# NSE7_SSE_AD-25 Reliable Dumps Free - Review NSE7_SSE_AD-25 Guide

Since IT certification examinations are difficult, we know many candidates are urgent to obtain valid preparation materials to help them clear exam success. Now we offer the valid NSE7_SSE_AD-25 test study guide which is really useful. If you are still hesitating about how to choose valid products while facing so many different kinds of exam materials, here is a chance, our Fortinet NSE7_SSE_AD-25 Test Study Guide is the best useful materials for people.

In short, we live in an age full of challenges. So we must continually update our knowledge and ability. If you are an ambitious person, our NSE7_SSE_AD-25 exam questions can be your best helper. There are many kids of NSE7_SSE_AD-25 study materials in the market. You must have no idea to choose which one. It does not matter. Our Fortinet NSE 7 guide braindumps are the most popular products in the market now. Just buy our NSE7_SSE_AD-25 learning quiz, and you will get all you want.

>> NSE7_SSE_AD-25 Reliable Dumps Free <<

Fortinet certification NSE7_SSE_AD-25 exam test software

We are committed to provide you the best and the latest NSE7_SSE_AD-25 training materials for you. Quality of the NSE7_SSE_AD-25 exam dumps has get high evaluation among our customers, they think highly of it, since we help them pass the exam easily. Furthermore if we have the updated version, our system will send the Latest NSE7_SSE_AD-25 Exam Dumps to your email address automatically, you don't need to worry about missing the latest version, you just need to concentrate your attention on practicing, and we will do the rest for you.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q35-Q40):

NEW QUESTION # 35
Your FortiSASE customer has a small branch office in which ten users will be using their personal laptops and mobile devices to access the internet.
Which deployment should they use to secure their internet access with minimal configuration?

- A. Deploy SD-WAN on-ramp to secure internet access.
- B. Deploy FortiAP to secure internet access.
- C. Deploy FortiClient endpoint agent to secure internet access.
- D. Deploy FortiGate as a LAN extension to secure internet access.

Answer: B

Explanation:
Deploying FortiAP enables secure internet access for unmanaged personal devices in small branch offices with minimal configuration by automatically directing traffic through FortiSASE, eliminating the need for endpoint installation or complex setup.

NEW QUESTION # 36
Which service is included in a secure access service edge (SASE) solution, but not in a security service edge (SSE) solution?

- A. SWG
- B. SD-WAN
- C. CASB
- D. ZTNA

Answer: B

Explanation:
SD-WAN is a networking component included in a SASE solution but not in an SSE solution. SSE focuses solely on security services (like ZTNA, SWG, and CASB), while SASE combines both networking (e.g., SD-WAN) and security into a unified cloud-delivered service.

NEW QUESTION # 37
During FortiSASE provisioning, how many security points of presence (POPs) need to be configured by the FortiSASE administrator?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:
During FortiSASE provisioning, the FortiSASE administrator needs to configure at least one security point of presence (PoP). A single PoP is sufficient to get started with FortiSASE, providing the necessary security services and connectivity for users.
* Security Point of Presence (PoP):
* A PoP is a strategically located data center that provides security services such as secure web gateway, firewall, and VPN termination.
* Configuring at least one PoP ensures that users can connect to FortiSASE and benefit from its security features.
* Scalability:
* While only one PoP is required to start, additional PoPs can be added as needed to enhance redundancy, load balancing, and performance.
References:
FortiOS 7.6 Administration Guide: Provides details on the provisioning process for FortiSASE.
FortiSASE 23.2 Documentation: Explains the configuration and role of security PoPs in the FortiSASE architecture.

NEW QUESTION # 38
What are two benefits of deploying secure private access (SPA) with SD-WAN? (Choose two answers)

- A. Support of both TCP and UDP applications
- B. Inline security inspection by FortiSASE
- C. A direct access proxy tunnel from FortiClient to the on-premises FortiGate
- D. ZTNA posture check performed by the hub FortiGate

Answer: A,B

Explanation:
According to the NSE7 SASE Enterprise Guide (Pages 46 & 61), deploying Secure Private Access (SPA) with SD-WAN provides advanced security and networking capabilities by routing traffic through global Points of Presence (PoPs).
* Inline Security Inspection (D): A major advantage of this approach is that traffic is routed through FortiSASE PoPs before it reaches private applications. This enables inline security inspection, providing robust protection against threats by applying the full SASE security stack-including antivirus, intrusion prevention, and deep packet inspection-to private access traffic.
* Support for TCP and UDP (B): Organizations with existing FortiGate SD-WAN deployments benefit from broader and seamless access to privately hosted applications. The SD-WAN SPA use case explicitly supports both TCP- and UDP-based applications,

ensuring that legacy or specialized services that rely on UDP function correctly over the secure tunnel.
* SD-WAN Optimization: This method leverages the benefits of SD-WAN to optimize traffic flow between the SASE PoP and the corporate SD-WAN hub or data center FortiGate. It is particularly useful for mission-critical applications that require an extra layer of security combined with path optimization.
* Architecture: In this configuration, the FortiSASE Security PoPs act as spokes in the organization's SD-WAN network, relying on IPsec VPN overlays and BGP for secure dynamic routing.
While ZTNA posture checks are a feature of the broader ecosystem, the NSE7 Guide specifically highlights inline inspection and application support (TCP/UDP) as primary advantages of the SD-WAN integrated SPA approach.

NEW QUESTION # 39

Refer to the exhibit. An organization must inspect all the endpoint internet traffic on FortiSASE, and exclude Google Maps traffic from the FortiSASE VPN tunnel and redirect it to the endpoint physical interface.
Which configuration must you apply to achieve this requirement?

- A. Exempt Google Maps in URL filtering in the web filter profile.
- B. Add the Google Maps URL as a steering bypass destination in the endpoint profile.
- C. Configure a steering bypass tunnel firewall policy using Google Maps FQDN to exclude and redirect the traffic.
- D. Add the Google Maps URL in the zero trust network access (ZTNA) TCP access proxy forwarding rule.

Answer: B

Explanation:
To exclude specific internet traffic (such as Google Maps) from being tunneled through FortiSASE and instead direct it out the local endpoint interface, you must configure it as a steering bypass destination in the FortiClient endpoint profile. This ensures traffic matching the URL bypasses the FortiSASE tunnel.

NEW QUESTION # 40

......

Our company always put the quality of the NSE7_SSE_AD-25 practice materials on top priority. In the past ten years, we have made many efforts to perfect our NSE7_SSE_AD-25 study materials. Our NSE7_SSE_AD-25 study questions cannot tolerate any small mistake. All staff has made great dedication to developing the NSE7_SSE_AD-25 Exam simulation. Our professional experts are devoting themselves on the compiling and updating the exam materials and our services are ready to guide you 24/7 when you have any question.
