100% Plat-Dev-210 Exam Coverage - New Plat-Dev-210 Exam Camp

By keeping customer satisfaction in mind, Dumpkiller offers you a free demo of the Salesforce Certified Omnistudio Developer (Plat-Dev-210) exam questions. As a result, it helps you to evaluate the Salesforce Certified Omnistudio Developer (Plat-Dev-210) exam dumps before making a purchase. Dumpkiller is steadfast in its commitment to helping you pass the Salesforce in Plat-Dev-210 Exam. A full refund guarantee (terms and conditions apply) offered by Dumpkiller will save you from fear of money loss.

Salesforce Certified Omnistudio Developer Sample Questions (Q55-Q60):

NEW QUESTION # 55

Which two of these options can a developer use to retrieve data from a Salesforce object?
Choose 2 answers

- A. Lookup Input Element
- B. Data Mapper Load Action
- C. Data Mapper Extract Action
- D. Data Mapper Post Action

Answer: A,C

Explanation:

To retrieve (read) data from Salesforce objects:

* A. Data Mapper Extract Action - Correct. A DataRaptor Extract is specifically used to retrieve data from Salesforce, based on

input parameters or context.

* C. Lookup Input Element - Correct. This is used within OmniScripts to look up a record by matching input data, essentially performing a read operation.

Incorrect Options:

* B. DataRaptor Post is not a valid DataRaptor type.

* D. DataRaptor Load Action is used for writing/updating data, not retrieving it.

:

Salesforce OmniStudio Guide # DataRaptor Types and Lookup Input Element Usage

NEW QUESTION # 56

A developer needs to configure a calculation procedure to calculate the sum of the entire base price.

What is the most efficient way for the developer to meet this requirement?

- A. Add an Aggregation Step as SUM (BasePrice)
- B. Add A Calculation Step as SUM (BasePrice).
- C. Create a Preprocessor class to calculate the sum
- D. Create a Postprocessor apex class to calculate the sum.

Answer: A

Explanation:

The Aggregation Step in a calculation procedure allows the developer to perform aggregate functions such as SUM, COUNT, MIN, MAX, and AVG on the output of a previous step. The developer can use this step to calculate the sum of the entire base price by specifying the field name and the aggregation function

NEW QUESTION # 57

A developer creates an Integration Procedure with a Set values and a DataRaptor Extract Action that requires AccountId as a key.

When the developer previews the Integration Procedure, the developer enters the AccountId correctly and executes the preview.

The developer sees the data extracted by the DataRaptor in the Debug Log, but the response is empty.

What is the likely cause of this issue?

- A. The AccountId used for the preview is invalid.
- B. A Response Action was not added to the Integration Procedure.
- C. The DataRaptor Action did not have the Add Response To Response JSON property set to true.
- D. The Response cannot be previewed directly.

Answer: C

Explanation:

The Add Response To Response JSON property on the DataRaptor Action indicates that the output of the DataRaptor should be added to the response JSON of the Integration Procedure. If this property is not set to true, the response will be empty even if the DataRaptor extracts data successfully.

NEW QUESTION # 58

Refer to the exhibit below. A developer has configured an Integration Procedure element with SEND

/RESPONSE TRANSFORMATIONS as shown.

Alternatively, how could the developer configure Additional Input to send exactly the same data? Assume that the developer checked Send Only Additional Input.

□

- A. ☐
- B. ☐
- C. ☐
- D. ☐

Answer: A

Explanation:

The Additional Input property allows the developer to specify additional input parameters to be sent to the Integration Procedure

element. The input parameters can be specified as a JSON object or as a list of key- value pairs. If the developer checked Send Only Additional Input, then only the input parameters specified in Additional Input are sent, and the SEND/RESPONSE TRANSFORMATIONS are ignored. Therefore, the developer needs to specify the same input parameters as in the SEND/RESPONSE TRANSFORMATIONS in Additional Input. Option C shows how to do this using a JSON object with two properties: "DBExtractAction: Account" and "DBExtractAction:SecondaryAccount". The values of these properties are the same as in the SEND/RESPONSE TRANSFORMATIONS.

NEW QUESTION # 59

A developer is creating a Flex Card for a new Community page. The FlexCard will display case information along with action to close the case and update the case. And it will be styled using the Community's theme. What must the developer do to configure the FlexCard for deployment in a community?

- A. Configure the Component visibility in the custom Component.
- B. Set the Developer property in Card Configuration to "Community"
- **C. Set the Target property in publishing Options to the Community page"**
- D. Add the FlexCard's API name to FlexCard Player component

Answer: C

Explanation:

The Target property in publishing Options determines where the FlexCard will be displayed. Setting it to the Community page will make the FlexCard available in the community

NEW QUESTION # 60

.....

Our service tenet is to let the clients get the best user experiences and be satisfied. From the research, compiling, production to the sales, after-sale service, we try our best to provide the conveniences to the clients and make full use of our Plat-Dev-210 study materials. We organize the expert team to compile the Plat-Dev-210 Study Materials elaborately and constantly update them. To let the clients have a fundamental understanding of our Plat-Dev-210 study materials, we provide the free trials before their purchasing.

100% Plat-Dev-210 Exam Coverage: https://www.dumpkiller.com/Plat-Dev-210_braindumps.html

Do you want to get the valid and latest study material for 100% Plat-Dev-210 Exam Coverage - Salesforce Certified Omnistudio Developer actual test, Dumpkiller is the best source of preparation for the Salesforce Plat-Dev-210 exam, Salesforce Latest Plat-Dev-210 Exam Objectives These are real questions you will encounter in the exam, Bundle of Plat-Dev-210 questions is provided by our Salesforce Developer team for your practice and after attempting these questions we also provide their structural answers to make you correct your attempted mistakes so that these mistakes are not repeated in the real Salesforce Plat-Dev-210 exam, Salesforce Latest Plat-Dev-210 Exam Objectives They are the versions of the PDF, Software and APP online.
