# Latest C-IBP-2502 Exam Topics - C-IBP-2502 Valid Exam Sims

What's more, part of that FreePdfDump C-IBP-2502 dumps now are free: https://drive.google.com/open?id=1vWfqwUT-YdiyllbeabnpgN0uExfKfHTD

SAP certification C-IBP-2502 exam is one of the many IT employees' most wanting to participate in the certification exams. Passing the exam needs rich knowledge and experience. While accumulating these abundant knowledge and experience needs a lot of time. Maybe you can choose some training courses or training tool and spending a certain amount of money to select a high quality training institution's training program is worthful. FreePdfDump is a website which can meet the needs of many IT employees who participate in SAP Certification C-IBP-2502 Exam. FreePdfDump's product is a targeted training program providing for SAP certification C-IBP-2502 exams, which can make you master a lot of IT professional knowledge in a short time and then let you have a good preparation for SAP certification C-IBP-2502 exam.

SAP C-IBP-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Solution Architecture & Data Integration: his exam section is aimed at solution architects who work with SAP data integration. It covers the fundamental concepts of integrating external data sources with SAP, ensuring seamless data flow between systems. Candidates need to understand how to maintain system architecture for optimized performance and reliability.
Topic 2	• Planning Operators & Application: JobsThis section is designed for demand planners and focuses on the configuration and execution of planning operators and application jobs. It includes an understanding of how these tools automate planning processes and improve system performance. Candidates will be tested on their ability to configure and execute jobs that support various planning functions.
Topic 3	• Model Sales & Operations Processes: This section targets operations managers and evaluates knowledge of sales and operations planning. It covers the alignment of supply and demand, scenario planning, and decision-making processes to optimize operational efficiency. Candidates will be assessed on their ability to configure models that support strategic business goals.

Topic 4	• Model Supply Processes: This section assesses the expertise of supply chain planners in designing and managing supply processes. It includes setting up sourcing, inventory management, and supply constraints. Candidates will be evaluated on their ability to model supply networks and optimize resource allocation.
Topic 5	• General Configuration of a Planning Area: This section is aimed at SAP solution consultants and covers the configuration of a planning area. It includes defining key planning parameters, setting up structures, and ensuring the system is configured to meet business needs. Candidates will be tested on their ability to customize planning areas for optimal performance.
Topic 6	• Key Figures & Attributes: This section of the exam measures the skills of supply chain analysts and focuses on the key figures and attributes used in planning. It covers how to define and configure key figures to ensure accurate data representation and decision-making. Candidates are also tested on their ability to manage attributes that support various planning scenarios.

Pass Guaranteed SAP - Reliable C-IBP-2502 - Latest SAP Certified Associate - SAP IBP for Supply Chain Exam Topics

FreePdfDump IT experts specialize in training way which is the latest short-term effective. This training method is very helpful to you and you can achieve the expected result. In particular, it brings convenience to these candidates both working and studying. To the best of our knowledge the information contained in this publication is accurate. FreePdfDump SAP C-IBP-2502 Test Questions and test answers have an advantage over other products with the accuracy of 100%. You may be worried that our C-IBP-2502 practice test is old version. Don't worry, Our FreePdfDump SAP C-IBP-2502 exam dumps is the latest. Free update is for one year.

SAP Certified Associate - SAP IBP for Supply Chain Sample Questions (Q69-Q74):

NEW QUESTION # 69
What is a prerequisite for modeling outsourced manufacturers with production capacity using the Supply Optimizer?

- A. Use production lead times and offsets to manage components at the outsourced manufacturing location
- B. Model target inventory and stocks at the outsourced manufacturing location
- C. Model relative production costs across internal locations and outsourced manufacturing locations
- D. Ensure that the outsourced manufacturing locations have a separate subnetwork

Answer: C

Explanation:
The Supply Optimizer in SAP IBP models outsourced manufacturers as Locations with production capacity, optimizing costs across the network, per SAP IBP's supply planning documentation.
* Option A: Model relative production costs across internal locations and outsourced manufacturing locationsThis is correct. The optimizer requires cost data (e.g., production costs per unit) for internal and outsourced locations to decide where to produce, a key prerequisite, per SAP IBP' s cost optimization rules.
* Option B: Use production lead times and offsets to manage components at the outsourced manufacturing locationThis is incorrect. Lead times and offsets are used, but they're not a prerequisite specific to capacity modeling; they're general planning inputs.
* Option C: Ensure that the outsourced manufacturing locations have a separate subnetworkThis is incorrect. Subnetworks optimize runtime, but they're not required for modeling outsourced capacity; the optimizer works across one network.
* Option D: Model target inventory and stocks at the outsourced manufacturing locationThis is incorrect. Inventory targets are optional and not a prerequisite for capacity modeling in the optimizer.
Thus, A is the prerequisite, per SAP IBP's official optimizer requirements.

NEW QUESTION # 70
Which Maintenance, Repair, and Overhaul (MRO) parts planning processes are included in SAP Integrated Business Planning for

Supply Chain? Note: There are 3 correct answers to this question.

- A. Demand Driven Replenishment
- B. Inventory Optimization
- C. Demand Planning
- D. SAP Intelligent Asset Management
- E. Supply Planning

Answer: B,C,E

Explanation:
MRO parts planning in SAP IBP supports maintenance operations with demand, supply, and inventory processes, per SAP IBP's supply chain planning scope.
* Option A: Inventory OptimizationThis is correct. Inventory Optimization (e.g., safety stock for MRO parts) ensures availability for maintenance, a key MRO process, per SAP IBP's documentation.
* Option B: Demand Driven ReplenishmentThis is incorrect. Demand Driven Replenishment (DDR) is a specific methodology in SAP IBP, but it's not standard for MRO; it's more for manufacturing/retail.
* Option C: Demand PlanningThis is correct. Demand Planning forecasts MRO parts needs (e.g., based on maintenance schedules), a core process, per SAP IBP's demand module.
* Option D: Supply PlanningThis is correct. Supply Planning ensures MRO parts are sourced and available, using heuristics or optimization, per SAP IBP's supply planning features.
* Option E: SAP Intelligent Asset ManagementThis is incorrect. SAP IAM is a separate solution, not an IBP process, though it can integrate with IBP for MRO planning.
Thus, A, C, and D are MRO processes in SAP IBP, per official documentation.

NEW QUESTION # 71
What does ABC/XYZ segmentation allow you to do? Note: There are 2 correct answers to this question.

- A. Substitute missing values in case of sporadic demands
- B. Use forecasting algorithms that are specific to seasonal demands of SKUs in the segment "B"
- C. Identify inventory items that require closer attention
- D. Choose time-independent key figures as segmentation measures

Answer: C,D

Explanation:
ABC/XYZ segmentation in SAP IBP is a demand planning tool to classify products based on value (ABC, e.
g., revenue contribution) and demand variability (XYZ, e.g., forecast accuracy). It's used to prioritize planning efforts and optimize inventory.
* Option A: Substitute missing values in case of sporadic demandsThis is incorrect. ABC/XYZ segmentation classifies products but doesn't inherently substitute missing values. Sporadic demand handling is managed by demand sensing or specific forecast models, not segmentation itself.
* Option B: Choose time-independent key figures as segmentation measuresThis is correct. In SAP IBP, segmentation measures (e.g., sales value for ABC, coefficient of variation for XYZ) can be time- independent key figures (e.g., total annual revenue, average variability). These are configured in the ABC/XYZ Segmentation app, allowing static or dynamic analysis, as per SAP's demand planning documentation.
* Option C: Identify inventory items that require closer attentionThis is correct. ABC classifies high- value items (A) versus low-value (C), while XYZ identifies stable (X) versus erratic (Z) demand.
Combining them (e.g., AX = high-value, stable) highlights items needing focus (e.g., AZ = high-value, erratic), aiding inventory and planning prioritization-a core feature of SAP IBP segmentation.
* Option D: Use forecasting algorithms that are specific to seasonal demands of SKUs in the segment "B"This is incorrect.
ABC/XYZ segmentation doesn't directly dictate forecasting algorithms or tie them to specific segments like "B" (moderate value).
Forecast models (e.g., seasonalARIMA) are configured separately in demand planning, not as a segmentation output.
Thus, B and C reflect SAP IBP's ABC/XYZ segmentation capabilities per official documentation.

NEW QUESTION # 72
Which functional capabilities are included in SAP IBP for response and supply? Note: There are 2 correct answers to this question.

- A. Detailed Production Scheduling

- B. Gating Factor
- C. Calculating Buffer Proposals
- D. Analyze Supply Usage

Answer: B,D

Explanation:
SAP IBP for Response and Supply focuses on order-based planning and short-term supply optimization, per its official module documentation.
* Option A: Gating FactorThis is correct. Gating factors (e.g., capacity constraints driving supply decisions) are analyzed in response planning to prioritize orders, a key capability, per SAP IBP's documentation.
* Option B: Analyze Supply UsageThis is correct. Analyzing supply usage (e.g., allocation of supply to demand) is a core feature in response and supply, supported by tools like the Supply Usage app, per SAP IBP's guides.
* Option C: Detailed Production SchedulingThis is incorrect. Detailed scheduling is handled by SAP PP/DS or external systems, not IBP Response and Supply, which focuses on higher-level planning.
* Option D: Calculating Buffer ProposalsThis is incorrect. Buffer proposals are part of Demand- Driven Replenishment (DDR), a separate IBP feature, not Response and Supply.
Thus, A and B are included capabilities, per SAP IBP's official Response and Supply scope.

NEW QUESTION # 73
Which type of master data represents the Master Data Type Component?

- A. Compound Master Data Type
- B. Reference Master Data Type
- C. External Master Data Type
- D. Virtual master data type

Answer: B

Explanation:
Master data types in SAP IBP define planning objects, with "Component" typically referring to a specific type like Production Source ItemComponent, per SAP IBP's documentation.
* Option A: Virtual master data typeThis is incorrect. Virtual types are temporary or derived, not standard for components.
* Option B: Compound Master Data TypeThis is incorrect. Compound types (e.g., SOURCECUSTOMER) combine multiple simple types, not specifically "Component."
* Option C: Reference Master Data TypeThis is correct. The Component master data type (e.g., in Production Source Item) is a Reference type, linking to a Product, per SAP IBP's master data hierarchy (e.g., referencing Product ID).
* Option D: External Master Data TypeThis is incorrect. External types are sourced externally, not a fit for Component.
Thus, C is the correct type, per SAP IBP's official master data definitions.

NEW QUESTION # 74
......

We provide you with free update for one year for C-IBP-2502 study guide, that is to say, there no need for you to spend extra money on update version. The update version for C-IBP-2502 exam materials will be sent to your email automatically. In addition, C-IBP-2502 exam dumps are compiled by experienced experts who are quite familiar with the exam center, therefore the quality can be guaranteed. You can use the C-IBP-2502 Exam Materials at ease. We have online and offline service, and if you have any questions for C-IBP-2502 training materials, don't hesitate to consult us.
