Formats of Microsoft SC-100 Practice Exam Questions

Our company is a professional certificate exam materials provider, we have occupied the field for years, therefore we have rich experiences. SC-100 training materials of us are compiled by skilled experts, and they are quite familiar with the exam center, and you can pass the exam just one time by using SC-100 Exam Materials of us. In addition, we offer you free update for 365 days after purchasing, and the update version for SC-100 training materials will be sent to your email automatically. We have online and offline chat service stuff, if you have any questions, just contact us.

Microsoft Cybersecurity Architect Sample Questions (Q27-Q32):

NEW QUESTION # 27

You have a Microsoft 365 subscription that contains a Microsoft SharePoint Online site named Site1. Site1 stores documents that are based on a predefined form and include confidential employee information.

You monitor access to Site1 by using a Microsoft Defender for Cloud Apps session policy.

You need to ensure that step-up authentication is triggered when a user downloads documents that are based on the predefined form. The solution must minimize administrative effort.

Which Microsoft Data Classification Service inspection method should you use, and which Conditional Access option should you add to the session policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□

NEW QUESTION # 28

You are evaluating an Azure environment for compliance.

You need to design an Azure Policy implementation that can be used to evaluate compliance without changing any resources.

Which effect should you use in Azure Policy?

- A. Append
- B. Deny
- C. Disabled
- D. Modify

Answer: C

Explanation:

Before looking to manage new or updated resources with your new policy definition, it's best to see how it evaluates a limited subset of existing resources, such as a test resource group. Use the enforcement mode Disabled (DoNotEnforce) on your policy assignment to prevent the effect from triggering or activity log entries from being created.

<https://docs.microsoft.com/en-us/azure/governance/policy/concepts/evaluate-impact>

NEW QUESTION # 29

You plan to deploy 20 Azure Kubernetes Service (AKS) clusters. The cluster configuration will be managed declaratively by using Kubernetes manifest files stored in Azure Repos.

You need to recommend a solution to ensure that the configuration of all the clusters remains consistent by using the manifest files stored in Azure Repos.

What should you include in the recommendation?

- A. Dependency Tracker
- B. Flux
- C. Dependabot
- D. Gatekeeper

Answer: B

Explanation:

Application deployments with GitOps (Flux v2) for AKS and Azure Arc-enabled Kubernetes GitOps on Azure Arc-enabled Kubernetes or Azure Kubernetes Service uses Flux, a popular open-source tool set. Flux provides support for common file sources (Git and Helm repositories, Buckets, Azure Blob Storage) and template types (YAML, Helm, and Kustomize).

Flux is deployed directly on the cluster, and each cluster's control plane is logically separated.

This makes it scale well to hundreds and thousands of clusters. Flux enables pure pull-based GitOps application deployments. No access to clusters is needed by the source repo or by any other cluster.

NEW QUESTION # 30

You have a Microsoft 365 E5 subscription and an Azure subscription. You are designing a Microsoft Sentinel deployment. You need to recommend a solution for the security operations team. The solution must include custom views and a dashboard for analyzing security events. What should you recommend using in Microsoft Sentinel?

- A. notebooks
- B. playbooks
- C. threat intelligence
- **D. workbooks**

Answer: D

Explanation:

Explanation

NEW QUESTION # 31

You are designing an auditing solution for Azure landing zones that will contain the following components:

- * SQL audit logs for Azure SQL databases
- * Windows Security logs from Azure virtual machines
- * Azure App Service audit logs from App Service web apps

You need to recommend a centralized logging solution for the landing zones. The solution must meet the following requirements:

- * Log all privileged access.
- * Retain logs for at least 365 days.
- * Minimize costs.

What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

For the SQL audit logs: A Log Analytics workspace, Azure Application Insights, Microsoft Defender for SQL, Microsoft Sentinel

For the Security logs: A Log Analytics workspace, Application Insights, Microsoft Defender for servers, Microsoft Sentinel

For the Security logs: A Log Analytics workspace, Application Insights, Microsoft Defender for App Service, Microsoft Sentinel

For the App Service audit logs: A Log Analytics workspace, Application Insights, Microsoft Defender for App Service, Microsoft Sentinel

Answer:

Explanation:

NEW QUESTION # 32

.....

Do you want to use your spare time to get SC-100 exam certification? The PDF version of our SC-100 exam materials provided by us can let you can read anytime and anywhere. We also provide online version and the software version. The content of different version is diverse, and every of them have their own advantages. You can download the version of the SC-100 Exam Materials to try and find the version that satisfies you.
