We have online and offline service, and if you have any questions for 300-810 exam braindumps, you can consult us.

## About 300-810 Exam

The test is available only in the English language and the price for attempting it is about \$300. There will be questions in the form of multiple-choices, drag and drops, fill-in-the-blank, and testlets. Also, you will be given a maximum of 90 minutes to answer all of

them.

The exam is usually written at Pearson VUE Certified Test Centers under a proctored setting. However, you can sit for it online as well. Online testing is available to you anywhere with an internet connection and also uses a proctored format. That is why in this case, you need to have OnVUE software, a stable webcam, and a government-issued ID. You should also have access to a quiet, private place during the exam. If you opt to take the test at the physical center, then you must be ready to provide two valid forms of identification, with both having your signature on them.

Candidates who are 18 years or older are eligible to take the exam without any restrictions. Those between the ages of 13-17 can take part in the test provided their parents or legal guardians are in support. However, people below 13 years of age are not eligible.

## Cisco Implementing Cisco Collaboration Applications Sample Questions (Q80-Q85):

### NEW QUESTION # 80

Refer to the exhibit. An administrator is troubleshooting an issue with XMPP Federation between two, eight-node IM and Presence clusters. After looking at the logs, the administrator finds this message and must publish one or more DNS SRV records containing one or more addresses of the IM and Presence node(s).

```
cm_xmpp_fed: b4291b90| INFO | XMPPServerOutDir: Could not resolve 'jabber.example.com' using SRV _jabber._tcp. Failing the outbound connection.
```

How many nodes must be selected to publish?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

### NEW QUESTION # 81

The Hybrid Message service gives on-premise Jabber users and cloud Webex app users the ability to instant message each other. The Hybrid Message Connector installed on the Expressway-C server must have access via AXL to the Instant Message and Presence Publisher.

Which certificate is used in this secure communication between the IMSP server and the Expressway-C server?

- A. CUP-XMPP
- B. Cisco Tomcat
- C. Expressway-Trust
- D. Root Certificate Authority
- E. Common Identity

**Answer: B**

Explanation:

In the Cisco Hybrid Message Service deployment, the Cisco Tomcat certificate is used to secure AXL (Administrative XML Layer) communication between the Cisco Instant Messaging and Presence (IM&P) server and the Expressway-C server. AXL is required for the Hybrid Message Connector to communicate with the IM&P Publisher to synchronize user data and enable instant messaging functionality between Jabber (on-premises) and Webex (cloud) users.

The Cisco Tomcat certificate secures HTTPS communication, including AXL connections. The certificate ensures the Expressway-C can authenticate the IM&P server and establish a trusted, encrypted connection.

AXL operates over HTTPS, and the Tomcat service on the IM&P server handles the HTTP/HTTPS interface, making the Cisco Tomcat certificate integral for this communication.

### NEW QUESTION # 82

Refer to the exhibit.

```
---Log snippet---
2018-12-27 11:02:05, 430 INFO [0x0000015c]
