

AIGP赤本勉強、AIGP試験勉強過去問

無料でクラウドストレージから最新のJpexam AIGP PDFダンプをダウンロードする: <https://drive.google.com/open?id=1zYfyI22zGnPPJz774PBhovIDF5DDYGI>

高賃金の仕事には、優れた労働能力と深い知識が必要です。AIGP試験に合格すると、夢の仕事を見つけるのに役立ちます。最高のAIGP質問トレントをクライアントに提供します。IAPP受験者がAIGP試験に簡単に合格できることを目指しています。私たちが提供するAIGP学習教材は合格率とヒット率を高めるためのものです。準備と確認に少し時間をかけるだけで、AIGP試験に合格できます。時間と労力はほとんどかかりません。ソフトウェアを無料でダウンロードして、購入する前に試用できます。

さまざまな電子デバイスを通じてAIGPガイド資料を使用できます。自宅ではコンピューターを使用でき、外では電話も使用できます。AIGP学習教材を学ぶために携帯電話を使用する人が増えているので、好きなものを選択することもできます。利点の1つは、ネットワーク環境でAIGP練習問題を初めて使用する場合、次回教材を使用するときにネットワーク要件がなくなることです。いつでもどこでもAIGP本物の試験を開くことができます。

完璧なAIGP赤本勉強 & 優秀なIAPP 認定トレーニング - 素晴らしい IAPP IAPP Certified Artificial Intelligence Governance Professional

AIGPの学習教材は、テストの迅速な合格に役立ちます。認証を利用できます。多くの人が、AIGP試験問題の助けを借りて、日々の仕事でより効率的に行動する能力を向上させています。弊社のAIGP学習教材を選択すると、あなたの夢がより明確に提示されます。次に、私の紹介を通じて、AIGP学習クイズをより深く理解していただければ幸いです。AIGPの学習教材が試験に合格するための手助けになることを本当に願っています。

IAPP AIGP 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.

トピック 2	<ul style="list-style-type: none"> • Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
トピック 3	<ul style="list-style-type: none"> • Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.
トピック 4	<ul style="list-style-type: none"> • Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.

IAPP Certified Artificial Intelligence Governance Professional 認定 AIGP 試験問題 (Q163-Q168):

質問 # 163

What is the primary purpose of an AI impact assessment?

- A. To anticipate and manage the potential risks and harms of an AI system.
- B. To define and evaluate the legal risks associated with developing an AI system.
- C. To identify and measure the benefits of an AI system.
- D. To define and document the roles and responsibilities of AI stakeholders.

正解: A

解説:

The primary purpose of an AI impact assessment is to proactively anticipate and manage the potential risks and harms associated with deploying an AI system.

質問 # 164

A company deploys an AI model for fraud detection in online transactions. During its operation, the model begins to exhibit high rates of false positives, flagging legitimate transactions as fraudulent. Which is the best step the company should take to address this development?

- A. Dedicate more resources to monitor the model.
- B. Deactivate the model until an assessment is made.
- C. Maintain records of all false positives.
- D. Conduct training for customer service teams to handle flagged transactions.

正解: B

解説:

Temporarily deactivating the model prevents further operational issues and allows a thorough assessment and retraining to reduce false positives before redeployment.

質問 # 165

CASE STUDY

Please use the following answer the next question:

Good Values Corporation (GVC) is a U.S. educational services provider that employs teachers to create and deliver enrichment courses for high school students. GVC has learned that many of its teacher employees are using generative AI to create the enrichment courses, and that many of the students are using generative AI to complete their assignments.

In particular, GVC has learned that the teachers they employ used open source large language models ("LLM") to develop an online tool that customizes study questions for individual students. GVC has also discovered that an art teacher has expressly incorporated the use of generative AI into the curriculum to enable students to use prompts to create digital art.

GVC has started to investigate these practices and develop a process to monitor any use of generative AI, including by teachers and students, going forward.

Which of the following risks should be of the highest concern to individual teachers using generative AI to ensure students learn the course material?

- A. Copyright infringement.
- **B. Model accuracy.**
- C. Financial cost.
- D. Technical complexity.

正解: B

解説:

The highest concern for individual teachers using generative AI to ensure students learn the course material is model accuracy.

Ensuring that the AI-generated content is accurate and relevant to the curriculum is crucial for effective learning. If the AI model produces inaccurate or irrelevant content, it can mislead students and hinder their understanding of the subject matter.

Reference: According to the AIGP Body of Knowledge, one of the core risks posed by AI systems is the accuracy of the data and models used. Ensuring the accuracy of AI-generated content is essential for maintaining the integrity of the educational material and achieving the desired learning outcomes.

質問 # 166

A company developing and deploying its own AI model would perform all of the following steps to monitor and evaluate the model's performance EXCEPT?

- A. Setting up automated tools to regularly track the model's accuracy, precision and recall rates in real-time.
- **B. Publicly disclosing data with forecasts of secondary and downstream harms to stakeholders.**
- C. Implementing a formal incident response plan to address incidents that may occur during system operation.
- D. Establishing a regular schedule for human evaluation of the model's performance, including qualitative assessments.

正解: B

解説:

While transparency is encouraged, publicly disclosing forecasts of secondary harms is not a required or standard practice for internal performance evaluation. Risk assessments and reporting typically remain internal or shared with regulators.

From the AI Governance in Practice Report 2025:

"Organizations must assess secondary risks... but disclosure is subject to context, regulatory requirements, and risk management discretion." (p. 30)

質問 # 167

The best practice to manage third-party risk associated with AI systems is to create and implement policies that?

- A. Focus on the technical aspects of AI systems, such as data security, while ethical risks are addressed through suitable contracts.
- B. Focus on the financial stability of third-party vendors as the primary criterion for risk assessment.
- **C. Provide for an appropriate level of due diligence and ongoing monitoring based on the defined risk.**
- D. Require third-party AI systems to undergo a comprehensive audit by an external cybersecurity firm every six months.

正解: C

* Dinappropriately separates ethical and technical risks; both must be evaluated holistically.
