CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q17-Q22):

NEW QUESTION # 17

According to ISO/IEC 27001:2022 clause 4.3, what aspects must be considered when determining the scope of the Information

Security Management System?

- A. Threats and vulnerabilities
- **B. External and internal issues, and interfaces and dependencies**
- C. Assets and resources
- D. Risks and opportunities

Answer: B

Explanation:

Clause 4.3 of ISO/IEC 27001:2022 requires the organization to determine the boundaries and applicability of the ISMS. When determining the scope, the organization must consider the external and internal issues referred to in clause 4.1, the requirements referred to in clause 4.2, and interfaces and dependencies between activities performed by the organization and those performed by other organizations. Therefore, option D is the correct answer.

NEW QUESTION # 18

The information security policy must be known by:

- **A. Everyone in the organization**
- B. The quality management representative
- C. The IT Manager
- D. The IT Security Manager

Answer: A

Explanation:

ISO/IEC 27001:2022 requires the information security policy to be available as documented information, communicated within the organization, and available to interested parties as appropriate. In practical terms, this means the policy must be communicated to relevant persons in the organization so they understand the direction and expectations related to information security. Among the options provided, the best and correct answer is D, because the policy is intended to be known broadly across the organization, not restricted to a single role or department.

NEW QUESTION # 19

According to ISO/IEC 27001:2022, who is required to carry out the ISMS review to ensure its suitability, adequacy, and effectiveness?

- A. The external certification audit company
- B. Process owners
- C. The internal audit team
- **D. Top management**

Answer: D

Explanation:

The standard requires top management to review the ISMS at planned intervals. This review is intended to confirm the continuing suitability, adequacy, and effectiveness of the ISMS. While auditors, process owners, and certification bodies may provide inputs or findings, the management review itself is a responsibility of top management. Therefore, option D is the correct answer.

NEW QUESTION # 20

What details must be included in a Statement of Applicability?

- A. A list of the risks applicable to the organization
- **B. The necessary controls with justification for inclusion and exclusion**
- C. Evidence of top management authorization of the controls
- D. The information security policy

Answer: B

Explanation:

The Statement of Applicability is a documented result of the risk treatment process. It must include the necessary controls and justification for their inclusion, whether the controls are implemented, and justification for excluding controls from Annex A when they are not applicable. It does not need to be a list of risks, proof of management authorization, or the policy itself. Therefore, option C is correct.

NEW QUESTION # 21

According to ISO/IEC 27001:2022, is it necessary to formulate an information security risk treatment plan?

- A. None of the above
- **B. It is a requirement to be fulfilled**
- C. It is only an observation to keep in mind when auditing the management system
- D. It is a recommendation, but not a requirement

Answer: B

Explanation:

ISO/IEC 27001:2022 requires the organization to define and apply an information security risk treatment process and to prepare a risk treatment plan. This is a mandatory requirement within clause 6 on planning.

The purpose of the plan is to define how identified information security risks will be treated, which controls will be selected, and how the treatment decisions will be implemented. Therefore, it is not optional guidance or an audit note, but a formal requirement. For that reason, option B is correct.
