SAP C-ACDET-2506 Exam Syllabus Topics:

| Topic | Details |
|-------|---------|
| | |

| | |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation. |
| Topic 2 | <ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction. |
| Topic 3 | <ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices. |

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q32-Q37):

NEW QUESTION # 32

While working on a customer project, the customer asks if specific details can be captured and made available in reporting for a sourcing project or contract that doesn't fit the standard fields.

What is the recommended way to handle this scenario?

- **A. Create a dynamic form (dform) where common data can be synced with the project header through customization.**
- B. Create a Microsoft Form from the Actions menu for managing all the requirements.
- C. Suggest the customer put a word document on the template and capture all information in that document.
- D. Configure as many custom fields as possible for data capture purposes.

Answer: A

NEW QUESTION # 33

Custom partner bundles can be leveraged to share and apply baselines in which deployment scenario?

- **A. Greenfield**
- B. Brownfield
- C. Grayfield
- D. Bluefield

Answer: A

NEW QUESTION # 34

How can you make the attributes of a Flex Master Data field reportable?

- A. Create a custom reportable field and use a defaulting expression to set the value of the Flex Master Data attribute
- B. Flex Master Data objects automatically include all attributes as reportable without any additional configuration.
- C. Flex Master Data objects and their attributes cannot be made reportable
- **D. When the Flex Master Data Template is created, the attributes can be marked as reportable or not.**

Answer: D

Explanation:

When creating a Flex Master Data (FMD) template, you can specify which attributes are reportable by marking them accordingly during template setup. Only attributes marked as reportable will be accessible in reporting tools within SAP Ariba. While some users employ workarounds by creating custom fields with defaulting expressions to surface FMD attribute values, the direct and supported method is to configure reportability at the attribute level within the FMD template itself. This capability ensures efficient and accurate reporting without requiring complex custom fields or expressions.

NEW QUESTION # 35

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? Note: There are 3 correct answers to this question.

- A. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.
- B. Publish the form template within the test site in order to add the form fields in the package.
- C. Discard any other packages that appear in My Action Items.
- D. Make sure you update the string resource files in the production site before migrating the corresponding field configurations from test to production site.
- E. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.

Answer: A,D,E

NEW QUESTION # 36

Which of the following languages is used to define defaults on fields within Ariba?

- A. ABAP
- B. Javascript
- C. Python programming language
- D. Ariba expression language

Answer: D

NEW QUESTION # 37

.....
