provide you with 24-hour online service for our SC-200 study tool. If you have any questions, please send us an e-mail. We will promptly provide feedback to you and we sincerely help you to solve the problem. Our specialists check daily to find whether there is an update on the SC-200 study tool. If there is an update system, we will automatically send it to you. Therefore, we can guarantee that our SC-200 Test Torrent has the latest knowledge and keep up with the pace of change. Many people are worried about electronic viruses of online shopping. But you don't have to worry about our products. Our SC-200 exam materials are absolutely safe and virus-free. If you encounter installation problems, we have professional staff to provide you with remote online guidance. We always put your needs in the first place.

Microsoft Security Operations Analyst Sample Questions (Q290-Q295):

NEW QUESTION # 290

Your on-premises network contains two Active Directory Domain Services (AD DS) domains named contoso.com and fabrikam.com. Contoso.com contains a group named Group1.

Fabrikam.com contains a group named Group2.

You have a Microsoft Sentinel workspace named WS1 that contains a scheduled query rule named Rule1. Rule1 generates alerts in response to anomalous AD DS security events. Each alert creates an incident.

You need to implement an incident triage solution that meets the following requirements:

- Security incidents from contoso.com must be assigned to Group1.
- Security incidents from fabrikam.com must be assigned to Group2.
- Administrative effort must be minimized.

What should you include in the solution?

- A. one automation rule assigned to Rule1
- **B. two automation rules assigned to Rule1**
- C. a playbook that is triggered by the creation of an incident
- D. a playbook that is triggered by the creation of an alert

Answer: B

NEW QUESTION # 291

You need to build a KQL query in a Microsoft Sentinel workspace. The query must return the SecurityEvent record for accounts that have the last record with an EventID value of 4624. How should you complete the query? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Answer Area

SecurityEvent

- | summarize arg_max(TimeGenerated, *) by Account
- | summarize arg_max(TimeGenerated, *) by Account
- | summarize make_list(Account) by EventID
- | summarize make_set(Account) by EventID
- | where EventID == 4624

| where EventID == 4624

- | summarize arg_max(TimeGenerated, *) by Account
- | summarize make_list(Account) by EventID
- | summarize make_set(Account) by EventID
- | where EventID == 4624

Answer:

Explanation:

Answer Area

SecurityEvent

Microsoft

| summarize arg_max(TimeGenerated, *) by Account

| summarize arg_max(TimeGenerated, *) by Account

| summarize make_list(Account) by EventID

| summarize make_set(Account) by EventID

| where EventID == 4624

| where EventID == 4624

| summarize arg_max(TimeGenerated, *) by Account

| summarize make_list(Account) by EventID

| summarize make_set(Account) by EventID

| where EventID == 4624

Explanation:

SecurityEvent

Microsoft

| summarize arg_max(TimeGenerated, *) by Account

| where EventID == 4624

NEW QUESTION # 292

You plan to create a custom Azure Sentinel query that will track anomalous Azure Active Directory (Azure AD) sign-in activity and present the activity as a time chart aggregated by day.

You need to create a query that will be used to display the time chart.

What should you include in the query?

- A. makeset
- B. bin
- C. extend
- D. workspace

Answer: B

Explanation:

Section: [none]

NEW QUESTION # 293

Drag and Drop Question

You have an Azure subscription that uses Microsoft Defender for Cloud.

You need to create a workflow that will send a Microsoft Teams message to the IT department of your company when a new Microsoft Secure Score action is generated.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Create an Azure logic app that includes the Defender for Cloud regulatory compliance assessment trigger.
- Configure workflow automation.
- Create an Azure logic app that includes the Defender for Cloud alert trigger.
- Create an Azure logic app that includes the Defender for Cloud recommendation trigger.
- Configure a trigger condition.

Answer Area
