovery area and automatically deletes flashback logs that are beyond the retention period. When the retention target is reduced, flashback logs that are beyond the retention period are deleted immediately. In scenarios where a sudden workload spike causes a large number of flashback logs to be created, the workload is monitored for a few days before deleting flashback logs that are beyond the retention period. This avoids the overhead of recreating the flashback logs, if another peak workload occurs soon after.

NEW QUESTION # 38

Choose three. Which three are true about cloning databases into an existing CDB with RMAN?

- A. Two or more PDBs can be cloned with the same command.
- B. The target and auxiliary instance passwords must be the same.
- C. A non-CDB can be cloned into a PDB.
- **D. A user with SYSDBA or SYSBKUP must be logged in with RMAN to the non-CDB being cloned when cloning a non-CDB.**
- **E. Only one PDB can be cloned at a time.**
- **F. A user with SYSDBA or SYSBKUP must be logged in with RMAN to CDB\$ROOT when cloning a PDB.**

Answer: D,E,F

NEW QUESTION # 39

Choose the best answer. Which statement correctly describes the SQL profiling performed by the SQL Tuning Advisor?

- A. It is auxiliary information collected by the optimizer for a SQL statement to help use better joins orders.
- B. It is a set of recommendations by the optimizer to create new indexes.
- C. It is auxiliary information collected by the optimizer for a SQL statement to eliminate estimation error.
- **D. It is a set of recommendations by the optimizer to change the access methods used.**
- E. It is a set of recommendations by the optimizer to restructure a SQL statement to avoid suboptimal execution plans.

Answer: D

NEW QUESTION # 40

Which two are true about memory advisors? (Choose two.)

- A. If Automatic Shared Memory Management is enabled, both the SGA Advisor and PGA Advisor are always available.
- B. If Automatic Memory Management is enabled, no memory advisors are available.
- C. If Automatic Memory Management is enabled, the Shared Pool Advisor and Buffer Cache Advisor are available to set the maximum size for these individual System Global Area components.
- D. All memory advisors use data from Automatic Workload Repository.
- E. If Manual Shared Memory Management is enabled, only the Shared Pool Advisor and Buffer Cache Advisor are available.

Answer: A,D
