

C_S43퍼펙트공부자료시험준비에가장좋은인증시험최신덤프자료

정답C,D

질문 #25

Which of the following are fields on a Participant record? Note: There are 2 correct Answers to this question.

- A. Participant ID
- B. First and Last Name
- C. Position Name
- D. Title

정답A,B

질문 #26

.....

SAP C-C4H430-94시험이 정말 어렵다는 말을 많이 들으신 만큼 저희 DumpTOP는SAP C-C4H430-94덤프만 있으면SAP C-C4H430-94시험이 정말 쉬워진다고 전해드리고 싶습니다. SAP C-C4H430-94덤프로 시험패스하고 자격증 한방에 따보세요. 자격증 많이 취득하면 더욱 여유롭게 직장생활을 즐길수 있습니다.

C-C4H430-94퍼펙트 최신버전 문제: <https://www.dumptop.com/SAP/C-C4H430-94-dump.html>

SAP C-C4H430-94퍼펙트 최신버전 공부자료 연봉인상을 원하시나요, 만약에 다른 과목을 사용해보신 분이라면 SAP C-C4H430-94덤프도 바로 구매할것입니다. SAP C-C4H430-94퍼펙트 최신버전 공부자료 그대로 불행하게 시험에서 떨어지는 경우 주문번호와 불합격성적표를 메일로 보내오시면 바로 환불가능합니다. PDF버전을 공부하신후 C-C4H430-94시험환경을 체험해보고 싶으시다면 소프트웨어버전이나 온라인 버전을 추가구매하시면 됩니다. DumpTOP C-C4H430-94퍼펙트 최신버전 문제덤프를 열심히 공부하여 몇전 IT전문가의 꿈을 이루세요, SAP C-C4H430-94퍼펙트 최신버전 공부자료 하시는 일에서 한층 더 업그레이드될 것이고 생활에서도 분명히 많은 도움이 될 것입니다.

하나 그런 존재이기에 리용은 여기서 그만두겠다고 말할 수가 없다, 소호는 고개를 푹푹 저었다, 연봉인상을 원하시나요, 만약에 다른 과목을 사용해보신 분이라면 SAP C-C4H430-94덤프도 바로 구매할것입니다.

완벽한 C-C4H430-94퍼펙트 최신버전 공부자료 인증덤프

그대로 불행하게 시험에서 떨어지는 경우 주문번호와 불합격성적표를 메일로 보내오시면 바로 환불가능합니다. PDF버전을 공부하신후 C-C4H430-94시험환경을 체험해보고 싶으시다면 소프트웨어버전이나 온라인 버전을 추가구매하시면 됩니다.

DumpTOP덤프를 열심히 공부하여 몇전 IT전문가의 꿈을 이루세요.

힘든SAP C_S43시험패스도 간단하게 ! Itexamdump의 전문가들은SAP C_S43 최신시험문제를 연구하여 시험대비에 딱 맞는SAP C_S43덤프를 출시하였습니다. Itexamdump덤프를 구매하시면 많은 정력을 기울이지 않으셔도 시험을 패스하여 자격증취득이 가능합니다. Itexamdump의 SAP C_S43덤프로 자격증 취득의 꿈을 이루어보세요.

최신 SAP Certified Application Associate C_S43 무료샘플문제 (Q10-Q15):

질문 # 10

Create a Maintenance Plan

The project team evaluates during the implementation project Maintenance Plans in SAP S/4HANA Asset Management. The following features need to be checked:

Create a Maintenance Plan

Create a Maintenance Plan and save it. Use the following information:

Field	Value
Maint. Plan cat. (via SAP GUI) Maintenance Plan for (via FLP)	Maintenance Order
Maintenance Strategy	Z##
Description	Regular pump maintenance - Z##
Equipment	T-PA##
Order Type	PM02
Task List Type	A
Group	TL-##
Counter	1

정답:

설명:

See the Explanation for complete Solution of this Task.

Explanation:

Task 8: Create a Maintenance Plan

The objective of this task is to create a strategy-based maintenance plan that will automatically generate work orders for your pump based on the frequencies defined in your task list.

Step 1: Access the Transaction

* Transaction Code : Enter IP42 in the command field and press Enter .

* Initial Screen :

* Maintenance Plan Category : Select Maintenance Order (or "Maintenance plan for Maintenance Order" if using the Fiori Launchpad).

* Maintenance Strategy : Enter Z48 .

* Press Enter .

Step 2: Enter Header and Maintenance Item Data

Once you are on the main creation screen, fill in the "Maintenance Item" section to define what is being maintained and how the orders should look:

* Description : Enter Regular pump maintenance Z48 .

* Equipment : Enter T-PA48 .

* Planning Plant : This should default to 1010 based on the equipment, but ensure it is correct.

* Order Type : Enter PM02 .

Explanation : By assigning Equipment T-PA48 and Order Type PM02 , you are telling SAP to generate a specific "Planned" maintenance order every time this schedule is triggered.

Step 3: Link the Task List

This step connects the plan to the specific maintenance steps (operations) you created in Task 7.

* Look for the Task List section at the bottom of the screen.

* Task List Type : Enter A (General Task List).

* Group : Enter TL-48 .

* Counter : Enter 1 .

* Press Enter to validate the connection. You should see the description "Regular Maintenance GR48" appear.

Explanation : Linking the Task List ensures that when the maintenance plan generates an order, it automatically copies the 30-minute operations you defined earlier into that order.

Step 4: Set Scheduling Parameters (Optional but Recommended)

While the table in your document focuses on the data above, typically you would click the Maintenance Plan Scheduling Parameters tab to ensure the "Scheduling Period" and "Start Date" are set. However, for the assessment, the mandatory data is what we entered in Steps 1-3.

Step 5: Save

* Click the Save (floppy disk) icon.

* Note your Maintenance Plan Number : The system will display a message at the bottom, such as

"Maintenance plan 123 saved." Write this number down , as you will need it for Task 9: Schedule a Maintenance Plan .

Task 8 is now complete! You have built the automated "brain" that will handle the recurring maintenance for your pump.

질문 # 11

Create a Task List

The project team evaluates during the implementation project Task Lists in SAP S/4HANA Asset Management. The following features need to be checked:

* Create a Task List header

* Create Task List operations

* Create a Task List with 3 Task List operations. Maintenance Strategy Z## comprises Maintenance Packages with different hierarchy levels.

Use the following information at header level of the Task List:

Field	Value
Group	TL-##
Group Counter	1
Planning Plant	1010
Description	Regular Maintenance GR##
Work Center	MK-00
Work Center Plant	1010
Usage	4
Planner Group	P##
Maintenance Strategy	Z##

Use the following information for each Task List operation:

Field	Value
Work Ctr	MK-00
Plnt	1010
Control Key	PM01
Work	30
Unit	MIN

* Assign Maintenance Packages to the Task List Operations as follows:

* Operation 10 is to be performed monthly.

* Operation 20 is to be performed every 4 months.

* Operation 30 is to be performed every 12 months.

정답 :

설명 :

See the Explanation for complete Solution of this Task.

Explanation:

Since we encountered that error with the Z48 strategy , we must ensure that is fixed before we can finish the Task List. Here is the complete, verified, step-by-step process to finalize Task 7 , including the "hidden" pre- requisite.

Task 7: Create a General Task List

Objective : To create a standardized template of maintenance steps that can be automatically pulled into future work orders based on a schedule.

Step 1: The Pre-requisite (Fixing Strategy Z48)

If you haven't done this yet, SAP will not let you save the Task List.

* Transaction : IP11 (Maintain Maintenance Strategies).

* Action : Click New Entries .

* Strategy : Z48

* Description : Strategy for Group 48

* Strategy Unit : MON (Months).

* Packages : On the left, double-click Packages , then click New Entries :

* Line 1 : Cycle 1 / Unit MON / Text Monthly

* Line 2 : Cycle 4 / Unit MON / Text Every 4 Months

* Line 3 : Cycle 12 / Unit MON / Text Yearly

* Save (Floppy Disk icon).

Explanation : A strategy is the "calendar" that defines how often work happens. Without this, the system doesn't know what "Monthly" or "Yearly" means.

Step 2: Create Task List Header

* Transaction : IA05 .

* Initial Screen : Group TL-48, Group Counter 1. Press Enter .

* Header Fields :

* Description : Regular Maintenance GR48

* Planning Plant : 1010

* Work Center : MK-00 / Plant : 1010

* Usage : 4 (Plant Maintenance)

* Status : 4 (Released)

* Planner Group : P48

* Maint. Strategy : Z48

Explanation : The header defines who is responsible for the work (Planner Group P48) and which scheduling rules (Strategy Z48) apply to the whole list.

Step 3: Create Operations

* Click the Operations button (F6) at the top.

* Enter three rows with this data:

* Op 10 : Work Center MK-00, Plant 1010, Control Key PM01, Work 30, Unit MIN.

* Op 20 : (Same as above).

* Op 30 : (Same as above).

Explanation : Operations are the actual steps the technician follows. Here, we are saying each step takes 30 minutes of mechanical labor.

Step 4: Assign Maintenance Packages (The "Frequencies")

This is the most important part of Task 7. We tell SAP which operation happens when.

* Select Row 10 (click the box at the far left of the row).

* Go to Menu: Goto > Maintenance Packages .

* Check the box for the 1 Month package. Click the Back (Green Arrow) icon.

* Select Row 20 .

* Go to Goto > Maintenance Packages and check the 4 Month package. Click Back .

* Select Row 30 .

* Go to Goto > Maintenance Packages and check the 12 Month package. Click Back .

Explanation : Now, SAP knows that Op 10 happens every month, but Op 30 only happens once a year.

Step 5: Save

* Click the Save icon.

* The message at the bottom should say: "Task list TL-48 saved with group counter 1" .

질문 # 12

Create a Maintenance Order with Checklists

The project team evaluates during the implementation project Maintenance Orders with Checklists in SAP S

/4HANA Asset Management. The following features need to be checked:

- * Create a Maintenance Order with Checklist
- * Display a Maintenance Order with automatically generated Object List and Checklist.
- * Create a Maintenance Order using an Order Type which is already configured for the checklist process.

Use the following data:

Field	Value
Functional Location	##-01-PRD-01-03-HD
General Maintenance Task List	A / T-PMCLEN / 1

- * Display the previously created Maintenance Order with automatically generated Object List and Checklist.

정답 :

설명 :

See the Explanation for complete Solution of this Task.

Explanation:

Task 12 Overview

In this task, you will create a maintenance order using a specific order type configured for the checklist process. The system will then automatically generate an object list and a corresponding checklist based on the equipment and task list assigned.

Step 1: Create a Maintenance Order with Checklist

You need to create a new order using a functional location and a specific task list that triggers the checklist functionality.

- * Access the Transaction : Use transaction code IW31 (Create Maintenance Order).

* Initial Screen :

* Order Type : Select an order type already configured for the checklist process (typically PM01 or a specific custom type designated for checklists in your training environment).

* Press Enter .

* Enter Header and Location Data :

* Functional Location : Enter 48-01-PRD-01-03-HD .

* Description : Enter a relevant description (e.g., Pump Checklist Maintenance GR48).

* Assign the Task List :

* Go to the Operations tab or find the task list assignment section.

* General Maintenance Task List : Enter A / T-PMCLEN / 1 .

* Press Enter to validate.

* Save : Click the Save (floppy disk) icon.

Explanation : By assigning this specific functional location and general task list, you are triggering the

"Checklist" integration. The system uses the classification data you set up in Task 11 to determine that a checklist (inspection lot) is required for this job.

Step 2: Display and Verify the Checklist

After saving, you must verify that the system correctly generated the technical components of the checklist.

* Display the Order : Use transaction code IW33 and enter the order number you just created.

* Verify the Object List :

* Navigate to the Object List tab.

* You should see the equipment or functional location listed here with a link to the checklist.

* Verify the Checklist :

* Look for a button or tab labeled Checklists or Inspection Lot within the order.

* The system should show that a checklist has been automatically generated for the repair operations.

Explanation : The goal of this step is to confirm that the "Object List" and "Checklist" were created automatically by the system. This proves the background configuration for QM (Quality Management) integration is working correctly with your maintenance order

질문 # 13

Schedule a Maintenance Plan

The project team evaluates during the implementation project the scheduling of Maintenance Plans in SAP S

/4HANA Asset Management. The following features need to be checked:

Schedule a Maintenance Plan

Display a generated Maintenance Order

Schedule the previously created Maintenance Plan. The following prerequisites have to be met:

The next upcoming call is the 4 MON Maintenance Package

Calculate the Completion Date of the last Maintenance Package as follows: Today's date minus 4 weeks (e.g. today's date: 15th of December >>> Completion Date: 17th of November) The Call Date is always 10 days before the Plan Date.
Note:

Check your Maintenance Plan and adapt it, if necessary, before you schedule it.

Check the following information in the generated Maintenance Order:

number of order operations: 2

Maintenance Plan: number of the previously created Maintenance Plan

Last Included Task List: A / TL-## / 1

정답 :

설명:

See the Explanation for complete Solution of this Task.

Explanation:

Task 9 Overview

The goal of this task is to trigger the maintenance schedule you built in Task 8 so that the system generates an actual work order.

You must meet specific scheduling conditions to ensure the right maintenance cycle (the 4- month package) is triggered.

Step 1: Adapt Scheduling Parameters (IP02)

Before starting the schedule, you must ensure the "Call Date" rules are correct.

* Transaction : Enter IP02 (Change Maintenance Plan).

* Maintenance Plan : Enter the number you saved in Task 8 and press Enter .

* Scheduling Parameters Tab :

* Call Horizon : Adjust this so that the Call Date occurs exactly 10 days before the Plan Date.

* Note: If your system uses percentages, you will need to calculate the percentage of the 4-month cycle that results in a 10-day lead time.

* Save your changes.

Step 2: Schedule the Plan (IP10)

Now you will "start" the clock for this maintenance schedule.

* Transaction : Enter IP10 (Schedule Maintenance Plan).

* Maintenance Plan : Enter your plan number and press Enter .

* Start Scheduling : Click the Start icon (or go to Maintenance plan > Scheduling > Start).

* Enter the "Start Date" / "Completion Date" :

* The Rule : You must use Today's date minus 4 weeks .

* Example: If today is April 19, enter March 22.

* Press Enter . The system will calculate the next calls.

* Verify the Package : Ensure the next upcoming call is indeed the 4 MON (4-month) Maintenance Package.

* Save (Floppy Disk icon). This will generate a new Maintenance Order number.

Step 3: Verify the Generated Maintenance Order

You must now check that the order was created correctly based on the rules of your Task List (Task 7) and Maintenance Plan (Task 8).

* Display Order : In IP10 , select the line for the generated call and click the Display Order icon (or use transaction IW33 with the new order number).

* Check the following three items :

* Operations : Verify there are exactly 2 operations in the order (the Monthly and 4-Month tasks).

* Maintenance Plan : Confirm the order shows your specific Maintenance Plan number.

* Task List : Verify the "Last Included Task List" is A / TL-48 / 1 .

질문 # 14

Task: 5

Configure and create a Maintenance Notification

The project team evaluates during the implementation project the Maintenance Notifications in SAP S /4HANA Asset Management. The following features need to be checked:

* Configure and create a Maintenance Notification

* Assign catalog specific data to a Maintenance Notification

* Create a Maintenance Notification and save it. Use the following information:

Field	Value
Notification Type	Z1
Description	Pump is leaking
Priority	High
Equipment	T-PA##

* Assign the following data to the just created notification:

Field	Value
Damage Code Group	PMP-100
Damage Code	1000
Description of Damage Code	Leaking
Object Part Code Group	PMP-Z##
Object Part Code	1001
Description of Object Part Code	Inlet/Outlet
Cause Code Group	PMP-Z##
Cause Code	2000
Description of Cause Code	Material fatigue

정답:

설명:

See the Explanation for complete Solution of this Task.

Explanation:

Task 5 Overview

The project team is evaluating Maintenance Notifications in SAP S/4HANA Asset Management. This task involves creating a notification and assigning catalog-specific data to it.

Step 1: Create the Maintenance Notification

In this step, you will record a technical problem in the system.

* Access the Transaction : Use transaction code IW21 (Create Maintenance Notification) in the SAP GUI or the corresponding Fiori app.

* Initial Screen :

* Notification Type : Enter Z1 .

* Press Enter .

* Enter General Data :

* Description : Enter Pump is leaking .

* Priority : Select High .

* Equipment : Enter T-PA48 .

* Save : Click the Save (floppy disk) icon to generate a notification number.

Explanation : Creating a notification is the first step in the maintenance process. It documents the "what" (leaking pump), the "how critical" (high priority), and the "where" (Equipment T-PA48).

Maintenance notification Edit Goto Extras Environment System Help

Notification: 100000000001 Z1

Notification Status: OSNO

Order:

Notification | Malfunction, breakdown | Location data | Scheduling overview | Items | Tasks | Activities

Reference Object

Functional loc.

Equipment

Assembly

Subject

Coding

Description

Responsibilities

Planner Group

Main WorkCtr

Reported By

Notif. Date: 02.04.2026 02:35:00

Start/End Dates

Required Start: 02.04.2026 02:35:00 Priority

Required End: 00:00:00 Breakdown

Revision

Maint.Act. Type

Final Due Date

SAP

Step 2: Assign Catalog Specific Data

Now you must assign technical codes to describe the damage precisely for future reporting and analysis.

* Access the Transaction : Use transaction code IW22 (Change Maintenance Notification) to open your recently created notification.

* Navigate to Item Data : Go to the Items tab or the relevant section for damage and causes.

* Enter Damage Details :

* Damage Code Group : PMP-100 .

* Damage Code : 1000 .

* Description : Leaking .

* Enter Object Part Details :

* Object Part Code Group : PMP-Z48 .

* Object Part Code : 1001 .

* Description : Inlet/Outlet .

* Enter Cause Details :

* Cause Code Group : PMP-248 .

* Cause Code : 2000 .

* Description : Material fatigue .

* Save : Click the Save icon to finalize the notification.

Explanation : Assigning catalog data categorizes the issue using standardized codes. This allows the company to run "Bad Actor" reports later to see, for example, how many pumps are failing due to "Material fatigue" versus "Operator error".

Catalog Selection
