## Best CISSP : Certified Information Systems Security Professional (CISSP) Exam Torrent Provide Three Versions for choosing

Do you still worry about that you can't find an ideal job and earn low wage? Do you still complaint that your working abilities can't be recognized and you have not been promoted for a long time? You can try to obtain the CISSP certification and if you pass the exam you will have a high possibility to find a good job with a high income. If you buy our CISSP questions torrent you will pass the exam easily and successfully. Our CISSP Study Materials are compiled by experts and approved by professionals with experiences for many years. We provide 3 versions for the client to choose and free update. Different version boosts different advantage and please read the introduction of each version carefully before your purchase.

## How to earn ACSA credential?

The candidate must earn 40 continuing education units (CEUs) for the ACSA credential. The CEUs may be earned through participation in the ISSA-certified training course, obtaining CEUs from any other Information Systems Security Association (ISSA) member, obtaining certification credits for passing the exam, or through participating in many other online sites.

The Associate level requires passing one exam to achieve. The ACSA credential is defined as conforming to the requirements of NCEES, the American Society for Testing and Materials (ASTM), and the International Information Systems Security Certification

Consortium (ISC). Passing this exam does not qualify a candidate for any CISSP Certification nor does it make an individual eligible for any other ISC credential. The Associate level of certification requires passing one exam to achieve. The ACSA credential is defined as conforming to the requirements of NCEES, the American Society for Testing and Materials (ASTM), and the International Information Systems Security Certification Consortium (ISC). The test will not earn a CISSP valid certification.

## ISC Certified Information Systems Security Professional (CISSP) Sample Questions (Q118-Q123):

### NEW QUESTION # 118

A network scan found 50% of the systems with one or more critical vulnerabilities. Which of the following represents the BEST action?

- A. Assess vulnerability risk and program effectiveness.
- B. Disconnect systems with the most number of vulnerabilities.
- C. Assess vulnerability risk and business impact.
- D. Disconnect all systems with critical vulnerabilities.

**Answer: C**

Explanation:

The best action after finding 50% of the systems with one or more critical vulnerabilities is to assess the vulnerability risk and business impact. This means to evaluate the likelihood and severity of the vulnerabilities being exploited, as well as the potential consequences and costs for the business operations and objectives.

This assessment can help prioritize the remediation efforts, allocate the resources, and justify the investments.

\* A. Assess vulnerability risk and program effectiveness is not the best action after finding 50% of the systems with one or more critical vulnerabilities, because it does not consider the business impact of the vulnerabilities, which is essential for risk management and decision making.

\* C. Disconnect all systems with critical vulnerabilities is not the best action after finding 50% of the systems with one or more critical vulnerabilities, because it could disrupt the business continuity and availability, and it could also be impractical or impossible to disconnect such a large number of systems.

\* D. Disconnect systems with the most number of vulnerabilities is not the best action after finding 50%

\* of the systems with one or more critical vulnerabilities, because it does not account for the severity and exploitability of the vulnerabilities, and it could also affect the business operations and performance.

### NEW QUESTION # 119

At a MINIMUM, a formal review of any Disaster Recovery Plan (DRP) should be conducted

- A. quarterly.
- B. annually.
- C. bi-annually.
- D. monthly.

**Answer: B**

### NEW QUESTION # 120

Which of the following is NOT a proper component of Media Viability Controls?

- A. Storage
- B. Marking
- C. Handling
- D. Writing

**Answer: D**

Explanation:

Media Viability Controls include marking, handling and storage.

#### NEW QUESTION # 121

Which of the following was developed as a simple mechanism for allowing simple network terminals to load their operating system from a server over the LAN?

- A. ARP
- B. DHCP
- C. BootP
- D. DNS

**Answer: C**

Explanation:

BootP was developed as a simple mechanism for allowing simple network terminals to load their operating system from a server over the LAN. Over time, it has expanded to allow centralized configuration of many aspects of a host's identity and behavior on the network. Note that DHCP, more complex, has replaced BootP over time. #### NEW QUESTION # 122

Application of which of the following Institute of Electrical and Electronics Engineers (IEEE) standards will prevent an unauthorized wireless device from being attached to a network?

- A. IEEE 802.1X
- B. IEEE 802.1F
- C. IEEE 802.1H
- D. IEEE 802.1Q

**Answer: A**

Explanation:

IEEE 802.1X is a standard for port-based Network Access Control (PNAC). It provides an authentication mechanism to devices wishing to attach to a LAN or WLAN, preventing unauthorized devices from gaining network access.

\* A. IEEE 802.1F is not a valid IEEE standard.

\* B. IEEE 802.1H is a standard for transparent interconnection of lots of links (TRILL), which is a protocol for routing at the link layer.

\* C. IEEE 802.1Q is a standard for virtual LANs (VLANs), which is a technique for logically segmenting a network.
