P.S. Free & New H13-511_V5.5 dumps are available on Google Drive shared by Itcertmaster: <https://drive.google.com/open?id=1AMHWixsUpICOFVFPcNM9O-qSJCbd1kTA>

As a brand in the field, our H13-511_V5.5 exam questions are famous for their different and effective advantages. Our professional experts have developed our H13-511_V5.5 study materials to the best. So if you buy them, you will find that our H13-511_V5.5 learning braindumps are simply unmatched in their utility and perfection. Our huge clientele is immensely satisfied with our product and the excellent passing rate of our H13-511_V5.5 simulating exam is the best evidence on it.

Huawei H13-511_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Be able to design and deploy Huawei's FusionCompute virtualization solution and FusionAccess desktop solution: This section covers the practical skills needed to architect and implement Huawei's enterprise virtualization platform FusionCompute and their desktop virtualization product FusionAccess. It includes planning, configuration, and deployment procedures for these Huawei-specific solutions.
Topic 2	<ul style="list-style-type: none">Describe what cloud computing is: This topic covers the fundamental definition and concept of cloud computing technology. It explains how cloud computing enables on-demand access to shared computing resources over the internet.

Topic 3	<ul style="list-style-type: none"> Describe the history of cloud computing: This section traces the evolution and development of cloud computing from its origins to its current state. It provides historical context for how cloud technology emerged and transformed over time.
Topic 4	<ul style="list-style-type: none"> Be able to describe what virtualization is: This topic covers the concept of virtualization technology and how it enables multiple virtual instances to run on physical hardware. It explains the foundational role virtualization plays in creating isolated computing environments.

Exam Dumps Huawei H13-511_V5.5 Provider, H13-511_V5.5 Valid Braindumps Sheet

One of the most effective ways to prepare for the HCIA-Cloud Computing V5.5 H13-511_V5.5 exam is to take the latest Huawei H13-511_V5.5 exam questions from Itcertmaster. Many candidates get nervous because they don't know what will happen in the final HCIA-Cloud Computing V5.5 H13-511_V5.5 exam. Taking H13-511_V5.5 exam dumps from Itcertmaster helps eliminate exam anxiety. Itcertmaster has designed this set of real Huawei H13-511_V5.5 PDF Questions in accordance with the H13-511_V5.5 exam syllabus and pattern. You can gain essential knowledge and clear all concepts related to the final exam by using these H13-511_V5.5 practice test questions.

Huawei HCIA-Cloud Computing V5.5 Sample Questions (Q105-Q110):

NEW QUESTION # 105

Which of the following statements about FusionAccess for office automation (OA) is false?

- A. FusionAccess can be interconnected with existing enterprise IT systems to use existing IT applications.
- B. Enterprise Active Directory (AD) is an important component of FusionAccess, and users must be authenticated by AD before logging in to virtual desktops.
- C. FusionAccess has three zones (red, yellow, and green). These zones are isolated from each other and have their own FusionAccess systems. Data can be transmitted between them.**
- D. Zone-based security is high, easy to deploy, and meets the security management requirements of most enterprises.

Answer: C

Explanation:

FusionAccess OA security architecture adopts zone-based isolation (red, yellow, green zones).

- * Each zone is logically and physically isolated
- * Each zone has its own FusionAccess system
- * Data is not allowed to flow freely between zones

Option B is false because it incorrectly states that data can be transmitted between zones. The other statements correctly reflect FusionAccess OA security and integration characteristics.

NEW QUESTION # 106

During FusionAccess virtual desktop provisioning, which of the following components receives the registration request sent by the desktop VM?

- A. HDA
- B. HDC**
- C. ITA
- D. GaussDB

Answer: B

Explanation:

In the FusionAccess architecture, the successful startup and availability of a virtual desktop depend on a process known as "VM Registration." According to the Huawei HCIA-Cloud Computing curriculum, the component responsible for receiving and

processing these registration requests is the HDC (Huawei Desktop Controller).

The process works as follows: Each virtual desktop VM has a resident software agent called the HDA (Huawei Desktop Agent). When the VM boots up and the network is initialized, the HDA sends a registration request over the internal management network. This request contains the VM's status, its IP address, and its unique identifier. The HDC acts as the central "command and control" center of the desktop cloud. It listens for these requests, verifies the VM's credentials against the system database (GaussDB), and updates the VM's status to "Ready" or "In Use."

The HDC is the core logical component that manages the relationship between users and their virtual desktops. If the HDC does not receive the registration request—perhaps due to a network issue or a failure of the HDA service on the VM—the desktop will appear as "Unregistered" or "Offline" in the management portal, and users will be unable to log in through the Web Interface (WI). While the ITA (IT Adapter) is used by administrators to trigger the provisioning of the VM, it does not handle the real-time registration traffic of individual VMs. Similarly, the HDA is the sender of the request, not the receiver. Understanding the HDC's role as the registration authority is a fundamental requirement for troubleshooting connection issues and mastering the FusionAccess component interactions taught in the HCIA certification.

NEW QUESTION # 107

When setting the cluster IMC policy in FusionCompute, if there are hosts in the cluster, the CPU function set of the hosts under the cluster must be equal to or higher than the set target benchmark function set.

- A. False
- **B. True**

Answer: B

NEW QUESTION # 108

To create a template in FusionAccess desktop cloud, which of the following accounts must be filled in as the temporary account when installing the Windows operating system?

- A. AreaAccount
- **B. LocalAccount**
- C. Private Account
- D. safeAccount

Answer: B

NEW QUESTION # 109

If a desktop on fusion access needs to call the camera of a terminal, device redirection is recommended is this true or false

- A. false
- **B. true**

Answer: B

NEW QUESTION # 110

.....

We know that once we sell fake products to customers, we will be knocked out by the market. So we strongly hold the belief that the quality of the H13-511_V5.5 practice materials is our lifeline. When you begin practicing our H13-511_V5.5 study materials, you will find that every detail of our H13-511_V5.5 study questions is wonderful. Because that we have considered every detail on the developing the exam braindumps, not only on the designs of the content but also on the displays.
