CrowdStrike Certified Falcon Responder Sample Questions (Q33-Q38):

NEW QUESTION # 33

A responder is analyzing a MITRE-related alert and sees the technique 'Explore > Discovery > Cloud Service Dashboard'. Which of the following scenarios best describes the technical activity associated with this technique?

- A. An adversary deploys a crypto-miner inside a compromised Docker container.
- **B. An adversary uses a cloud service dashboard GUI with stolen credentials to gain useful information from an operational cloud environment.**
- C. An adversary uses an automated script to bruteforce S3 bucket permissions.
- D. An adversary executes an API call to terminate all running EC2 instances in a region.

Answer: B

NEW QUESTION # 34

What is the difference between a Host Search and a Host Timeline?

- A. There is no difference - Host Search and Host Timeline are different names for the same search page
- B. A Host Timeline only includes process execution events and user account activity
- C. Results from a Host Timeline include process executions and related events organized by data type. A Host Search returns a temporal view of all events for the given host
- **D. Results from a Host Search return information in an organized view by type, while a Host Timeline returns a view of all events recorded by the sensor**

Answer: D

NEW QUESTION # 35

When viewing the summary list on the 'Endpoint Detections' page, an analyst sees a column for the timestamp. What does the timestamp in this specific summary view represent?

- A. The file creation time for the primary process involved in the alert.
- B. The time the detection was first assigned to a human analyst.
- C. The exact time the Falcon sensor was first installed on the host.
- **D. The timestamp of the last activity recorded for that specific detection.**

Answer: D

NEW QUESTION # 36

What happens when a hash is set to Always Block through IOC Management?

- A. The hash is submitted for approval to be blocked from execution once confirmed by Falcon specialists
- B. Execution is prevented on selected host groups
- C. Execution is prevented and detection alerts are suppressed
- **D. Execution is prevented on all hosts by default**

Answer: D

NEW QUESTION # 37

A list of managed and unmanaged neighbors for an endpoint can be found:

- A. by reviewing "Groups" in Host Management under the Hosts page
- B. under "Audit" by running Sensor Visibility Exclusions Audit
- C. only by searching event data using Event Search
- **D. by using Hosts page in the Investigate tool**

Answer: D

NEW QUESTION # 38

.....
