Achieving the Juniper JN0-460 test certification can open up unlimited possibilities for your future career, if you are truly dedicated to jump out your career and willing to make additional learning and extra income. PassExamDumps JN0-460 exam dumps can help you to overcome the difficulty—from understanding the necessary and basic knowledge to passing the JNCIS-MistAI-Wired Mist AI Wired, Specialist (JNCIS-MistAI-Wired) exam test. The goal of Juniper JN0-460 is to help our customers optimize their IT technology by providing convenient, high quality JNCIS-MistAI-Wired exam prep training that they can rely on. Juniper JN0-460 sure pass exam dumps empower the candidates to master their desired technologies for their own JNCIS-MistAI-Wired exam test. Dear every one, passing the Juniper JN0-460 actual test is an easy case for you.

Our users can prove to you that the hit rate of our JN0-460 exam questions is very high. And you can just see the data how many customers are visiting our JN0-460 study materials everyday. And the pass rate is also high as 98% to 100%. You can walk into the examination room with peace of mind, after which you will experience a very calm examination. As for the result, please come home and wait. Our JN0-460 training prep will not disappoint you.

>> New JN0-460 Study Plan <<

**Real New JN0-460 Study Plan - in PassExamDumps**

In order to cater to different consumption needs for different customers, we have three versions for JN0-460 exam brindumps, hence you can choose the version according to your own needs. JN0-460 PDF version is printable, if you choose it you can take the paper one with you, and you can practice it anytime. JN0-460 soft test engine can stimulate the test environment, and you will be familiar with the test environment by using it. JN0-460 online test engine support all web browsers, and you can use this version in your phone.

## Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Campus EVPN-VXLAN:</b> This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Campus Fabric Architecture:</b> This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Wired Assurance Management or Operations:</b> This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Wired Assurance Fundamentals:</b> This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Wired Assurance Provisioning or Deployment:</b> This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.</li> </ul>

## Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q77-Q82):

### NEW QUESTION # 77

How do VXLAN and EVPN work together to support MAC learning in a scalable way?

- A. By relying exclusively on Layer 3 routing protocols
- **B. Using EVPN as a control plane to distribute MAC addresses over VXLAN tunnels**
- C. Through dynamic flooding mechanisms in the data plane
- D. Implementing static MAC address tables for each VTEP

**Answer: B**

### NEW QUESTION # 78

Deployment options for Wired Assurance include: (Select two)

- A. Snail mail configuration updates
- B. On-premises only management
- C. Cloud-based management
- D. Hybrid cloud management

**Answer: C,D**

#### NEW QUESTION # 79

Which two tiers are required when deploying a 3-stage campus fabric IP Clos?

- A. Access
- B. Service Block
- C. Core
- D. Distribution

**Answer: A,C**

#### NEW QUESTION # 80

Which API is used within the Juniper Mist solution?

- A. JSON-RPC
- B. SOAP
- C. REST
- D. XML

**Answer: C**

Explanation:

Juniper Mist is built on a fully open and RESTful API architecture, allowing programmatic access to all functions. Administrators and developers can automate switch provisioning, monitoring, and troubleshooting directly via the REST API. This open design supports JSON data formatting and HTTPS authentication, ensuring secure integration with external systems. References: Juniper Mist API Developer Guide

#### NEW QUESTION # 81

Which service level expectation (SLE) metric measures congestion on the uplink interface of a switch?

- A. Throughput
- B. Asymmetric Uplink
- C. Switch Health
- D. Successful Connect

**Answer: A**

Explanation:

According to Juniper Mist documentation, the Throughput Service Level Expectation (SLE) is the primary metric used to represent the ability of wired users to pass traffic across the network without impedance. This SLE provides a comprehensive oversight of network performance by identifying issues that degrade the user experience, such as storm control events, interface anomalies, and specifically uplink congestion.

Within the Throughput SLE, the Congestion classifier (also referred to as Congestion Uplink) is specifically designed to monitor for buffer saturation and packet drops (Tx Drops). When traffic arriving at an interface exceeds its processing or forwarding capacity, packets are queued in a buffer; if this buffer becomes full, the switch begins dropping packets. Juniper Mist utilizes a specific formula considering the ratios of Tx Drops to Tx Packets, Transmitted bps to Link Speed, and Received Speed to Link Speed to determine if a "Bad User Minute" has occurred due to congestion.

A critical feature of Wired Assurance is the automatic identification of uplink interfaces. Mist identifies these high-capacity ports by analyzing switch telemetry for characteristics such as having a switch or router as an LLDP neighbor, being designated as a Spanning Tree Protocol (STP) root port, or exhibiting significantly higher packet counts compared to access ports. When congestion is

detected on an interface identified as an uplink, the system recognizes that this bottleneck impacts every user on that switch. By correlating these drops with the Throughput SLE, network administrators can proactively identify when a site requires more bandwidth or a different fabric architecture to handle current traffic demands, rather than simply monitoring if the link is physically "up" or "down".

## NEW QUESTION # 82

.....

PassExamDumps also offers Juniper JN0-460 desktop practice exam software which is accessible without any internet connection after the verification of the required license. This software is very beneficial for all those applicants who want to prepare in a scenario which is similar to the Mist AI Wired, Specialist (JNCIS-MistAI-Wired) real examination.
