NEW QUESTION # 83

What settings are controlled by the freight unit type? Note: There are 3 correct answers to this question.

- A. Change controller settings
- B. Tendering settings
- C. Freight unit building rule
- D. Organizational unit determination
- E. Direct shipment options

Answer: C,D,E

Explanation:

In SAP S/4HANA Transportation Management, the freight unit type defines key settings that govern the behavior of freight units during planning and execution. According to the SAP documentation, the freight unit type controls:

* Direct shipment options (A): Specifies whether the freight unit can be converted directly to a freight order for direct shipment scenarios.

* Freight unit building rule (C): Determines how freight units are created and consolidated (e.g., based on sales order items or deliveries).

* Organizational unit determination (E): Defines which organizational units (e.g., planning or execution units) are responsible for the freight unit.

The other options are incorrect:

* Tendering settings (B) are defined in tendering profiles, not freight unit types.

* Change controller settings (D) are configured at the document level (e.g., freight order) or in change controller strategies, not in freight unit types.
