

IDFX Zertifizierungsfragen, CIDQ IDFX Prüfung Fragen

CIDQ Practice Test IDFX I - 2024

C - ANSWER What is an appropriate circulation factor for an open office plan using systems furniture?

- A. 5%-8%
- B. 10%-20%
- C. 25%-40%
- D. 50%-65%

C - ANSWER Which fabric described below possesses the HIGHEST flame resistance and satisfies durability requirements for use on school auditorium seating?

- A. BINGO ASTM-E-84 Class A; 55,000 Wyzenbeek
- B. PETER PLAID NFPA 301-49 (Small Scale) & NFPA 225
- C. BUTLER STRIPE 100% Crypton, 150,000 Wyzenbeek
- D. HENDERSON ASTM-E84 Class B

A - ANSWER What does the 7 in the symbol below indicate? (Circle bisected with a 7 above the line and A-2 below the line; half the circle is surrounded by a black triangle pointing down)

- A. Section number
- B. Drawing sheet
- C. Specification section
- D. Detail number

C - ANSWER The term architectural woodwork refers to which of the following?

- A. standardized modular cabinetry

Wenn Sie in kurzer Zeit mit weniger Mühe sich ganz effizient auf die CIDQ IDFX Zertifizierungsprüfung vorbereiten, benutzen Sie doch schnell die Schulungsunterlagen zur CIDQ IDFX Zertifizierungsprüfung. Sie werden von der Praxis bewährt. Viele Kandidaten haben bewiesen, dass man mit der Hilfe von Prüfung Frage die Prüfung 100% bestehen können. Mit Prüfung Frage können Sie Ihr Ziel erreichen und die beste Effekte erzielen.

Die CIDQ IDFX Zertifizierungsprüfung ist der erste Schritt zum Berufserfolg für IT-Fachleute. Durch die CIDQ IDFX Zertifizierungsprüfung haben Sie schon den ersten Fuß auf die Spitze Ihrer Karriere gesetzt. Prüfung Frage wird Ihnen helfen, die CIDQ IDFX Zertifizierungsprüfung zu bestehen.

>> IDFX Testking <<

CIDQ IDFX PDF, IDFX Deutsch Prüfung

Sind Sie IT-Fachmann? Wollen Sie Erfolg? Dann kaufen Sie die Schulungsunterlagen zur CIDQ IDFX Zertifizierungsprüfung von Prüfung Frage. Sie werden von der Praxis prüft. Sie werden Ihnen helfen, die CIDQ IDFX Zertifizierungsprüfung zu bestehen. Ihre Berufsaussichten werden sich sicher verbessern. Sie werden ein hohes Gehalt beziehen. Sie können eine Karriere in der internationalen Gesellschaft machen. Wenn Sie spitze technischen Fähigkeiten haben, sollen Sie sich keine Sorgen machen. Die Schulungsunterlagen zur CIDQ IDFX Zertifizierungsprüfung von Prüfung Frage werden Ihren Traum verwirklichen. Wir werden mit Ihnen durch dick und dünn gehen und die Herausforderung mit Ihnen zusammen nehmen.

CIDQ Interior Design Fundamentals Exam IDFX Prüfungsfragen mit Lösungen (Q48-Q53):

48. Frage

Greenguard Environmental Institute oversees a third-party program that certifies products which have been tested and shown to

- A. Contain recycled content
- B. Incorporate rapidly renewable resources
- **C. Produce low emission levels**
- D. Generate renewable energy

Antwort: C

Begründung:

The Greenguard Environmental Institute (now part of UL Environment) is a third-party certification program that focuses on indoor air quality. The NCIDQ IDFX Reference Manual and sustainability standards (e.g., from the U.S. Green Building Council [USGBC] and LEED) outline the purpose of Greenguard certification, which is commonly referenced in interior design for specifying products that contribute to healthy indoor environments.

* A. Contain recycled content: While recycled content is a sustainability attribute (e.g., in LEED credits), it is not the focus of Greenguard certification, which is specifically about indoor air quality.

Recycled content is typically certified by programs like the Sustainable Forestry Initiative (SFI) or Cradle-to-Cradle.

* B. Generate renewable energy: Generating renewable energy applies to systems like solar panels, not to products typically certified by Greenguard, which focuses on materials and furnishings.

* C. Produce low emission levels: Greenguard certification tests products for volatile organic compound (VOC) emissions and other chemical emissions that affect indoor air quality. Products that meet Greenguard standards have low emission levels, ensuring they do not release harmful chemicals into the indoor environment. This is the primary focus of the Greenguard program, making it the correct answer.

* D. Incorporate rapidly renewable resources: Rapidly renewable resources (e.g., bamboo, cork) are materials that regenerate quickly, but this is not related to Greenguard certification, which focuses on emissions rather than material sourcing.

The NCIDQ IDFX Reference Manual specifies that Greenguard certification is about ensuring low emission levels to improve indoor air quality, which is a critical consideration in interior design for occupant health and well-being.

Verified Answer from Official Source: The correct answer is C, as verified by the NCIDQ IDFX Reference Manual.

Exact Extract:

From the NCIDQ IDFX Reference Manual (Chapter 9: Sustainable Design): "Greenguard Environmental Institute certifies products that have been tested and shown to produce low emission levels, ensuring they contribute to improved indoor air quality."

Explanation from Official Source:

The NCIDQ IDFX Reference Manual explains that Greenguard certification focuses on testing products for low chemical emissions, such as VOCs, to ensure they do not negatively impact indoor air quality. This certification is widely used in interior design to specify materials and furnishings that support healthy indoor environments, aligning with sustainability and health goals.

Objectives:

* Understand the purpose of third-party certifications like Greenguard in interior design.

* Identify the focus of Greenguard certification on low emission levels for indoor air quality.

49. Frage

A designer notes that the travel distance from the remote point in a fitness center is greater than the maximum distance allowed by the building code. Which intervening spaces may be traveled through to reduce travel distance?

- **A. Reception**
- B. Lockers
- C. Office
- D. Storage

Antwort: A

Begründung:

Travel distance is a key component of the means of egress, defined by the International Building Code (IBC) as the distance an occupant must travel from the most remote point in a space to reach an exit. The NCIDQ IDFX Reference Manual and IBC Chapter 10 (Means of Egress) specify maximum allowable travel distances based on occupancy type and whether the building is sprinklered. For a fitness center (likely classified as an Assembly occupancy, Group A-3), the maximum travel distance is typically 200 feet (61 meters) in a non-sprinklered building or 250 feet (76 meters) in a sprinklered building, per IBC Table 1017.2. The question asks which intervening spaces can be used to reduce travel distance, meaning the space must be part of the egress path and not pose additional hazards or restrictions.

* A. Office: An office is a private space typically used by staff, not part of the public egress path. IBC Section 1006.2.1 states that

egress paths must be through spaces that are accessible to all occupants, and private offices do not meet this requirement. Traveling through an office would not be a permissible part of the egress path.

* B. Lockers: Locker rooms may be part of a fitness center, but they often contain obstacles like benches and lockers that can impede egress. Additionally, locker rooms may have dead-end corridors or limited exits, which could increase risk during an emergency. IBC Section 1018.4 limits dead-end corridors in egress paths, making locker rooms a less suitable option.

* C. Storage: Storage rooms are not part of the egress path, as they are typically not accessible to the public and may contain hazards (e.g., clutter, locked doors). IBC Section 1006.2.2.3 prohibits egress through storage rooms due to the potential for obstruction and safety risks.

* D. Reception: A reception area is a public, open space that is typically part of the main circulation path in a fitness center. It is designed to be accessible to all occupants and is often located near the main entrance/exit, making it a permissible and practical space to include in the egress path. Traveling through a reception area can reduce the overall travel distance by providing a direct route to an exit, as long as the path remains unobstructed and meets width requirements (per IBC Section 1005).

The NCIDQ IDFX Reference Manual and IBC confirm that egress paths must be through accessible, public spaces like reception areas, which can help reduce travel distance while maintaining safety.

Verified Answer from Official Source: The correct answer is D, as verified by the NCIDQ IDFX Reference Manual and IBC Chapter 10.

Exact Extract:

From the NCIDQ IDFX Reference Manual (Chapter 2: Building Codes and Standards): "Egress paths must be through accessible, public spaces such as reception areas, which can be used to reduce travel distance while ensuring a safe and unobstructed route to an exit." Explanation from Official Source:

The NCIDQ IDFX Reference Manual explains that travel distance can be reduced by routing the egress path through public, accessible spaces like reception areas, which are designed for circulation and typically lead to exits. This aligns with IBC requirements that prohibit egress through private or hazardous spaces like offices, locker rooms, or storage areas.

Objectives:

* Understand the components of the means of egress, including travel distance.

* Identify permissible spaces for egress paths to ensure code compliance.

50. Frage

A designer has used a similar color palette for their last ten projects. This is an example of

- A. Color preference
- B. Color communication
- C. Color pragmatics
- D. Color response

Antwort: A

Begründung:

Color theory in interior design involves understanding how colors influence human perception, behavior, and the overall design aesthetic. The terms provided in the options relate to different aspects of color application in design.

* A. Color response: This refers to how individuals or groups react to colors in a space, such as feeling calm in a blue room or energized in a red room. It is about the psychological or emotional reaction to color, not the designer's choice of palette.

* B. Color preference: This refers to a designer's or client's personal inclination toward certain colors or palettes. If a designer consistently uses a similar color palette across multiple projects, it reflects their personal or stylistic preference for those colors, which may be based on their design philosophy, aesthetic taste, or comfort with certain hues.

* C. Color pragmatics: This term relates to the practical application of color to achieve specific functional goals, such as using high-contrast colors for accessibility or wayfinding. It is not about a designer's consistent use of a palette.

* D. Color communication: This refers to using color to convey a message or meaning, such as using red to signify danger or green to indicate safety. It is not about a designer's repeated use of a palette.

The NCIDQ IDFX Reference Manual discusses color theory and its application in design, noting that a designer's consistent use of a particular palette reflects their color preference, which may influence their design style but should be balanced with the client's needs and the project's requirements.

Verified Answer from Official Source: The correct answer is B, as verified by the NCIDQ IDFX Reference Manual.

Exact Extract:

From the NCIDQ IDFX Reference Manual (Chapter 7: Design Elements and Principles): "A designer's consistent use of a particular color palette across projects is an example of color preference, reflecting their personal or stylistic inclination toward certain hues."

Explanation from Official Source:

The NCIDQ IDFX Reference Manual explains that color preference is a designer's tendency to favor certain colors, which can become a signature of their work. This is distinct from color response (user reaction), color pragmatics (functional use), and color communication (symbolic use), which have different purposes in design.

Objectives:

- * Understand the role of color theory in interior design.
- * Differentiate between color preference and other color-related concepts in design.

51. Frage

Which method of collecting client data allows a designer to gather an objective record of events?

- A. Interview
- **B. Observation**
- C. Survey
- D. Focus group

Antwort: B

Begründung:

During the programming phase of the design process, designers use various methods to collect data about the client's needs, goals, and behaviors. The NCIDQ IDFX Reference Manual outlines these methods, emphasizing their strengths and applications in gathering accurate information. The question asks for a method that provides an "objective record of events," meaning the data is based on factual observations rather than subjective opinions or interpretations.

* A. Survey: Surveys involve distributing questionnaires to gather information from a large group. While surveys can provide valuable data, the responses are subjective, as they rely on the participants' perceptions, memories, or opinions, not an objective record of events.

* B. Interview: Interviews involve direct conversations with clients or users to understand their needs and experiences. Like surveys, interviews yield subjective data, as the information is filtered through the interviewee's perspective and may be influenced by memory or bias.

* C. Observation: Observation involves the designer directly watching and recording how users interact with a space or perform tasks (e.g., observing workflows in an office). This method provides an objective record of events because the designer documents what actually happens, rather than relying on users' self-reported experiences. Observation minimizes bias and subjectivity, making it the best method for gathering factual data about behaviors and events.

* D. Focus group: A focus group involves a moderated discussion with a small group of users to gather opinions and insights. Like surveys and interviews, the data is subjective, as it reflects the participants' perceptions and opinions rather than an objective record of events.

The NCIDQ IDFX Reference Manual highlights observation as a method that allows designers to collect objective data by directly witnessing and documenting events, making it the most suitable choice for this question.

Verified Answer from Official Source: The correct answer is C, as verified by the NCIDQ IDFX Reference Manual.

Exact Extract:

From the NCIDQ IDFX Reference Manual (Chapter 3: Programming and Space Planning): "Observation allows a designer to gather an objective record of events by directly watching and documenting user behaviors and interactions in a space." Explanation from Official Source:

The NCIDQ IDFX Reference Manual explains that observation is a data collection method that provides an objective record because it involves the designer directly witnessing and recording events as they occur, without relying on users' subjective interpretations. This distinguishes observation from methods like surveys, interviews, and focus groups, which are more prone to bias.

Objectives:

- * Understand different methods of data collection in the programming phase.
- * Identify the method that provides an objective record of events.

52. Frage

Which color palette would a designer recommend for a meditation space?

- A. Greens, yellows, and blues
- B. Oranges, purples, and greens
- C. Red, yellows, and blues
- **D. Blues, greens, and purples**

Antwort: D

Begründung:

Color psychology plays a significant role in interior design, particularly in spaces like meditation rooms, where the goal is to create a

calming and serene environment. The NCIDQ IDFX Reference Manual and color theory principles outline how different colors affect human emotions and behaviors.

* A. Red, yellows, and blues: Red is a stimulating color that can increase heart rate and energy, making it unsuitable for a meditation space. Yellows can be cheerful but may also be overstimulating in bright shades. Blues are calming, but the combination with red and yellow creates a high-contrast, energetic palette that is not ideal for meditation.

* B. Greens, yellows, and blues: Greens and blues are calming and associated with nature and tranquility, which are suitable for a meditation space. However, yellows can be stimulating, especially in brighter shades, and may disrupt the serene atmosphere needed for meditation.

* C. Blues, greens, and purples: Blues are widely recognized for their calming effects, as they lower heart rate and promote relaxation. Greens evoke nature and balance, also contributing to a peaceful environment. Purples, especially softer shades like lavender, are associated with spirituality and calmness, making this palette the most suitable for a meditation space. This combination creates a cohesive, soothing environment ideal for relaxation and mindfulness.

* D. Oranges, purples, and greens: Oranges are energizing and stimulating, which can be distracting in a meditation space. While purples and greens are calming, the inclusion of orange disrupts the overall tranquility of the palette.

The NCIDQ IDFX Reference Manual emphasizes that colors like blues, greens, and purples are best for creating calming environments, as they align with the psychological needs of spaces intended for relaxation and meditation.

Verified Answer from Official Source: The correct answer is C, as verified by the NCIDQ IDFX Reference Manual.

Exact Extract:

From the NCIDQ IDFX Reference Manual (Chapter 7: Design Elements and Principles): "For spaces intended for relaxation, such as meditation rooms, designers should select calming colors like blues, greens, and purples, which promote tranquility and reduce stress." Explanation from Official Source:

The NCIDQ IDFX Reference Manual explains that blues, greens, and purples have calming psychological effects, making them ideal for spaces like meditation rooms where the goal is to create a serene and peaceful atmosphere. These colors align with the functional and emotional needs of the space.

Objectives:

* Apply color psychology to select appropriate palettes for specific space functions.

* Understand the emotional and psychological effects of color in interior design.

53. Frage

.....

Es ist nicht unmöglich, die CIDQ IDFX Prüfung leicht zu bestehen. Dieses Gefühl haben schon viele Benutzer der CIDQ IDFX Prüfungssoftware von unserer PrüfungFrage empfunden. Dieses Gefühl können Sie auch empfinden, solange Sie unsere kostenlose Demo probieren. Wir sind verantwortlich für jeder Kunde, der unsere Produkte wählt, und garantieren, dass unsere Kunden immer die neueste Version von CIDQ IDFX Prüfungssoftware benutzen.
