NEW QUESTION # 259

A retailer that uses Dynamics 365 Supply Chain Management is conducting master planning runs with 300,000 items in a single planned order run on average.

Optimizations are needed to improve performance. Most of the items in the master planning runs do not have dependencies on the other items.

Planning multiple items together in a single group will help with performance.

You need to configure the system to increase performance.

Which configuration should you use?

- A. Use of cache
- **B. Number of tasks in a helper bundle**
- C. Number of orders in a firming bundle
- D. Number of threads
- E. Time fences

Answer: B

Explanation:

NEW QUESTION # 260

A food distribution company is implementing Dynamics 365 Supply Chain Management without the Warehouse management module.

The company sells prepackaged meals purchased from one or more vendors. The prepackaged meals contain a single item number.

The vendors routinely communicate that lots of prepackaged meals be held if any risk of exposure is identified until they can confirm safe handling per lot. This created supply chain issues because the items are in inventory and therefore not reordered.

You need to resolve the issues.

Answer:

Explanation:

□ Explanation

Box 1: Tracking dimension

To resolve the issue of identifying items by lot, you should use the tracking dimension in Dynamics 365 Supply Chain Management. Tracking dimensions allow you to track and manage inventory items based on specific attributes such as lot numbers, serial numbers, or batch numbers. In this case, you can use the lot number as a tracking dimension to ensure that each prepackaged meal can be tracked and managed according to its specific lot. This will help the company to hold specific lots when vendors communicate any risk of exposure and maintain accurate inventory levels for reordering purposes. Reference: - Microsoft Docs:

Configure tracking dimension groups (Dynamics 365 Supply Chain Management):

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/inventory/configure-tracking-dimension-groups> Box 2: Batch

disposition A batch disposition is a status that indicates whether a batch can be used in production or sales processes¹. You can use batch disposition codes to exclude batches from master planning calculation by setting the Include in planning field to No¹. This way, you can prevent the held item lots from being reordered until they are confirmed safe by the vendor.

NEW QUESTION # 261

DRAG DROP

A company uses Dynamics 365 for Finance and Operations.

You just implement commission groups to match commission rates to products.

You need to configure commission tracking.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.
