Vce Dumps

Only to find ways to success, do not make excuses for failure. To pass the Google Cloud-Digital-Leader Exam, in fact, is not so difficult, the key is what method you use. PassReview's Google Cloud-Digital-Leader exam training materials is a good choice. It will help us to pass the exam successfully. This is the best shortcut to success. Everyone has the potential to succeed, the key is what kind of choice you have.

Google Cloud Digital Leader Sample Questions (Q259-Q264):

NEW QUESTION # 259

Which of these are defined by the following statement: a contract you have with your end custom-ers, which, if you don't meet, you might even have to pay fines?

- A. SLO - Service Level Objective
- B. SLI - Service Level Indicator
- **C. SLA - Service Level Agreement**
- D. SLC - Service Level Contract

Answer: C

Explanation:

<https://cloud.google.com/blog/products/devops-sre/sre-fundamentals-slis-slas-and-slos>

NEW QUESTION # 260

A startup is planning to create their entire suite of applications on Google Cloud. They are looking at various open source technologies to build applications. One of the considera-tion is about having a well integrated monitoring tool. They have to be able to constantly review load capacity and performance of their applications and virtual machines. What would you advise them to do?

- A. It is best to build a custom solution so that they know it integrates well with all their custom applications.
- B. Since they are using open source for applications, find another open source monitoring tool and integrate it, which could turn out to be very cheap.
- **C. Use the Google Cloud Operations Suite which contains monitoring among other operations tools.**
- D. Update the application code to regularly write to output logs. Export the logs to BigQuery to analyze them frequently.

Answer: C

Explanation:

Operations Suite is well integrated into Google and it s the recommended option.

NEW QUESTION # 261

Cloud Data Loss Prevention (DLP) is a fully managed service designed to help discover, classify, and protect the most sensitive dat a. DLP provides three key features (Select Three Answers)

- A. Reinspection
- **B. Inspection**
- **C. Classification**
- D. De-classification
- **E. De-identification**

Answer: B,C,E

Explanation:

Classification. De-classification and Inspection

Classification is the process to inspect the data and know what data we have, how sensitive it is, and the likelihood. Inspection and classification happen here.

De-identification is the process of removing, masking, replacing information from data.

NEW QUESTION # 262

An organization wants to adopt the advanced machine learning capabilities of the Google Cloud. However, regulations require data to be stored in an on-premises data center.

Which approach should the organization use?

- A. A multi-cloud approach
- B. A public-cloud approach
- C. A private-cloud approach
- D. A hybrid-cloud approach

Answer: D

NEW QUESTION # 263

Which of the following options is/are correct about Preemptible VMs?

- A. None of the Above.
- B. You can not use Preemptible VMs at fault-tolerant workloads such as high-performance computing, big data and analytics, continuous integration/continuous delivery (CI/CD), rendering/transcoding, and testing.
- C. Preemptible VMs don't have fixed pricing.
- D. Both A & B

Answer: A

Explanation:

Preemptible VMs:

Predictable and low cost

Preemptible VMs are up to 80% cheaper than regular instances. Pricing is fixed so you will always get low cost and financial predictability, without worrying about variable market pricing.

Expand your batch processing

Supplement your regular VMs with lower-cost, preemptible instances to finish your compute-intensive work faster, saving you time and money. Throw preemptible VMs at fault-tolerant workloads such as high performance computing, big data and analytics, continuous integration/continuous delivery (CI/CD), rendering /transcoding, and testing.

Get more from your containers

Containers are naturally stateless and fault tolerant, making them a great fit for preemptible VMs! You save on your containerized workloads today with these affordable compute instances. Take advantage of Google Kubernetes Engine for your containerized workloads and Managed Instance Groups to painlessly and seamlessly recover from preemptions.

Enable it instantly

Simply add --preemptible to the gcloud command line and you're off to the races. There's no bidding to code for, and with per-second billing, just shut down your VMs as soon as you're done.

NEW QUESTION # 264

.....

After years of operation, our platform has accumulated a wide network of relationships, so that we were able to learn about the changes in the exam at the first time. This is a benefit that students who have not purchased Cloud-Digital-Leader exam guide can't get. The team of experts hired by Google Cloud Digital Leader study questions constantly updates and supplements the contents of study materials according to the latest syllabus and the latest industry research results. We also have dedicated staff to maintain Cloud-Digital-Leader Exam Material every day, and you can be sure that compared to other test materials on the market, Google Cloud Digital Leader study questions are the most advanced.
