They are almost all the keypoints and the latest information contained in our 350-201 Study Materials that you have to deal with in the real exam. And we have high pass rate of our 350-201 exam questions as 98% to 100%. It is hard to find in the market.

Cisco Performing CyberOps Using Cisco Security Technologies Sample Questions (Q121-Q126):

NEW QUESTION # 121
A SOC analyst is notified by the network monitoring tool that there are unusual types of internal traffic on IP subnet 103.861.2117.0/24. The analyst discovers unexplained encrypted data files on a computer system that belongs on that specific subnet. What is the cause of the issue?

- A. malware outbreak
- B. virus outbreak

- C. DDoS attack
- D. phishing attack

Answer: A

Explanation:
The presence of unusual internal traffic and unexplained encrypted data files suggests a malware outbreak. Malware can cause abnormal network traffic patterns and encrypt files on infected systems, often leading to ransomware attacks or data exfiltration efforts

NEW QUESTION # 122

Drag and drop the function on the left onto the mechanism on the right.

Answer:

Explanation:

NEW QUESTION # 123

A SOC team receives multiple alerts by a rule that detects requests to malicious URLs and informs the incident response team to block the malicious URLs requested on the firewall. Which action will improve the effectiveness of the process?

- A. Inform the user by enabling an automated email response when the rule is triggered.
- B. Create an automation script for blocking URLs on the firewall when the rule is triggered.
- C. Inform the incident response team by enabling an automated email response when the rule is triggered.
- D. Block local to remote HTTP/HTTPS requests on the firewall for users who triggered the rule.

Answer: D

NEW QUESTION # 124

A new malware variant is discovered hidden in pirated software that is distributed on the Internet. Executives have asked for an organizational risk assessment. The security officer is given a list of all assets. According to NIST, which two elements are missing to calculate the risk assessment? (Choose two.)

- A. asset vulnerability assessment
- B. report of staff members with asset relations
- C. key assets and executives
- D. malware analysis report
- E. incident response playbooks

Answer: A,D

Explanation:

NEW QUESTION # 125

An organization is using a PKI management server and a SOAR platform to manage the certificate lifecycle.
The SOAR platform queries a certificate management tool to check all endpoints for SSL certificates that have either expired or are nearing expiration. Engineers are struggling to manage problematic certificates outside of PKI management since deploying certificates and tracking them requires searching server owners manually.
Which action will improve workflow automation?

- A. Integrate a SOAR solution with Active Directory to pull server owner details from the AD and send an automated email for problematic certificates requesting updates.
- B. Implement a new workflow within SOAR to create tickets in the incident response system, assign problematic certificate update requests to server owners, and register change requests.
- C. Implement a new workflow for SOAR to fetch a report of assets that are outside of the PKI zone, sort assets by

- D. Integrate a PKI solution within SOAR to create certificates within the SOAR engines to track, update, and monitor problematic certificates.

Answer: C

NEW QUESTION # 126

......

Though the content of our 350-201 practice guide is the same, the varied formats indeed bring lots of conveniences to our customers. The PDF version of 350-201 exam materials can be printed so that you can take it wherever you go. And the Software version can simulate the real exam environment and support offline practice. Besides, the APP online can be applied to all kind of electronic devices. No matter who you are, I believe you can do your best to achieve your goals through our 350-201 Preparation questions!
