We also hired a dedicated staff to constantly update 1Z0-1061-24 exam torrent. With 1Z0-1061-24 exam guide, you do not need to spend money on buying any other materials. During your preparation, 1Z0-1061-24 exam torrent will accompany you to the end.

## Oracle CX Sales 2024 Implementation Professional Sample Questions (Q292-Q297):

### NEW QUESTION # 292

Which feature should be used to optimize data loading performance in Oracle Profitability and Cost Management Cloud Service?

- **A. Incremental Data Loading**
- B. Dynamic Cube Customization
- C. Hierarchy Flattening
- D. Calculation Manager

**Answer: A**

Explanation:

Option 1: Correct. Incremental Data Loading is a feature in Oracle Profitability and Cost Management Cloud Service that allows users to load only the changes made to the data, rather than reloading the entire dataset. This can significantly improve performance when loading large amounts of data. Option 2: Incorrect. Hierarchy Flattening is a feature in Oracle Profitability and Cost Management Cloud Service that allows users to flatten hierarchical data structures into a single level structure for reporting and analysis purposes. It does not specifically optimize data loading performance. Option 3: Incorrect. Dynamic Cube Customization is a feature in Oracle Profitability and Cost Management Cloud Service that allows users to modify the structure or behavior of a cube dynamically, without requiring a full reprocessing. It does not specifically optimize data loading performance. Option 4: Incorrect. Calculation Manager is a feature in Oracle Profitability and Cost Management Cloud Service that allows users to create and manage calculations and allocations. It does not specifically optimize data loading performance.

### NEW QUESTION # 293

What is the purpose of the Sandbox environment in Oracle Profitability and Cost Management Cloud Service?

- A. It is a secondary environment that is used for backup and disaster recovery purposes.
- B. It is a development environment for building and testing applications that are then deployed to the production environment.
- **C. It is a pre-production environment where new features are tested before being deployed to the production environment.**
- D. It is a production environment that is used for testing and development purposes.

**Answer: C**

Explanation:

Option 1: This option is incorrect because a production environment is never used for testing and development purposes. Option 2: This option is correct because the Sandbox environment is used to test new features before they are deployed to the production environment. Option 3: This option is incorrect because a separate development environment, such as Oracle Cloud Infrastructure - Classic, would be used for building and testing applications. Option 4: This option is incorrect because the purpose of the Sandbox environment is not for backup and disaster recovery purposes. It is primarily used for testing new features.

### NEW QUESTION # 294

Which of the following statements is true about creating applications and dimensions in Oracle Profitability and Cost Management Cloud Service 2023?

- **A. Custom dimensions can be created based on predefined templates provided by the system.**
- B. Each application can have multiple dimensions with the same name
- C. Applications and dimensions can only be created using the web interface.
- D. The dimensions created in an application are automatically available in all other applications in the environment.

**Answer: A**

Explanation:

Option 1: Incorrect. Applications and dimensions can be created both using the web interface and using the Oracle Smart View for Office add-in. Option 2: Incorrect. The dimensions created in an application are not automatically available in other applications. Option 3: Correct. Custom dimensions can be created based on predefined templates provided by the system. These templates include standard dimensions such as account, product, and organization, and users can also create custom dimensions to meet specific requirements. Option 4: Incorrect. Each application can have multiple dimensions, but each dimension must have a unique name within the application.

### NEW QUESTION # 295

When configuring security in Oracle Profitability and Cost Management Cloud Service, which of the following options allows you to define the level of access to individual data forms?

- A. Data Access Security
- **B. Dimension Access Security**
- C. Security Profiles
- D. Task Access Security

**Answer: B**

Explanation:

Option 1: Incorrect. Data Access Security controls access to data in the application, not individual data forms. Option 2: Incorrect. Task Access Security controls access to specific tasks and flows in the application, not individual data forms. Option 3: Correct. Dimension Access Security allows you to define the level of access to individual data forms based on dimension values. Option 4: Incorrect. Security Profiles are used to manage user access and permissions but do not specifically control access to individual data forms.

#### **NEW QUESTION # 296**

Which of the following user groups should be granted the ability to manage applications and artifacts in Oracle Profitability and Cost Management Cloud Service?

- A. System Administrators
- **B. Application Managers**
- C. Power Users
- D. Data Entry Users

**Answer: B**

Explanation:

Option 1: System Administrators should not be granted the ability to manage applications and artifacts as their role is to manage the overall system. Option 2: Application Managers are the correct user group to be granted the ability to manage applications and artifacts in Oracle Profitability and Cost Management Cloud Service. Option 3: Power Users should also not be granted this ability, as they have the ability to create and modify data in the system but do not have the ability to manage applications and artifacts. Option 4: Data Entry Users should not have this ability as their role is to solely input data into the system.

#### **NEW QUESTION # 297**

.....
