Slack-Admn-201 Deutsch & Slack-Admn-201 Übungsmaterialien

Es gibt viele Methoden, die Salesforce Slack-Admn-201 Zertifizierungsprüfung zu bestehen. Einerseits kann man viel Zeit und Energie auf die Salesforce Slack-Admn-201 Zertifizierungsprüfung aufwenden, um die Fachkenntnisse zu konsolidieren. Andererseits kann man mit weniger Zeit und Geld die zielgerichteten Salesforce Slack-Admn-201 Prüfungsfragen von EchteFrage benutzen.

Salesforce Certified Slack Administrator Slack-Admn-201 Prüfungsfragen mit Lösungen (Q51-Q56):

51. Frage

As an Org Admin at a healthcare company, you've been tasked with simplifying the experience for getting an upcoming communications project Slack-ready. A team of your organization's employees will work with a dozen rotating consultants at a communications agency to manage several communications campaigns over the next 6 to 8 months. You'll manage this external collaboration using guests or Slack Connect.

What is the best method for managing this collaboration?

- A. Provide the communications agency with guest accounts so that they can invite additional external users to the channels as needed.
- **B. Use Slack Connect to allow each organization to manage privacy settings, oversee channel naming, and add their own team members as project needs shift.**
- C. Provide the communications agency with guest accounts so that you can block file uploads/downloads for this work.
- D. Use Slack Connect in order to automatically sunset the external access to the shared Slack channels after the 8 months is completed.

Antwort: B

Begründung:

Slack recommends using Slack Connect for secure, flexible external collaboration:

"Slack Connect enables organizations to manage their own members, privacy settings, and security policies while sharing channels with external partners." Using guest accounts (B, D) would require you to manage all external users yourself, which is burdensome and inflexible. Option C incorrectly implies that Slack Connect automatically sunsets access - expiration must be manually managed. 52. Frage

You're an Org Admin who is tasked with auditing all guest accounts in your company's Slack Enterprise Grid organization. The organization consists of two workspaces.

What is the most efficient way for you to gather this information?

(Select the best answer.)

- A. Gather the data from the Manage Members section of each workspace's administration dashboard.
- **B. Export the data from the Members section of the org analytics dashboard.**
- C. Export the data using the Export Data tab in the org administration dashboard.
- D. Open a ticket with Slack's Customer Experience team to see which guest accounts are active.

Antwort: B

Begründung:

Slack Enterprise Grid provides an Org-level Members analytics section where you can view and export detailed information about all users, including guest accounts.

"Org Admins and Org Owners can export member lists from the Org analytics dashboard, including guest account details like type (single-channel or multi-channel), status, and associated workspaces." Gathering from each workspace (A) is inefficient and manual. Exporting from the Export Data tab (D) relates to message and file exports, not member data. Opening a ticket with Slack (B) is unnecessary for this standard administrative task.

53. Frage

You're a Slack Org Admin, and your company recently acquired a new business unit. You must decide if you want to add your new teammates to your existing Slack workspaces, or create a new workspace in your Slack Enterprise Grid Org.

You know that this new business unit has strict security and compliance requirements that exceed the policies of your current workspaces. You also expect the new business unit to collaborate extensively with the rest of your company, so they need to feel connected.

What should you consider first when deciding if you need a new workspace?

(Select the best answer.)

- A. The new business unit's preference to communicate in direct messages (DMs) and private channels to preserve confidentiality.
- B. The number of multi-workspace channels you think the new business unit will need when collaborating across the org.
- **C. The data retention needs of the new business unit for files and messages.**
- D. The new business unit's app approval requirements.

Antwort: C

Begründung:

When deciding whether to create a new workspace in Enterprise Grid, Slack recommends:

"Start by assessing whether the business unit's data retention, security, and compliance requirements are different enough from existing workspaces to justify workspace separation." If stricter data retention or compliance needs are present, a separate workspace may be necessary to apply different settings. Collaboration can still happen through multi-workspace channels if needed. Preferences about DMs (B) or apps (D) are secondary considerations.

(Reference: Slack Administration Study Guide - Enterprise Grid Workspace Planning)

-

54. Frage

Moshi is a Workspace Owner on the Plus plan. John is leaving the company on Friday, and Moshi will be deactivating John's IdP account.

What does Moshi need to do to ensure that John won't have access to Slack?

- A. Deactivating the IdP account will automatically delete the Slack account that was bound to it via SSO.
- B. Change the email, and reset the password. Changing the email will end John's Slack session.
- **C. Check that the IdP supports de-provisioning via SCIM and that the connector app is installed and configured correctly.**
- D. Activate "Just-in-Time" de-activations to automatically remove John and any users who are inactive for more than 14 days.

Antwort: C

Begründung:

To automatically manage user deactivation:

"If your Identity Provider supports SCIM provisioning, and it is correctly configured with Slack, user deactivation in the IdP will trigger automatic deactivation of the user's Slack account." SCIM ensures seamless deprovisioning. Just-in-Time deactivations (D) are not a Slack feature, and changing the email manually (A) is not secure or scalable.

(Reference: Slack Administration Study Guide - User Deprovisioning with SCIM)

55. Frage

You're an Org Admin of an Enterprise Grid org consisting of three workspaces: IT, Internal, and Contractors.

An executive wants to create a communication channel with everyone in the IT and Internal workspace, but not Contractors.

What is the best way to create this channel so that it will only be visible to people in the IT and Internal workspaces?

(Select the best answer.)

- A. Create a channel in the IT workspace, and invite members from the Internal workspace as guests.
- **B. Create a multi-workspace channel between the IT and Internal workspaces.**
- C. Create an org-wide channel, and exclude the Contractors workspace.
- D. Create a Slack Connect channel between the IT and Internal workspaces.

Antwort: B

Begründung:

Slack recommends:

"Multi-workspace channels allow you to share a channel between select workspaces within an Enterprise Grid org, enabling collaboration across designated workspaces while keeping others excluded." Org-wide channels (A) include all members by default. Slack Connect (B) is for external organizations, not internal collaboration. Inviting Internal members as guests (C) is unnecessary and inefficient.

(Reference: Slack Administration Study Guide - Multi-Workspace Channels)
