Exam MB-500: Microsoft Dynamics 365: Finance and Operations Apps Developer

Candidates for this exam are developers who work with Finance and Operations apps in Microsoft Dynamics 365 to implement and extend applications that meet the requirements of a business. Candidates provide fully realized solutions by using standardized application coding patterns, extensible features, and external integrations.

Candidates develop business logic by using X++, create and modify Finance and Operations reports and workspaces, customize user interfaces, provide endpoints and APIs to support Power Platform apps and external systems, perform testing, monitor performance, analyze and manipulate data, create technical designs and implementation details, and implement permission policies and security requirements.

Candidates should have a deep knowledge and experience using the underlying framework, data structures, and objects associated with the Finance and Operations solutions.

Candidates should have experience with products that include Visual Studio, Azure DevOps, Lifecycle Services (LCS) tools, and SQL Server Management Studio.

Part of the requirements for: Microsoft Certified: Dynamics 365: Finance and Operations Apps Developer Associate

Download exam skills outline

Microsoft MB-500 Exam covers a broad range of topics, including designing and developing new or existing business solutions, implementing security and performance optimizations, developing integrations and extensions, and managing the lifecycle of business applications. MB-500 exam also tests the candidate's knowledge of Power Platform integrations, DevOps practices, and deploying and managing Dynamics 365: Finance and Operations environments.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q154-Q159):

NEW QUESTION # 154

An error occurs when an employee creates a new workflow using a custom approval element to track the status of a document. You need to ensure that the workflow is created correctly.

in which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

- 1 - Create a workflow structure.
- 2 - Configure the business process steps.
- 3 - Develop the workflow approval component.
- 4 - Enable the workflow for the business scenario.

NEW QUESTION # 155

You are a Dynamics 365 Finance and Operations developer.

Users are experiencing slower load times for the All Customers form.

You need to update caching for CustTable to improve data retrieval times.

How should you configure CacheLookup properties? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Entire table

In Microsoft Dynamics AX, groups of records can be cached all at once with set-based caching. Set-based caching can be implemented in two ways:

At design time, by setting the table's CacheLookup property to EntireTable.

In code, by using the RecordViewCache class.

Box 2: Found

Record caching is enabled for a table when all the following statements are true:
The CacheLookup property on the table is enabled by setting it to one of the following values:
NotInTTS, Found, FoundAndEmpty.
The record buffer disableCache method has not been called with a parameter of true.

NEW QUESTION # 157

You are a Dynamics 365 Finance developer.
You need to create a security rule that meets the following requirements:
* Provide the same permissions as HcmWorkerActionHireRead
* Assign the Update level access and the HcmHumanResourceMamager Role
Which settings should you use? To answer, select the appropriate option in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 158

A company is migrating from a legacy system to Dynamics 365 Unified Operations.
You need to import the customer data by using the Data Management workspace.
In which order should you perform the actions? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Step 1: Create a new import project.

Step 2: Specify the project category for the import.

Step 3: Specify the Source Data Format.

Step 4: Specify the target entity.

Step 5: Import the source file to the project.

The import process is done through the Import tile in the Data Management workspace.

Import a data package

* Log into the environment using a login with sufficient privileges (typically this is the Administrator role).

* On the dashboard, click the Data Management workspace.

* Click the Import tile.

* On the next page, do the following:

Provide a name.

In the Source Data Format field, select Package.
