# HP HPE7-J02 Positive Feedback, HPE7-J02 Latest Exam Review

P.S. Free & New HPE7-J02 dumps are available on Google Drive shared by PassTorrent: https://drive.google.com/open?id=1yNsBAGsmPy_u5WqBqlucg9ZM37jQiz3R

We also update frequently to guarantee that the client can get more learning HPE7-J02 exam resources and follow the trend of the times. So if you use our HPE7-J02 study materials you will pass the test with high success probability. And our HPE7-J02 learning guide is high-effective. If you study with our HPE7-J02 practice engine for 20 to 30 hours, then you can pass the exam with confidence and achieve the certification as well.

HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	• HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.
Topic 2	• Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.
Topic 3	• Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.
Topic 4	• Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.
Topic 5	• Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.
Topic 6	• Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.

HPE7-J02 Latest Exam Review | HPE7-J02 Paper

Are you still hesitating about which kind of HPE7-J02 exam torrent should you choose to prepare for the exam in order to get the related certification at ease? Our HPE7-J02 Exam Torrent can help you get the related certification at ease and HPE7-J02 Practice Materials are compiled by our company for more than ten years. I am glad to introduce our study materials to you. Our company has already become a famous brand all over the world in this field since we have engaged in compiling the HPE7-J02 practice materials for more than ten years and have got a fruitful outcome. You are welcome to download it for free in this website before making your final decision.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45
Your customer has just gone through a merger and is consolidating datacenters. They are currently using a mix of manufacturers. They are evaluating whether to consolidate on HPE as their new standard. You are helping them size their new virtualized environment.
What additional information do you need to decide on an assessment tool?

- A. If they are virtualized on VMware or Hyper-V
- B. If any equipment has expired support contracts
- C. If they are only purchasing in a CapEx model
- D. If they are using AWS or Azure public cloud storage

Answer: A

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
The choice of assessment tool (e.g., HPE CloudPhysics for VMware vs. CloudPhysics.vhdx collector for Hyper-V) depends primarily on the virtualization platform in use. VMware and Hyper-V require different collectors, and this is the deciding factor for tool selection.
Distractors:
A: Public cloud use matters for hybrid sizing but not for tool selection.
C: Expired contracts are unrelated to tool choice.
D: Procurement model (CapEx vs. GreenLake) is separate from sizing assessment.
Key Concept: Assessment tool choice = based on hypervisor platform (VMware vs Hyper-V).
Reference: HPE CloudPhysics Assessment Guide.

NEW QUESTION # 46
Your customer has expressed an interest in an HPE CloudPhysics assessment of their environment. They would like to know what to expect from this process.
Which of the following statements is true of a CloudPhysics assessment?

- A. Some assessment results are visible in only 2 hours.
- B. The assessment period lasts for 5 business days.
- C. An auto-generated token from HPE is required to view the results.
- D. Your customer can only access a partial view of the results.

Answer: A

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
HPE CloudPhysics begins collecting performance and capacity data immediately after deployment of the Observer VM/collector.

Some initial assessment results (e.g., environment inventory, early utilization stats) can be visible within 2 hours, while deeper trending insights require longer data collection (days/weeks).
Distractors:
B: Tokens are not required for customers to view results; reports are available via the portal.
C: Customers get a full dashboard view of results, not partial.
D: Assessments can run for longer periods (days-weeks), not fixed at 5 days.
Key Concept: CloudPhysics delivers initial insights within hours.
Reference: HPE CloudPhysics Technical Overview.

NEW QUESTION # 47
Two HPE Storage Alletra MP B10000 arrays are deployed with Active Peer Persistence. Both arrays and hosts are installed in close proximity to each other. To enable symmetric access, Peer Persistence must be configured accordingly.
Which Host Proximity Parameter should be selected for host ESX31 in this case?

- A. All
- B. Exclusive
- C. Primary
- D. Secondary

Answer: A

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
Option B (All) is correct because in an Active Peer Persistence deployment where both arrays and hosts are in close proximity (metro or campus cluster scenario), the hosts should be configured with Host Proximity = All. This ensures that the host (ESX31) can access both arrays symmetrically and concurrently, enabling active-active paths. This is essential to deliver seamless failover and load balancing across the arrays in an HPE Alletra MP Peer Persistence environment.
Analysis of Incorrect Options (Distractors):
A (Secondary): This is used for hosts located closer to the secondary array, to bias access toward it in asymmetric deployments.
Not applicable here since the hosts are near both arrays.
C (Exclusive): This option assigns the host to a single array exclusively, preventing dual-active access.
This would defeat the purpose of symmetric Peer Persistence.
D (Primary): Similar to Secondary, this biases access to only the primary array, which is not correct when arrays and hosts are in the same site for active-active.
Key Concept:
This question focuses on Host Proximity parameters in HPE Peer Persistence.
Primary/Secondary = asymmetric designs (hosts closer to one array).
All = symmetric design (hosts equidistant to both arrays, enabling active-active).
Exclusive = restricts access to one array only.

HPE Primera/Alletra Remote Copy and Peer Persistence Technical White Paper VMware Metro Storage Cluster with HPE Peer Persistence Implementation Notes

NEW QUESTION # 48
Your customer is using 2 HPE StoreOnce appliances across 2 sites with replication enabled for disaster recovery. They are concerned about the fact that the StoreOnce administrators have full access to the systems, which allows them to delete backup copies on these systems.
What needs to be used to address the concern of your customer?

- A. Dual Authorization
- B. Resource restriction policies
- C. Data at rest encryption
- D. Challenge Handshake Authentication Protocol (CHAP)

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE StoreOnce Dual Authorization prevents a single administrator from deleting, expiring, or modifying backup data. Instead, any destructive action requires approval from a second administrator, mitigating insider threats and accidental deletions. This is the correct feature for immutability protection in a replicated StoreOnce environment.

Distractors:

B (CHAP): Used for iSCSI authentication, not backup immutability.

C: Encryption protects data confidentiality, not accidental deletion.

D: Resource restrictions are policy-driven but don't enforce dual control over destructive actions.

Key Concept: Dual Authorization for ransomware and insider-threat protection on StoreOnce.

Reference: HPE StoreOnce Security Features White Paper.

NEW QUESTION # 49

Your customer is beginning to convert their applications to cloud-native apps on Kubernetes. They are considering HPE GreenLake for Containers.

Which statement about this platform is true?

- A. Provides open-source Kubernetes with simplified management.
- B. Supports only cloud-native applications.
- C. Supports legacy virtualization technologies with manual configuration for containers.
- D. Provides tools for orchestration of containers without microservices support.

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE GreenLake for Containers delivers an enterprise-grade Kubernetes platform, leveraging open- source Kubernetes but with simplified lifecycle management, monitoring, and integration with HPE infrastructure. It provides full support for containerized workloads, whether cloud-native or modernized traditional applications.

Distractors:

A: Incorrect - not about legacy virtualization.

B: Incorrect - microservices are supported; orchestration is Kubernetes-native.

D: Incorrect - it supports both cloud-native and modernized workloads.

Key Concept: GreenLake for Containers = Kubernetes with simplified enterprise management.

Reference: HPE GreenLake for Containers Overview.

NEW QUESTION # 50

......

We don't just want to make profitable deals, but also to help our users pass the exams with the least amount of time to get HPE7-J02 certificate. Choosing our HPE7-J02 exam practice, you only need to spend 20-30 hours to prepare for the exam. Maybe you will ask whether such a short time can finish all the content, we want to tell you that you can rest assured ,because our HPE7-J02 Learning Materials are closely related to the exam outline and the questions of our HPE7-J02 guide questions are related to the latest and basic knowledge. You will pass the HPE7-J02 exam only with our HPE7-J02 exam questions.
