

# Cisco 800-150 Test Discount | Test 800-150 Preparation

BONUS!!! Download part of VCEEngine 800-150 dumps for free: [https://drive.google.com/open?id=1CPTv\\_6GWZd1vO4yBXmCoCwGz\\_AOc44JO](https://drive.google.com/open?id=1CPTv_6GWZd1vO4yBXmCoCwGz_AOc44JO)

However, when asked whether the Cisco latest dumps are reliable, customers may be confused. For us, we strongly recommend the 800-150 exam questions compiled by our company, here goes the reason. On one hand, our 800-150 test material owns the best quality. When it comes to the study materials selling in the market, qualities are patchy. But our 800-150 test material has been recognized by multitude of customers, which possess of the top-class quality, can help you pass exam successfully. On the other hand, our 800-150 Latest Dumps are designed by the most experienced experts, thus it can not only teach you knowledge, but also show you the method of learning in the most brief and efficient ways.

Everyone has the right to pursue happiness and wealth. You can rely on the 800-150 certificate to support yourself. If you do not own one or two kinds of skills, it is difficult for you to make ends meet in the modern society. After all, you can rely on no one but yourself. At present, our 800-150 study materials can give you a ray of hope. You can get the 800-150 certification easily with our 800-150 learning questions and have a better future.

## Test 800-150 Preparation | Latest 800-150 Guide Files

The 800-150 prep torrent we provide will cost you less time and energy. You only need relatively little time to review and prepare. After all, many people who prepare for the 800-150 exam, either the office workers or the students, are all busy. The office workers are both busy in their jobs and their family life and the students must learn or do other things. But the 800-150 Test Prep we provide are compiled elaborately and it makes you use less time and energy to learn and provide the study materials of high quality and seizes the focus the exam. It lets you master the most information and costs you the least time and energy.

## Cisco 800-150 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Cisco Infrastructure and Collaboration Infrastructure: This section of the exam measures the skills of a Collaboration Engineer and focuses on Cisco infrastructure devices, endpoints, and collaboration technologies. It introduces network devices, collaboration endpoints like IP phones and video systems, and explains on-premises collaboration deployments using tools like Cisco Unified Communications Manager. It also covers how video systems integrate into collaboration environments and highlights Cisco's cloud services for enterprise communication, including Webex Meetings, Webex Teams, and hosted collaboration solutions.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Cisco Software: This section of the exam measures the skills of a Network Engineer and discusses Cisco's software systems and licensing. It explains the difference between IOS install and bundle modes and gives an overview of different licensing models. Students learn how to manage Cisco software images, including backing up, transferring, and installing images via FTP, TFTP, or USB. It also covers how to handle configuration files to keep devices running properly and ensure smooth upgrades or replacements.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Networking Foundations: This section of the exam measures the skills of a Network Engineer and covers the basic building blocks of computer networking. It explains different types of networks like local area networks and wireless networks, and introduces lightweight wireless LANs. It describes the layers of communication models like the OSI model and TCP</li> <li>IP stack, and explains how data moves across networks. It also discusses the physical cabling used in networks, such as Ethernet and fiber optics. Students will learn about network switching, IP addressing, subnetting, and routing at Layer 3. The section also introduces Cisco's campus network devices, data center switches, UCS servers, and collaboration devices, describing their roles and functions in the network.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Cisco UCS and Data Center Architecture: This section of the exam measures the skills of a Data Center Engineer and introduces Cisco's UCS and data center solutions. It explains the devices found in a data center, including switches, UCS servers, and director switches, and describes different server deployment models. Students will also learn about virtualization components like virtual machines, hypervisors, cloud computing concepts, and deployment models. The section covers how Cisco UCS devices fit into campus networks, edge locations, and data centers, and explains the key components and connections used in UCS architecture.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Cisco Hardware Replacement: This section of the exam measures the skills of a Technical Support Engineer and teaches how to safely and correctly replace Cisco hardware. It explains safety procedures such as creating safe work zones and handling electrostatic discharge. Students learn the step-by-step processes to replace a wide range of Cisco devices, from switches and routers to firewalls, UCS servers, and collaboration endpoints. It also covers configuring Cisco NX-OS software, including understanding operating modes, boot procedures, and password recovery, and introduces Cisco collaboration endpoint solutions like IP phones and video systems.</li> </ul>

## Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q89-Q94):

### NEW QUESTION # 89

Which management option is best suited for standalone Cisco Secure Firewall deployments?

- A. Cisco Defense Orchestrator
- B. Cisco Secure Firewall Management Center
- C. Cisco Secure Firewall Device Manager**
- D. Cisco Security Manager

**Answer: C**

**Explanation:**

For standalone Cisco Secure Firewall deployments, the Cisco Secure Firewall Device Manager (FDM) is the most appropriate management option. FDM is a browser-based, on-box management tool that allows administrators to configure and manage a single firewall device without the need for external management infrastructure. It provides an intuitive interface for basic configurations, policy management, and monitoring.

In contrast:

- \* Cisco Secure Firewall Management Center (FMC) is designed for centralized management of multiple firewall devices.
- \* Cisco Defense Orchestrator (CDO) is a cloud-based solution for managing security policies across various devices.
- \* Cisco Security Manager is an older platform primarily used for managing ASA devices.

#### NEW QUESTION # 90

What is the primary purpose of backing up the endpoint configuration prior to replacing the device?

- A. To restore settings on the new device after replacement
- B. To update the firmware of the device
- C. To generate a performance report for the old device
- D. To troubleshoot network connectivity issues

**Answer: A**

Explanation:

Backing up the configuration of a network device before replacement is a critical step to ensure business continuity and minimize downtime. The primary purpose of this backup is to restore the existing settings onto the new device, ensuring that it operates identically to the one being replaced.

This process includes preserving interface configurations, routing protocols, access control lists, and other essential parameters. By restoring the backed-up configuration to the new device, network administrators can quickly reintegrate it into the network infrastructure without the need for manual reconfiguration, thereby reducing the risk of errors and service disruptions.

Options A, B, and C do not align with the primary objective of configuration backups in the context of device replacement.

Reference: Supporting Cisco Devices for Field Technicians (FLDTEC) - Maintenance and RMA Procedures

#### NEW QUESTION # 91

Drag and drop the configuration tasks for restoring software from the left onto the corresponding commands on the right.

**Answer:**

Explanation:

Explanation:

These command associations are part of Cisco IOS essentials taught in FLDTEC's "Device Configuration and Verification" topic.

Here's how each command functions:

show running-config

Displays the active configuration stored in RAM.

This command is used to verify the current settings on a Cisco device.

copy running-config startup-config

Saves the current running configuration to NVRAM, ensuring the configuration persists after a reboot.

This is critical after making changes to device settings.

copy tftp: running-config

Loads a configuration from a TFTP server and applies it to the current running configuration.

Often used during remote device setup or restoration.

copy usbflash0:backup.cfg running-config

Restores a saved configuration file from a USB drive.

Useful in field operations where physical backup media is used during maintenance.

These tasks are routine for field technicians performing configuration backups, restorations, and diagnostics in Cisco environments.

#### NEW QUESTION # 92

Refer to the exhibit. What are two ways remote sites or branches connect to the enterprise campus network? (Choose two.)

- A. Access layer switches
- B. **WAN links**
- C. LAN core switches
- D. **IPsec VPN tunnels**
- E. Ad hoc Wi-Fi network

**Answer: B,D**

Explanation:

In enterprise networking, remote sites or branch offices connect to the central campus network using:

\* **WAN Links:** These are dedicated communication paths that connect geographically dispersed networks. WAN links can be leased lines, MPLS circuits, or other forms of long-distance connectivity that facilitate reliable data transmission between remote sites and the main campus.

\* **IPsec VPN Tunnels:** Internet Protocol Security (IPsec) VPNs provide secure, encrypted tunnels over the public internet, allowing remote sites to connect to the enterprise network securely. This method is cost-effective and widely used for connecting branch offices to the central network infrastructure.

Access layer switches (Option A) and LAN core switches (Option E) are components within a local network and do not facilitate remote connectivity. Ad hoc Wi-Fi networks (Option D) are temporary and lack the security and reliability required for enterprise-level remote connections.

#### NEW QUESTION # 93

Refer to the exhibit. Drag and drop the command names from the left onto the corresponding elements in the interface configuration mode command structure on the right.

**Answer:**

Explanation:

Explanation:

- \* Component to configure# interface
- \* Interface type# FastEthernet
- \* Port# 1
- \* Slot# 0

This command structure is part of the Device Configuration and Verification section in the FLDTEC course.

It teaches how to navigate and configure interfaces on Cisco devices using the IOS CLI:

- \* interface is the global configuration mode command to begin configuring a network interface.
- \* FastEthernet specifies the type of interface (could also be GigabitEthernet, Serial, etc.).

\* 0/1 represents the slot/port structure used on Cisco devices:

- \* The first digit (before the slash) is the slot number.
- \* The second digit (after the slash) is the port number within that slot.

This structure allows Cisco to modularly address interfaces, especially in devices with multiple slots or module-based configurations.

## NEW QUESTION # 94

.....

We cannot predicate the future but we can live in the moment. There are many meaningful things waiting for us to do. Try to immerse yourself in new experience. Once you get the Cisco 800-150 certificate, your life will change greatly. First of all, you will grow into a comprehensive talent under the guidance of our Supporting Cisco Devices for Field Technicians 800-150 Exam Materials, which is very popular in the job market.
