ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q49-Q54):

NEW QUESTION # 49

Which table would an admin modify in order to add extra columns to the side panel or remove default column choices on the Prioritization page within the Portfolio Planning Workspace?

- A. [sn_align_core_planning_item]
- B. [sn_align_cmn_int_choice_map]
- C. [sn_align_ws_portfolio_plan]
- D. [sn_align_core_lens]

Answer: A

NEW QUESTION # 50

What is a resource event?

- A. A non-scheduled activity impacting capacity.
- B. A block of time that a resource spends on a task.
- C. An event scheduled by a project manager.
- D. An external event.

Answer: A

Explanation:

A resource event is a non-scheduled activity that affects the availability and capacity of a resource or a group of resources. Examples of resource events are vacations, holidays, training, or sick leave. Resource events can be created by resource managers or resources themselves, and they can be viewed in the resource calendar or the resource workbench. You can find more information about resource events in the Product Documentation for ServiceNow.

NEW QUESTION # 51

The color band at the top of the project card in Project Workspace displays what project attribute?

- A. Risk
- B. Issues
- **C. Status**
- D. State

Answer: C

Explanation:

According to the ServiceNow documentation¹, the color band at the top of the project card in Project Workspace displays the project status. The project status is a calculated field that indicates the health of the project based on the schedule, cost, and scope variance. The color band can be green, yellow, or red, depending on the status value. The other options are incorrect because:

B . Risk: The risk is a potential problem that could affect the project or its outcome. The risk level is displayed as a circle icon on the project card, not as a color band².

C . State: The state is the current phase of the project, such as Draft, Planning, Work in Progress, or Closed. The state is displayed as a text field on the project card, not as a color band³.

D . Issues: The issues are the actual problems that affect the project or its outcome. The number of issues is displayed as a badge icon on the project card, not as a color band⁴.

NEW QUESTION # 52

As an it_pps_admin, what can you use to detect corrupt data in a project, such as tasks with invalid parents or cyclic relations in a project?

- A. Edge Encryption Diagnostics.
- B. System Diagnostics.
- C. Analytics Diagnostics.
- **D. Project Diagnostics.**

Answer: D

NEW QUESTION # 53

Which of the following defines a parent-child relationship?

Choose 2 answers

- A. Parent-child task relationships do not have any effect on task time constraints.
- **B. A parent-child relationship is not saved as a record in any table.**
- **C. Any number of child tasks can be nested under a parent task with or without any dependencies.**
- D. A parent-child task must finish before another begins.

Answer: B,C
