

# Test4Sure Offers Actual and Updated Huawei H12-841\_V1.5 Practice Questions

Huawei H12-211

**Huawei Certified Network Associate- Huawei  
Networking Technology and Device  
Version: 6.0**

Our company is a professional certificate exam materials provider, we have occupied in this field for years, and we have rich experiences. H12-841\_V1.5 exam cram is edited by professional experts, and they are quite familiar with the exam center, and therefore, the quality can be guaranteed. In addition, H12-841\_V1.5 training materials contain both questions and answers, and it also has certain quantity, and it's enough for you to pass the exam. In order to strengthen your confidence for H12-841\_V1.5 Training Materials , we are pass guarantee and money back guarantee, if you fail to pass the exam we will give you full refund, and no other questions will be asked.

Test4Sure Huawei H12-841\_V1.5 exam information are cheap and fine. We use simulation questions and answers dedication to our candidates with ultra-low price and high quality. We sincerely hope that you can pass the exam. We provide you with a convenient online service to resolve any questions about Huawei H12-841\_V1.5 Exam Questions for you.

## **100% Pass Quiz Huawei - H12-841\_V1.5 Accurate Reliable Real Exam**

The prominent benefits of HCIP-Datacom-Campus Network Planning and Deployment V1.5 certification exam are validation of skills, updated knowledge, more career opportunities, instant rise in salary, and advancement of the career. Obviously, every serious professional wants to gain all these advantages. With the Huawei H12-841\_V1.5 Certification Exam, you can achieve this goal nicely and quickly.

## Huawei HCIP-Datacom-Campus Network Planning and Deployment V1.5 Sample Questions (Q247-Q252):

### NEW QUESTION # 247

In troubleshooting MPLS VPN networks, if "MPLS LSPs have been established between PE devices, but VPN data still cannot be forwarded," which of the following troubleshooting steps should be performed first?

- A. Check the MPLS protocol configuration on the P device.
- B. Check the hardware status of the CE device.
- C. Check if the physical links between PE devices are working properly.
- **D. Check the binding relationship between VPN instances and interfaces on the PE device.**

**Answer: D**

### NEW QUESTION # 248

In the wide area network IPv6 transition scenario, which of the following technologies can achieve "smooth interoperability between IPv4 and IPv6 services" and ensure service continuity? (Multiple choice)

- **A. NAT64 (enabling IPv6 terminals to access IPv4 resources)**
- B. Directly disable the IPv4 protocol and force all services to switch to IPv6.
- **C. IPv6 over IPv4 tunnels (such as GRE tunnels, which encapsulate IPv6 packets for transmission over IPv4 networks)**
- **D. Dual-stack technology (the device runs both IPv4 and IPv6 protocol stacks simultaneously)**
- E. Without transition technology, IPv4 and IPv6 terminals cannot communicate with each other .

**Answer: A,C,D**

### NEW QUESTION # 249

In Huawei's SD-WAN solution, which of the following technologies can "real-time monitoring of the health status of the VPN tunnel between branch devices and headquarters, triggering alarms when abnormalities occur"?

- A. Disable tunnel monitoring function and rely on service interruption to detect anomalies.
- B. The tunnel condition is manually inspected periodically, and manual alarms are triggered when abnormalities are detected.
- **C. Tunnel connectivity detection based on ICMP ping (periodically sending ping packets, triggering an alarm if timeout occurs).**
- D. Only monitor the physical status of the link, not the logical status of the tunnel.

**Answer: C**

### NEW QUESTION # 250

(Which of the following roles is not a core role in Huawei's free mobility solution?)

- A. Authentication device
- **B. Policy control device**
- C. iMaster NCE-Campus
- D. Policy enforcement device

**Answer: B**

Explanation:

Huawei's free mobility solution is designed to provide consistent user access control and policy enforcement across the campus network, regardless of user location. According to HCIP Datacom Campus Network documentation, the solution is built around several clearly defined core roles, each with specific responsibilities.

The authentication device is a core role. It performs user authentication using methods such as 802.1X, MAC authentication, or portal authentication, and associates user identity information with IP addresses or security groups.

The policy enforcement device is also a core role. It enforces security and access control policies based on IP- security group information, ensuring that traffic complies with defined policies wherever the user is connected.

iMaster NCE-Campus is another core component of the free mobility solution. It acts as the centralized management and control

platform, responsible for policy definition, IP-security group management, and coordination of information distribution between authentication points and policy enforcement points.

The policy control device, however, is not a core role explicitly defined in Huawei's free mobility architecture.

Policy control functions are integrated into iMaster NCE-Campus rather than implemented as a separate standalone device role.

Therefore, "policy control device" is not recognized as a core role in the free mobility solution.

As a result, option B is the correct answer, while the other options represent essential components of Huawei's free mobility solution as defined in HCIP Datacom Campus Network materials.

#### NEW QUESTION # 251

In Huawei's SD-WAN solution, which of the following technologies can "enable branch devices to establish IPsec VPN tunnels with headquarters in a NAT environment without manually configuring NAT mapping"?

- A. Disable the address translation function of the NAT device and communicate directly using the public IP address.
- B. Manually configure port forwarding on the NAT device to expose the public IP address of the branch device.
- C. All branch devices use the same public IP address, and a tunnel is established through port multiplexing.
- D. SD-WAN NAT traversal technology (branch actively initiates tunnel connections to headquarters, traversing NAT)

Answer: D

#### NEW QUESTION # 252

.....

With more than thousands of satisfied applicants in multiple countries, we guarantee that you will clear the Huawei H12-841\_V1.5 exam as quickly as possible by using our product. In this way, Exams.SOLutions save you time and money. In addition to all these excellent offers, in any case despite properly studying with H12-841\_V1.5 Practice Test material.
