You can save a lot of time for collecting real-time information. In order to ensure that you can see the updated AZ-700 practice prep as soon as possible, our system sends the updated information to your email address first timing. In order to avoid the omission of information, please check your email regularly.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q123-Q128):

NEW QUESTION # 123

You have an Azure Front Door instance that provides access to a web app. The web app uses a hostname of `www.contoso.com`. You have the routing rules shown in the following table.

Which rule will apply to each incoming request? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/frontdoor/front-door-route-matching>

NEW QUESTION # 124

Your on-premises network contains the subnets shown in the following table.

☐ The network contains a firewall named FW1 that uses a public IP address of 131.107.100.200.

You have an Azure subscription that contains the resources shown in the following table.

☐ You plan to configure a Site-to-Site (S2S) VPN named VPN1 that will connect GW1 to FW1.

You need to configure LNG1 to support VPN1. The solution must meet the following requirements:

* Ensure that the resources on Subnet1 and Subnet2 can communicate with the resources on VNet1.

* Minimize administrative effort.

How should you configure LNG1? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation:

☐

NEW QUESTION # 125

You have an Azure subscription that contains the resources shown in the following table.

☐ The IP Addresses settings for Vnet1 are configured as shown in the exhibit.

☐ You need to ensure that you can integrate WebApp1 and Vnet1.

Which three actions should you perform in sequence before you can integrate WebApp1 and Vnet1? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

☐ Explanation:

☐

Reference:

<https://docs.microsoft.com/en-us/azure/app-service/web-sites-integrate-with-vnet#gateway-required-vnet-integration>

NEW QUESTION # 126

You need to meet the network security requirements for the NSG flow logs.

Which type of resource do you need, and how many instances should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐

NEW QUESTION # 127

Azure virtual networks in the East US Azure region as shown in the following table.

☐ The virtual networks are peered to one another. Each virtual network contains four subnets.

You plan to deploy a virtual machine named VM1 that will inspect and route traffic between all the subnets on both the virtual networks.

What is the minimum number of IP addresses that you must assign to VM1?

- A. 0
- B. 1
- C. 2

- Answer: D**
