Microsoft Azure Administrator Sample Questions (Q347-Q352):

NEW QUESTION # 347

You have an Azure AD tenant named adatum.com that contains the groups shown in the following table.

Name	Member of
Group1	None
Group2	Group1
Group3	Group2

Adatum.com contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1
User3	Group3
User4	None

You assign the Azure AD Premium P2 license to Group 1 and User4.

Which users are assigned the Azure AD Premium P2 license?

- A. User1, User2, and User4 only
- B. User4 only
- C. User1 and User4 only
- D. User1, User2, User3, and User4

Answer: C

Explanation:

According to the Microsoft documentation, when you assign a license to a group, all members of that group are automatically assigned the license. However, if a user is already assigned the same license directly or through another group, the license is not duplicated.

In your scenario, you assigned the Azure AD Premium P2 license to Group1 and User4. This means that all members of Group1, which are User1 and User2, will also get the license. User4 will get the license directly.

User3 will not get the license because they are not a member of Group1 or assigned the license directly.

Therefore, the users who are assigned the Azure AD Premium P2 license are User1, User2, and User4 only.
