Top CPRE-FL_Syll_3.0 Dumps Discount | Easy To Study and Pass Exam at first attempt & Latest updated CPRE-FL_Syll_3.0: IREB Certified Professional for Requirements Engineering. Foundation Level

It is very normal to be afraid of the exam, especially such difficult exam like CPRE-FL_Syll_3.0 exam. We know that encouragement alone cannot really improve your confidence in exam, so we provide the most practical and effective test software to help you pass the CPRE-FL_Syll_3.0 Exam. You can use our samples first to experience the effect of our software, and we believe that you can realize our profession and efforts by researching and developing CPRE-FL_Syll_3.0 exam software from samples of CPRE-FL_Syll_3.0.

ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q80-Q85):

NEW QUESTION # 80

Choose the WRONG sentence regarding life cycle management in Requirements Engineering.

- A. It controls the quality of a set of requirements.
- B. It records the actual transitions between states that occur in a requirement.
- C. It establishes the possible statuses of a work product or requirement.
- D. It is applicable to both requirements and specifications.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Life cycle management defines allowed states (draft, approved, implemented, retired, etc.) and the transitions between them for requirements and other RE work products, fulfilling A and B. It applies not only to single requirements but also to documents or baselines, so C is correct. However, quality control-checking adequacy, completeness or consistency-is performed by validation, reviews and quality assurance activities, not by life cycle management itself. State transitions may be conditional on quality checks, but life cycle management does not "control the quality" per se. Therefore D is the wrong statement.

NEW QUESTION # 81

Choose the right sentence regarding the types of views:

- A. All the other options are wrong.
- B. A selective view presents a subset of the available data (attributes) for the requirements.
- C. An aggregating view presents summaries, totals, or averages derived from a group of requirements.
- D. Projective views provide information on a carefully chosen subset of requirements.

Answer: C

NEW QUESTION # 82

You are to create a requirements specification for an internet banking software. The system shall perform bank credit transfers and therefore receives from the user, among other information, the bank identification code and the name of the bank. Now things have changed so that only the bank identification code must be entered by the user and the bank name is no longer required. On which part of your documentation do you most likely have to work in order to incorporate this change? (2 Points)

- A. As a change in the goals has been communicated, the goals in the specification must be updated.
- B. In the chapter in which the states of the system are described.
- C. You have to adjust the class model and/or the data model, which describe the structure of the system's input and output data.
- D. Nowhere, since this is a detail for the architecture.
- E. If it is about inputs and outputs of the system, this change has to be worked into the context diagram.

Answer: A,E

NEW QUESTION # 83

Which of the following sentences about template-based requirements is FALSE?

- A. They look more uniform than requirements written in natural language.
- B. They aren't the most flexible.
- C. They put obstacles in capturing the most relevant information.
- D. They may lead requirements engineers to not focus on the requirements' contents.

Answer: C

NEW QUESTION # 84

As a requirements engineer, you deal with a diverse range of requirements. A template for natural language functional requirements can help you to formulate different forms of system activities in a more precise way.

Which two kinds of system activities are among those supported? (1 Point)

- A. Independent system activity
- B. Technical requirement
- C. Quality requirements
- D. System requirement
- E. User interaction

Answer: A,E

NEW QUESTION # 85
