## AAPC-CPC Clear Exam, AAPC-CPC New Test Camp

The contents of AAPC-CPC exam torrent was all compiled by experts through the refined off textbooks. Hundreds of experts simplified the contents of the textbooks, making the lengthy and complex contents easier and more understandable. With AAPC-CPC study tool, you only need 20-30 hours of study before the exam. AAPC-CPC guide torrent provides you with a brand-new learning method. In the course of doing questions, you can memorize knowledge points. You no longer need to look at the complicated expressions in the textbook. Especially for those students who are headaches when reading a book, AAPC-CPC Study Tool is their gospel. Because doing exercises will make it easier for one person to concentrate, and at the same time, in the process of conducting a mock examination to test yourself, seeing the improvement of yourself will makes you feel very fulfilled and have a stronger interest in learning. AAPC-CPC guide torrent makes your learning process not boring at all.

## Medical Tests American Academy of Professional Coders: Certified Professional Coder Sample Questions (Q57-Q62):

### NEW QUESTION # 57

If in the assessment, the provider reports diabetes and dermatitis due to oils, which diagnosis code(s) should be reported?

- A. E11.620
- B. E11.9, L24.1
- C. E11.69, L24.1
- D. None of the above-query the provider to clarify which type of diabetes the patient has

**Answer: B**

Explanation:

When the documentation does not specify which type of diabetes is present, always default to type II. Although there is a causal relationship assumed between diabetes and dermatitis, the documentation reflects that the dermatitis is due to oils, not diabetes. Because the manifestation of dermatitis is not associated with the diabetes, the correct code would be E11.9: diabetes type II without complications.

### NEW QUESTION # 58

Code a polyp found in the transverse colon.

- A. K63.5
- B. D12.3
- C. K51.40
- D. D12.6

**Answer: A**

Explanation:

Coding crosswalk for a colon polyp would direct the coder to the benign neoplasm table.

However, careful examination of the guidelines reveals that if the documentation does not specifically state that a polyp was adenomatous and/or benign, or that a polyp was inflammatory, the most appropriate choice selection would be a code from K63.

### NEW QUESTION # 59

A patient is in labor with plans to deliver vaginally. An epidural is administered at 17:30. After several hours of pushing, the obstetrician determines that the cervix is swollen, and the baby must be delivered via a c-section. The patient consents, the baby is delivered, and both are discharged to the recovery room at 22:15. What CPT code(s) should the anesthesiologist report?

- A. 01967-23, 01968
- B. 01967, 01968
- C. 01967-23, 01968, 99140
- D. 01967, 01968, 99140

**Answer: A**

Explanation:

For a planned vaginal delivery with the use of an epidural, followed by a Cesarean delivery, the correct CPT codes are 10967 followed by add-on code 01968. CPT code 99140 is an add-on code portraying that the procedure was an emergency and that the patient and/or baby has a significant increase in the threat to life. The documentation gives no indication that these services were emergent. Modifier 23 is reported for unusual anesthesia services. This would include—but is not limited to—the use of general anesthesia for a procedure that usually requires only a local anesthetic or none and/or a procedure extending more than 4 hours. In this case, the total procedure time was 4.75 hours, and modifier 23 is appended on the primary procedure code only.

### NEW QUESTION # 60

A physician provides a GIPO 39-weeks twin gestational patient with antepartum care, delivery, and postpartum care. Baby A was delivered vaginally without complications, and Baby B was delivered by Cesarean due to fetal tachycardia. Assign the correct ICD-10-CM and CPT codes.

- A. 59410, Z37.2 and 59510-51, 076, Z37.2
- B. 59409, Z3A.39, Z37.o and 59510-51, 076, Z3A39, Z37.o
- C. 59510, 076, Z3A39, Z37.o and 59409-51, Z3A39, Z37.o
- D. 59400, Z37.o and 59510-51, 036.8332, Z37.o

**Answer: C**

Explanation:

The Cesarean delivery (59510) would be sequenced first because this code has the highest RVU and would include the antepartum and postpartum care. The vaginal delivery by itself (59409), without antepartum and postpartum care, would be reported secondary because the charges for the antepartum and postpartum care of the mother have already been included in the Cesarean delivery code.

### NEW QUESTION # 61

The base unit for anesthesia CPT code 00600 is 10 units. If an anesthesiologist spends 105 minutes in the procedure room with a patient, how many units should be reported for reimbursement?

- A. 17 units
- B. 14 units
- C. 11 units
- D. 12 units

**Answer: A**

Explanation:

To calculate the total number of units, it is important to understand that anesthesia time is measured in 15-minute intervals (or in fractions thereof). In this scenario, take the total number of minutes spent on the procedure (105) and divide it by 15. The total number of time units is 7. The time units are then added to the base unit (10) for a total of 17 units.

## NEW QUESTION # 62

.....

Our AAPC-CPC study materials are compiled and verified by the first-rate experts in the industry domestically and they are linked closely with the real exam. Our products' contents cover the entire syllabus of the exam and refer to the past years' exam papers. Our test bank provides all the questions which may appear in the real exam and all the important information about the exam.
