We provide 3 versions of our Salesforce Certified Tableau Data Analyst exam torrent and they include PDF version, PC version, APP online version. Each version's functions and using method are different and you can choose the most convenient version which is suitable for your practical situation. For example, the PDF version is convenient for you to download and print our Analytics-DA-201 test torrent and is suitable for browsing learning. If you use the PDF version you can print our Analytics-DA-201 Guide Torrent on the papers and it is convenient for you to take notes. You learn our Analytics-DA-201 test torrent at any time and place. The PC version can stimulate the real exam's environment, is stalled on the Windows operating system and runs on the Java environment. You can use it at any time to test your own exam stimulation tests scores and whether you have mastered our Analytics-DA-201 guide torrent or not.

Salesforce Analytics-DA-201 Exam Syllabus Topics:

Topic	Details
Topic 1	• ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud.
Topic 2	• ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.

Topic 3	• Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S • 4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.
Topic 4	• ABAP RESTful Application Programming Model: This section of the exam evaluates the capabilities of the SAP S • 4HANA Technical Consultant in using the ABAP RESTful Application Programming Model (RAP). It focuses on understanding the structure and components of RAP, including behavior definitions, service bindings, and metadata extension. The goal is to validate the ability to develop modern and scalable applications using RAP.

Salesforce Certified Tableau Data Analyst Sample Questions (Q160-Q165):

NEW QUESTION # 160
Open the link to Book1 found on the desktop. Open Disciplines worksheet.
Filter the table to show the Top 10 NOC based on the number of medals won.

Answer:

Explanation:
check the steps below in explanation.
Explanation:
To filter the table to show the Top 10 NOC based on the number of medals won, you need to do the following steps:
* Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Disciplines worksheet.
* Click on the Disciplines tab at the bottom of the workbook to open the worksheet. You will see a table that shows the NOC, discipline, and medals for each country.
* Drag Medals from the Measures pane to the Filters shelf. This will open a dialog box that allows you to filter by different criteria.
* Select Top from the dialog box. This will show you options to filter by the top or bottom values of a field.
* Enter 10 in the text box next to By field. This will filter by the top 10 values of Medals.
* Select NOC from the drop-down list next to By field. This will filter by the top 10 values of NOC based on Medals.
* Click OK to apply the filter. You will see that the table now shows only 10 rows, one for each NOC with the highest number of medals.

NEW QUESTION # 161
You have the following dashboard that contains two visualizations.
You want to show only one visualization at time. Users must be able to switch between visualizations.
What should you me?

* A. Dashboard actions
* B. Show/hide buttons
* C. A parameter and a calculated filed
* D. Worksheet actions

Answer: B

Explanation:
In Tableau, you can manage the visibility of different visualizations on a dashboard using various techniques.
Among the options provided, the most straightforward method to allow users to switch between two visualizations is to use show/hide buttons.
Here's why each option is or isn't suitable for the requirement:
A). A parameter and a calculated field: While it's possible to use a parameter and a calculated field to control which visualization is displayed, it requires creating a calculated field that responds to a parameter and then using that field to filter the view. This method can become complex and is not as user-friendly for simply showing and hiding visualizations.
B). Worksheet actions: Worksheet actions in Tableau typically allow users to interact with the data within a visualization, such as filtering data or highlighting related data points when clicking or hovering. They are not designed to control the visibility of entire visualizations on a dashboard.
C). Show/hide buttons: Show/hide buttons are a feature specifically designed to manage the visibility of dashboard elements. When you create a show/hide button, it can be configured to display or hide a particular visualization, container, or any other dashboard element when clicked. This provides a very intuitive interface for users to switch between visualizations.
D). Dashboard actions: Dashboard actions, like worksheet actions, are used to create interactions between sheets, such as filtering data or navigating to other sheets or URLs based on user interactions. They are not intended for toggling the visibility of visualizations.
Therefore, the correct answer is C. Show/hide buttons as they provide a user-friendly way to switch between visualizations on a dashboard without the need for complex calculations or actions that aren't meant for this purpose. The show/hide button feature is specifically designed for toggling visibility and offers a simple and effective solution for the requirement.

NEW QUESTION # 162
You have the following dataset.
You need to create the following worksheet.
The table must show either profit or sales based on the selection from the Parameter 1 menu.
Which three actions should you perform in orders
(Place the three correct options in order Use the arrows to move Options lo Answer Area Use Answer Area arrows to reorder the options)

Answer:

Explanation:
A screenshot of a computer Description automatically generated
▢

NEW QUESTION # 163
You want to create the following table in a view.
▢
Which function should you use to create the Position column?

- A. FIRST
- B. RANK
- C. LAST
- D. INDKX

Answer: A

Explanation:
To create the Position column, you should use the FIRST () function. The FIRST () function returns the number of rows from the current row to the first row in the partition. For example, the first row in a partition will return 0, the second row will return -1, and so on. In this question, the partition is defined by the Segment field, and the table is sorted by the Sales field in descending order. Therefore, the Position column shows the offset of each row from the first row in each segment, based on the sales ranking.

* Tableau Help: FIRST Function

NEW QUESTION # 164

You have the following dataset
You need to create the following visualization.
Which quick table calculation should you drag to Text on the Marks card?

- A. Percentile
- B. Percent of Total
- C. Compound Growth Rate
- D. Percent Difference

Answer: B

Explanation:
we need to create a quick table calculation that shows the percent of total sales for each category and sub- category. To do this, we can follow these steps:
* Drag Category to Columns and Sub-Category to Rows.
* Drag Sales to Text on the Marks card.
* Right-click Sales on the Marks card and select Quick Table Calculation > Percent of Total.
* Right-click Sales on the Marks card again and select Compute Using > Category.
This will create a quick table calculation that shows the percent of total sales for each sub-category within each category. The visualization will look like this:

NEW QUESTION # 165
......

DumpTorrent Analytics-DA-201 Questions have helped thousands of candidates to achieve their professional dreams.
