

Earn the Credential of Salesforce Mule-101 Exam

In this age of knowledge competition, we must keep up with the pace of the times, otherwise we will be eliminated. How to improve your ability and how to prove your ability is crucial. The answer is Mule-101 Certification can help you prove your strength and increase social competitiveness. Although it is not an easy thing for somebody to pass the exam, but our Mule-101 Exam Torrent can help aggressive people to achieve their goals. This is the reason why we need to recognize the importance of getting the test Mule-101 certification.

In this age of advanced network, there are many ways to prepare Salesforce Mule-101 certification exam. Itcertking provides the most reliable training questions and answers to help you pass Salesforce Mule-101 Certification Exam. Itcertking have a variety of Salesforce certification exam questions, we will meet you all about IT certification.

Knowledge Mule-101 Points | Mule-101 PDF Question

It is very convenient for all people to use the Mule-101 study materials from our company. Our study materials will help a lot of people to solve many problems if they buy our products. The online version of Mule-101 study materials from our company is not limited to any equipment, which means you can apply our study materials to all electronic equipment, including the telephone, computer and so on. So the online version of the Mule-101 Study Materials from our company will be very for you to prepare for your exam. We believe that our study materials will be a good choice for you.

Salesforce Certified MuleSoft Integration Foundations Sample Questions (Q35-Q40):

NEW QUESTION # 35

What is an advantage that Anypoint Platform offers by providing universal API management and Integration-Platform-as-a-Service (iPaaS) capabilities in a unified platform?

- A. Ability to use a single iPaaS to manage and integrate all API gateways
- **B. Ability to use a single control plane for both full-lifecycle API management and integration**
- C. Ability to use a single iPaaS to manage all API developer portals
- D. Ability to use a single connector to manage and integrate all APIs

Answer: B

Explanation:

Unified Platform: Many vendors offer either API Management (APIM) or Integration (iPaaS) as separate tools. Anypoint Platform combines them.

Single Control Plane: The primary advantage is having a single interface (The Anypoint Control Plane) where you can do everything: design APIs, build integrations, deploy them, govern them with policies, and monitor them.

Impact: This reduces complexity, lowers costs (no need to buy two separate stacks), and streamlines the workflow from development to operations.

NEW QUESTION # 36

An integration team uses Anypoint Platform and follows MuleSoft's recommended approach to full lifecycle API development. Which step should the team's API designer take before the API developers implement the API specification?

- A. Generate test cases using MUnit so the API developers can observe the results of running the API
- **B. Publish the API specification to Exchange and solicit feedback from the API's consumers**
- C. Use the scaffolding capability of Anypoint Studio to create an API portal based on the API specification
- D. Use API Manager to version the API specification

Answer: B

Explanation:

Design-First Feedback Loop: In the MuleSoft API Lifecycle, after designing the API specification (RAML/OAS) in Design Center, the critical next step is to Publish to Exchange³.

Mocking & Validation: Once in Exchange, the API creates a "Mocking Service." This allows potential consumers (frontend devs, mobile devs) to make test calls against the design before any backend code is written.

Purpose: This solicits feedback to ensure the design meets business needs. If changes are needed, they are made to the spec cheap and fast, rather than rewriting complex code later (Implementation phase).

NEW QUESTION # 37

Which Anypoint Platform component helps integration developers discover and share reusable APIs, connectors, and templates?

- **A. Anypoint Exchange**
- B. Anypoint Studio
- C. Design Center
- D. API Manager

Answer: A

Explanation:

Anypoint Exchange: This is the "marketplace" or central repository of the Anypoint Platform¹⁴¹⁴¹⁴¹⁴.

Discovery & Reuse: Its primary purpose is to allow developers to publish their assets (APIs, Connectors, Templates) so that other developers can find ("discover") and reuse them. This drives the efficiency of the API-led connectivity model¹⁵.

Why others are incorrect:

Anypoint Studio: The IDE for building applications¹⁶.

API Manager: For governing and securing running APIs¹⁷.

Design Center: For designing API specifications and flows¹⁸.

NEW QUESTION # 38

A MuleSoft developer must implement an API as a Mule application, run the application locally, and execute unit tests against the running application.

- A. API Designer
- B. Anypoint CLI
- C. API Manager
- **D. Anypoint Studio**

Answer: D

Explanation:

Anypoint Studio: This is the desktop Integrated Development Environment (IDE) for MuleSoft.

Capabilities:

Implement: It provides the graphical interface to drag-and-drop connectors and configure flows.

Run Locally: It includes an embedded Mule Runtime engine, allowing developers to run and debug apps on their own machines.

Execute Unit Tests: It has MUnit fully integrated, allowing developers to run tests and see coverage reports directly in the IDE.

Why others are incorrect:

API Designer: Web-based tool for designing specs (RAML), not implementing logic or running local runtimes.

Anypoint CLI: Command-line tool for platform operations, not development/testing.

NEW QUESTION # 39

An organization's IT team follows an API-led connectivity approach and must use Anypoint Platform to implement a System API that securely accesses customer data. The organization uses Salesforce as the system of record for all customer data, and its most important objective is to reduce the overall development time to release the System API.

- A. Use the Anypoint Connector for Database to connect to a MySQL database to access a copy of the customer data
- B. Use the Anypoint Connector for FTP to download a file containing a recent near-real time extract of the customer data
- C. Use the Anypoint Connector for HTTP to connect to the Salesforce APIs to directly access the customer data
- **D. Use the Anypoint Connector for Salesforce to connect to the Salesforce APIs to directly access the customer data**

Answer: D

Explanation:

Objective: The key constraint is to "reduce overall development time."

Anypoint Connector for Salesforce: MuleSoft provides pre-built, certified connectors for major systems like Salesforce. These connectors abstract the complexity of the underlying API (SOAP/REST), handle authentication (OAuth), and provide easy-to-use operations (Query, Create, Update) within Anypoint Studio.

Comparison:

Option C (HTTP): While possible, using a generic HTTP connector requires manually building the requests, handling session management, and parsing raw JSON/XML, which takes more time.

Option B (Salesforce Connector): Is the fastest "configuration-over-coding" approach.

NEW QUESTION # 40

.....

As the famous saying goes, time is life. Time is so important to everyone because we have to use our limited time to do many things. Especially for candidates to take the Mule-101 exam, time is very precious. They must grasp every minute and every second to prepare for it. From the point of view of all the candidates, our Mule-101 Study Materials give full consideration to this problem. We can send you a link within 5 to 10 minutes after your payment.
