CPRE-FL_Syll_3.0 Exam is available in several languages and can be taken in-person, online or at approved testing centers worldwide.

ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q27-Q32):

NEW QUESTION # 27

Complete the sentence:

"Once a requirement is implemented in an operational product, _____ is required to change it."

- A. A stricter than normal process
- B. The same usual process
- C. No process
- D. A less formal process

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

When a requirement is only on paper, changing it mainly affects documentation and plans. After implementation in a live system, changes may impact users, safety, regulatory compliance and integration with other systems. Therefore, the handbook recommends a stricter change-management process for operational products: formal impact analysis, approvals (e.g., change advisory board), regression testing and possibly stakeholder communication. This is stricter than the standard change procedure used earlier in development. So option A correctly reflects the need for stronger governance.

NEW QUESTION # 28

Based on a UML class diagram relating managers, workers, and projects, which of the following statements are correct?

- A. 1 manager can manage 2 projects.
- B. 11 workers may work in a single project.
- C. 1 manager can manage 1 single project.
- D. There are up to 12 workers to work on a given number of projects.

Answer: A,B,C,D

NEW QUESTION # 29

You wish to define technically relevant terms in a project. Indicate true or false for the following statements in order to complete the sentence beginning "The definition of technically relevant terms ..." (2 Points)

True	False	
A	B	... is a desirable, but not strictly necessary component of requirement documents.
C	D	... Must establish for technical terms their meaning for the system to be specified.
E	F	... Must be cross-project in nature.
G	H	... Is always made more understandable by means of additional examples and counterexamples.

Answer:

Explanation:

B, C, F, G

NEW QUESTION # 30

Choose the right options regarding tools to support Requirements Engineering.

- A. After acquiring a new tool, it is a good practice to initially use it redundantly alongside an existing project.
- B. When choosing a tool, the most important thing is to evaluate if the tool can be adapted to the existing RE process and working method.
- C. The RE process can be changed due to the tool selected.
- D. It is perfectly fine to use basic office tools to manage requirements.

Answer: A,C
